The HON. SIR HENRY HARRISON said:—I must confess that I am a little disappointed at the criticism which has been directed against these sections, because, from the line of argument previously adopted by the hon. member, I should have thought that these were provisions which my hon. friend would have supported. When we were considering the building regulations he pointed out that we were punishing the innocent purchaser of a small plot of land, whereas we ought to have dealt with the vendor. In regard to section 247 again, he argued that we were putting difficulties in the way of poor people in regard to the building of their huts; that they would not be allowed to build their huts; that the fault really lay with the landlord, who let his land in small parcels. I then referred my hon. friend to section 252, when he said he would come to that afterwards; and now the way he comes to it is to condemn that which he before said ought to commend itself to us. The object of these sections is precisely that which he so forcibly pressed upon us the other day. He pressed us then to go to the right person, the fountain head, and this is what is now proposed to be done. Under the existing law we have to deal with isolated cases, the building of a hut here and a hut there. The only way of laying out a bustee on any proper system is to require the owner or owners to submit a plan, or if he fails to do so, the Municipality must do it for him. My hon. friend has spoken as if there is no necessity for these sections. Dr. Simpson has assured us several times that what we are doing in the way of running roads here and there in bustees is nothing in comparison to the advantage to be gained by having new bustees laid out on proper plans. The Superintendent of Roads, under whose jurisdiction the building of huts falls, says he cannot possibly remedy the evil of huts being built promiscuously here and there; applications come in one by one, and the applications must in each case be answered within 14 days. If hon. members will glance at the bustee plans laid on the table, they will see that that is emphatically

the one requirement in the bustees of Calcutta, the laying out of the huts on a systematic plan. Huts may be erected far apart, or they may be so closely dovetailed that you may just be able to creep between them. Each tenant can erect his hut just where he pleases. The only person who is in a position to remedy this radical defect is the owner of the land, and if he fails to do so, the municipality must lay down a plan, after hearing any objections which the owner has to offer And this is what is provided for. My own conviction is that there will be none of the practical difficulties which my hon. friend anticipates. No owner need divide his land in absolutely equal blocks of land. He will run one line of sites, say 50 feet wide, for the largest class of huts, another perhaps of 40 feet in width, a third of 30 feet, a fourth of 20 feet, and perhaps also one line of 10 feet wide for the poorest class of tenants. It is only as to the breadth of the blocks that there will be any difficulty, because there is nothing to prevent a tenant from taking any length of line he pleases. A man who wants to build a hut will select any of the widths of land he wishes, and he can get any length of it which he desires. As a test of the facility with which bustee lands can be laid out in this way, I have had some plans prepared in the office. I have taken one of the existing blocks of huts, and have sketched it out on the proposed system, and have then got a draftsman to take the existing huts and fit them in We took a piece of ground in the Rajah Bagan bustee and fitted every single hut on it into its place on this plan, and if the huts could be taken up on the American system and put down as shown on this plan, they could every one be transplanted and arranged in this unobjectionable manner. I next took Nathur Bagan bustee and cut it up into similar blocks. Here the difficulties were great, and yet out of 60 huts now on the ground 52 of them have been placed in their proper positions on this arranged system, even after allowing for the difficulties of separate owners and of each plot belonging to one person Nevertheless, 52 out of 60 huts now on the ground in the space we took have been fitted into their proper positions. There was still space left where at least eight huts more could be placed, but not the actual huts on the ground. This would be an inconvenience small in the extreme as compared with the object of these sections. The object is to have sufficient powers so as to arrange bustees according to a proper system. The power now existing is merely that of running roads through bustees, but nothing more, and although these roads admit of the scavenging of bustee, the object of laying out bustees in the manner proposed is to allow of proper ventilation. I maintain that the principle of these sections is certainly a very fair one. It is not unjust to the owner to say you must look after your property; you are not to give a cottah of land here and a cottah there and leave the tenant to deal with it as he likes; put a *gol labree* here, a godown there, a shed for carts here, and a dwelling-house there: and you are not to be permitted to reply—I have nothing to do with that: all I want is my rent. What we say to the landlord is, you are bound to take so much forethought that the use to which your land is put is not to result in a sanitary evil, both to your tenants and to the neighbourhood. That is all we require the landlord to do. And I have not ventured to go further, because it is proper in a matter like this to proceed cautiously, although slowly. The first year will perhaps be taken up in calling for plans, hearing objections, and getting the machinery in order in three or four bustees. Then we can take up, say, 20 more and so on, and in the course of say six or seven years a considerable impression will be made. The progress will no doubt be very slow, because the sections, so far from being of a revolutionary character, will be found rather to be tortoise-like in their operation. I think it will be a pity if the Council thinks it right to omit these sections.

The HON BABU KALI NATH MITTER said in reply:—I must admit that on this occasion my hon. friend has undertaken to meet the arguments which I have advanced. He seems to think that I am somewhat inconsistent in the position I have taken. He has been pleased to say that my arguments as regards the building regulations and as regards section 247 have considerable force, and yet he was the first to oppose them. What I complain of is that this is a roundabout procedure. If it is desirable to legislate in a matter of this kind, making it compulsory on owners of land to look after their property, a single section would suffice, by providing that no one shall let out his land for the building of huts unless with the sanction of the Commissioners. If a section of that

kind be introduced, landowners will realise their position and feel the responsibility imposed on them by law. My hon. friend is not prepared to go to that extent. But why should he not adopt the simplest procedure, instead of so cumbrous a one to attain the object he has in view? Why should he not enact that no owner shall let out small parcels of land for the erection of huts without first obtaining the sanction of the Commissioners? I submit that there is no inconsistency in the position I have assumed. In the matter of the building regulations, I wanted to touch the man who sells the land, who derives the whole benefit, and not the innocent purchaser. But I failed. Then in the case of bustee lands, why introduce the system of joint plans and standard plans? Why not positively assert the principle that no one shall let out land for building huts unless he complies with a certain state of things? That will be the simplest way of dealing with the question.

The motion was put to the vote and negatived.

The Hon. Babu Kali Nath Mitter moved that, for section 257, the following be substituted:—

"When it appears to the Commissioners in meeting that any bustee is, by reason of the manner in which the huts are crowded together, or for any other reason, in an insanitary condition and that the procedure provided by sections two hundred and fifty-two to two hundred and fifty-six will be too dilatory for improving such bustee, they may cause it to be inspected by two medical officers, who shall make a report in writing on the sanitary condition of the said bustee; and shall specify, if necessary, in the said report, the huts which should be wholly or in part removed, the roads, drains and sewers which should be constructed, and the low lands which should be filled up with a view to the removal of the risk of disease. The huts which together form a bustee under this Part may belong to several owners. The existence of a masonry wall, privy, shed or house in a bustee shall not preclude the Commissioners from dealing with such bustee in any way authorised by this Act."

He said:—The section which I propose is slightly different from section 257 of the Bill, and it provides, with a slight modification, all that is aimed at by that section.

The Hon. Sir Henry Harrison said:—It seems to me that this section follows as a necessary consequence from the previous amendment being rejected. The section is adapted to the existing procedure. I was so sensitive of the fact of the slow and gradual working of the new system of standard plans that I thought it would not be wise to give up the more expeditious system we have at present, expeditious I mean as compared to the system of placing every hut in its proper place, which must be done gradually. I call the procedure under this section comparatively expeditious. The medical officers appointed to report upon a bustee are to prepare a standard plan, which would be carried out under the present procedure, and in all urgent cases this procedure will be adopted.

The Hon. Babu Kali Nath Mitter said in reply:—After the explanation which the hon. member in charge of the Bill has given, I will withdraw this amendment.

The motion was, by leave, withdrawn.

The Hon. Babu Kali Nath Mitter also, by leave, withdrew the following amendments, of which notice had been given:—

(1). That, for section 258, the following be substituted:—

"On receipt of the report of the medical officers, the Commissioners in meeting may cause a notice to be served upon the owners or occupiers of the hut, or, at the option of the Commissioners, the owner of the land on which such huts are built, requiring them to carry out and execute within a reasonable time to be fixed by the Commissioners for such purpose all or any of the works specified in the said report."

(2). That section 262 be omitted.

The Hon. Babu Kali Nath Mitter moved that section 263 be omitted.

He said:—It seems to me that this section is not necessary, after having provided for the preparation of standard plans of the way in which bustees are to be improved, unless it be for the protection of the people themselves. But the provisions of this section really afford no protection. It provides that without the consent of the owners of the land not more than one-fifth of the area of a bustee shall be left for roads, and not more than two-thirds for open spaces. Under the section a tank is not to be included in this proportion. If this

is intended as a power in the hands of the people of the bustee to insist on two-thirds of the land being left open, I submit that the power should not be given, especially when the fullest provision has been made as regards a standard plan, and more especially because the owners will have to pay rates in respect of this two-thirds of open land. In a subsequent section it is provided that where there are roads and so on, the owners of the property shall be considered as occupiers of such portions: therefore they will have to pay rates on the unoccupied lands. I submit that this section is not necessary; but if it is intended to operate as a protection to the owner, the section will have to be modified very considerably.

The Hon. Sir Henry Harrison said:—As far as I represent the Executive of the Corporation, I shall not object to this section being omitted, its intention is to tie their hands: it imposes obligations, to some of which it will not be easy to conform. Whether my hon. friend can be taken to be the spokesman of the owners in this matter, I consider very doubtful. I do not think that a section of this kind can be omitted in the interests of bustee owners, as I think it affords them very considerable protection as regards the proportion of open lands. Obviously, two-thirds is the maximum; ordinarily, nothing like that proportion will be required. But there are some cases in which a considerable proportion of a bustee may consist of a tank with not a very large fringe of land round it; you must have a space of 30 feet from the tank to the huts and a space between two lines of huts, in such cases a considerable proportion must be unoccupied. At the same time if the Council thinks a maximum of two-thirds excessive, and that a less proportion will be a concession of value, I believe that a proportion of one-half may be fixed as a maximum without objection in 19 cases out of 20. It is only in one out of 20 cases that that proportion may prove embarrassing. We propose to apply the proportion of two-thirds to the case of each owner's land, not merely to the whole bustee. If the Council think the section is not wanted, as Chairman of the Corporation I may say there is no reason why it may not be omitted. But if the Council think it necessary for the protection of bustee owners, then if it would be a concession to them of any value to reduce the proportion of two-thirds to 50 per cent., I think the concession might well be made. The proportion of two-thirds will apply only to very exceptional cases.

His Honour the President said:—I quite understand that the proportion of two-thirds is the maximum, and to omit the section will rather be an injury than otherwise to the clients of the hon. mover of the amendment. On the other hand, the reduction of the maximum from two-thirds to one-half seems to me to be a substantial concession. If I may advise I would suggest that this concession be adopted.

The Hon. Babu Kali Nath Mitter said in reply:—I have proceeded on the basis of the public memorial, which says: "Under section 263 owners will be required to set apart as much as two-thirds of bustee land for roads, &c., for purposes of bustee improvement. The section would really amount to confiscation of private property, and your Honour's memorialists beg to record their earnest protest against it." If the maximum is reduced to one-half it will satisfy nobody.

The motion was put to the vote and negatived.

The Hon. Sir Henry Harrison then moved that in section 263 the words "one-half" be substituted for two-thirds.

The motion was put to the vote and carried.

The Hon. Babu Kali Nath Mitter by leave withdrew the motion, of which notice had been given, that section 265 be omitted.

The Hon. Babu Kali Nath Mitter moved that section 266 be omitted.

He said:—This is a novel provision altogether. If the owner wants to remove his bustee land from the character of bustee land, why should he not utilise the road which is his private property? Why should the consent of the Commissioners be needed when the owner wants to build on this portion of his bustee land when the character of a bustee has been removed from it? If another road is needed for the portion of the land which may still continue as a bustee, the Commissioners will have power to have such a road opened. It may be that a portion

of the existing road will be the most convenient site for building, and why should the owner be precluded from doing so simply because it has been a portion of a bustee road? All that the Commissioners might do is to require the owner to find another outlet for the bustee. Probably that will be the way this provision will be worked, but that is not what is provided in the section.

The HON. SIR HENRY HARRISON said :—The hon. member has raised a fair point; at the same time I may say that the section has been drafted with full forethought, and I believe it embodies the right principle. Looking to the deliberation with which the standard plan of a bustee is to be prepared, with full opportunity to the owner to object, when a certain piece of land, it may be belonging to several owners, has been marked off as a portion of a bustee road by which access is to be obtained for conservancy carts, it seems to me very inconvenient that the whole arrangement of the bustee should be upset because the owner of the land chooses to convert the particular spot into a dwelling-house. He could at the beginning have objected and reserved this particular land for building purposes The other owners have very likely carefully planned how they will arrange and align the bustee roads to fit in with this, but in consequence of the caprice of one owner, or of a partition or death, the whole arrangement will be liable to be upset It does happen so now, and in several cases we have been obliged to leave a bustee untouched, because the owner has said that he intends to build a house upon the site which has been chosen as the only good site for a road. When a certain piece of land has been chosen after full deliberation and consideration as one of the ways for people in the bustee getting out, and for access to the bustee from without, as well as for the purpose of scavenging, under my hon. friend's amendment the owner of that particular ground may after a time throw the whole out of gear. I believe the section in the Bill gives the fairest and best solution of the difficulty. If the section is omitted, the effect will be to very seriously encumber dealings with the bustee, not only on the part of the Corporation, but very much also on the part of other owners in the same bustee Those whose land is further in, will not be able to get proper means of egress and ingress. I therefore think it is proper to reserve this power to the Commissioners, and it should be remembered that the Commissioners in meeting will be the final arbitrators. If there is necessity for a road and if another road can be substituted, they will easily give their consent to the proposed substitution.

The HON. BABU KALI NATH MITTER said in reply :—By section 257 these roads remain the private property of the respective owners, and I fail to see how it is possible to impose by legislation an obligation on the owner not to utilise a particular plot of land for building, although he is at liberty to utilise the rest of his land for the purpose. If this section is omitted the Commissioners will still have power to require the opening out of proper roads, and this course will save interference with the rights of property for which there is, as far as I can see, no justification. It has been said that the standard plan will have been prepared with the fullest deliberation; but circumstances may be altered, and therefore what may have been done with the fullest deliberation at one time might operate with great hardship on a change of circumstances If he is still the owner of the land, it is very hard lines not to be able to utilise his property in the way he thinks best, subject of course to the control of the Commissioners in respect of building regulations and so forth.

The motion being put to the vote the Council divided—

Ayes 1.	*Noes* 11.
The Hon. Babu Kali Nath Mitter.	The Hon. H. Pratt.
	The Hon. Dr Gooroo Dass Banerjee.
	The Hon. C. H Moore.
	The Hon. Dr. Mohendra Lal Sircar.
	The Hon. Moulvie Abdul Jubbar.
	The Hon. Sir Alfred Croft.
	The Hon. Sir Henry Harrison.
	The Hon T. T. Allen.
	The Hon. C. P. L Macaulay.
	The Hon H. J. Reynolds.
So the Motion was negatived.	His Honour the President.

The HON. BABU KALI NATH MITTER moved that section 267 be omitted.

He said:—This section declares that the owners of bustee lands shall be deemed to be the occupiers of the roads and common ground or open spaces in the bustee, and the effect of it will be that the owners will have to pay rates and taxes in respect of all the roads and open spaces left expressly for the benefit of their tenants, it may be to the extent of one-half of the whole of the land. The rates and taxes, I submit, ought to be properly apportioned between the parties concerned. The main thoroughfares may be said to be required for the purposes of conservancy as well; but all the other roads, as well as the open spaces, will be for the benefit of the hut owners, and it seems hard that the owners alone should pay the rates on account of them. As occupiers the owners will be subject to many of the incidents of this Bill. If rubbish is thrown on the land, they may be punished under section 301, which provides that if any dust, dirt, filth or refuse is thrown on any street or place in contravention of certain sections, it shall be presumed that the offence was committed by or with the sufferance of the occupier, unless the contrary be proved. That seems hard on persons who have let out their bustee lands and have very little to do with them. The conservancy of bustees is to be put into the hands of the Commissioners, and a special rate is to be levied on bustees so conserved, and therefore it seems to me that in addition to that the owners of the roads and open spaces in bustees should be considered as the occupiers of them, and should have to pay rates upon them.

The HON. SIR HENRY HARRISON said:—It seems curious that the hon. member seeks to provide a remedy for what he complains of by omitting this section altogether. It is necessary to have some rule as to who is to be considered in occupation of bustee lands not occupied by huts. It is a source of considerable difficulty. It seems desirable that there should be some fair and equitable arrangement, and this arrangement tries to be fair. The section refers to "common ground," not to "open spaces." Suppose there is a tank in a bustee, and a space of 30 feet round the margin of the tank must be left vacant. How can you say that any particular hut owner can be looked upon as the occupier of that vacant space? Where you have open spaces between the huts you can do so. The owners of the land are not in any way responsible for the open spaces between the lines of huts which are left as the backyards of those huts. As regards the private roads, how can you make anybody but the owner of the land responsible as occupier? They are open to the whole of the bustee. But as regards roads the point is not of much consequence. It is not often that roads get into such an insanitary condition as to require prosecutions. Moreover, the Council should bear in mind that I introduced the proviso to section 269, that no conservancy rate shall be levied on any remodelled bustee without the consent of the owners, contrary to Dr. Simpson's strong and urgent remonstrance, because I considered it to be just. When we have roads between the lines of huts and roads for conservancy carts, we ought to consider it sufficiently similar to an ordinary compound, and this rate ought not to be levied without the consent of the owner; and if you provide that the Commissioners will not be allowed to levy a special rate on a remodelled bustee, then you must define who is to be the person responsible for the conservancy of these open spaces. You must say that the zemindar is responsible for keeping the general drainage system of the bustee in order, and each hut owner for the portion of the drain which runs into his own premises; that the zemindar is responsible for keeping in order the "common ground," and the individual hut owners for the spaces before and behind their own huts, and the care of the common ground round a tank should go to the owner. It seems to me that some section of the kind is absolutely necessary, and I do not see that any better one has been suggested.

The motion was put to the vote and negatived.

The HON. BABU KALI NATH MITTER, by leave, withdrew the following motions which stood in his name:—(1) that, in line 14 of the first paragraph of section 268, the word "standard" be omitted; (2) that, in line 2 of the third paragraph of the same section, for the words "any standard" the word "such" be substituted; (3) that the fourth, fifth, and sixth paragraphs of the same section be omitted; (4) that, for the proviso of section 269, the following be substituted;—"Provided that, without the consent of the owners, no such

rate shall be levied upon any bustee which has already been improved under the direction of the Commissioners."

The HON. SIR HENRY HARRISON moved that, at the end of section 270, the words "in such manner as a rate may be recovered" be inserted.

He said:—This section gives the Commissioners power to serve notices on the occupiers of a bustee, for the cleansing of which no special establishment is maintained, and which is in a filthy condition, to clean the same; and if the notices are not complied with within three days, they may clean the bustee and recover the cost from the occupiers. But the section does not say how the cost is to be recovered. Throughout the Bill costs incurred in default of work being done by owners or occupiers are made recoverable as a rate. If the words I propose are not inserted, it may be held that the only remedy is by suit. The insertion of these words are therefore necessary.

The motion was put to the vote and carried.

The HON. SIR HENRY HARRISON moved that, at the end of section 277, the following be inserted:—

"For the purpose of efficiently draining any house or land under this section, the Commissioners may require any courtyard, alley or passage between two or more houses, to be paved with such materials and in such manner as may be approved of by them; and may require such paving to be kept in proper repair. They may also require the level of any such courtyard, alley or passage to be raised, if necessary, for the efficient drainage thereof."

He said:—This amendment is brought forward at the request both of the Engineer and the Health Officer, who point out that it is impossible in some cases satisfactorily to provide for the health of houses, if the courtyards are simply ponds; if they are not sufficiently paved to admit of the water running off. The power given is only discretionary; it will hardly be insisted on in the case of very poor people. In the case of the rich it is most usually done, but in the case of some houses where this ought to be done it is not, and the object of this amendment is to provide a remedy in such cases. It is a power which is closely allied to the subject of drainage.

The HON. BABU KALI NATH MITTER said:—If my memory serves me rightly, a similar proposal was brought before the Town Council at the instance of the Health Officer. I did not see the list of business before this morning, and have not been able to trace the discussion, but if I recollect rightly very serious objections were raised to the proposal, and difficulties were pointed out which rendered further consideration necessary. It would have been advantageous if that discussion had been placed before this Council before they were asked to consider this amendment. My hon. friend has referred to the opinions of the Engineer and the Health Officer, and it would have been well if he had referred to the views of the Town Council also on this subject.

The motion was put to the vote and carried.

The HON. BABU KALI NATH MITTER moved that, in section 286, the words "stables and cowhouses," and in line 2 of section 288, the words "stable or cowhouse" be omitted.

He said:—The introduction of these words in these sections is an innovation: they do not exist in the present Act. These sections do not refer to public stables and cowhouses, but to stables and cowhouses in private houses, and I do not see why the Commissioners should be allowed any control over them. People who keep one or two horses or cows for private use would be unnecessarily harassed. Is it really necessary to make legislative provision on account of these small matters, especially when the Commissioners have been given full control as to the construction of buildings? I submit that there is no necessity whatever for including stables and cowhouses in these sections, which are mainly intended to deal with privies and cess-pools.

The HON. SIR HENRY HARRISON said:—It is quite correct to say that this provision is not to be found in the existing law, and it was introduced because there has been difficulty in dealing with these matters. At present we have no control over stables and cowhouses attached to private dwellings. It is quite as likely that in some cases stables or cowhouses kept in a filthy condition

will be as injurious to health as badly constructed privies or cess-pools. We can make the owner of a stable or cowhouse run a drain along it, but we cannot compel him to make the floor pucca. In one or two cases in which we have tried, we have found that we have exceeded our authority. If stables and cowhouses in which three or four animals are kept are not made pucca, by being laid with brick-on-edge, they cannot possibly be kept clean. Nearly all these powers are necessary for the security of the neighbours, and we have frequent complaints from the next door neighbours where stables are not properly paved and kept clean. The law should allow the Commissioners to require the floors of stables and cowhouses to be kept in proper condition. I think it a reasonable power, and I do not believe that it will lead to any serious hardship.

The HON. BABU KALI NATH MITTER said in reply:—My hon. friend forgets that there is in the Bill a chapter relating to nuisances which will enable the Commissioners to prosecute persons for keeping any portion of their premises in an unhealthy condition; therefore under that chapter persons who keep their stables or cowhouses in a filthy condition can be prosecuted. Is not that quite sufficient? Is it necessary that the Commissioners should also have a voice in the materials and dimensions of these places? The cases of privies and cess-pools and of stables and cowhouses seem to me entirely different. Why should the Commissioners have these powers in addition to the power of prosecution for a nuisance?

The motion being put the Council divided:—

Ayes 2.	*Noes* 10.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Babu Kali Nath Mitter.	The Hon. C. H. Moore.
	The Hon. Dr. Mahendra Lal Sircar.
	The Hon. Moulvie Abdul Jubbar.
	The Hon. Sir Alfred Croft.
	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	His Honour the President.

So the Motion was negatived.

The HON. BABU KALI NATH MITTER moved that, in line 4 of section 287, for the words "six hours" the words "twenty-four hours" be substituted.

He said:—This section requires the occupier of any premises to clear obstructions to drains within six hours of notice. I think six hours is too short a time. The notice may be delivered at the house at 11 o'clock, and the occupier may not return from work till 7 o'clock. Workmen will have to be procured before the work can be done, and therefore I think 24 hours is a reasonable time.

The HON. SIR HENRY HARRISON said:—The penalty is absolutely *nil*, although it is a serious thing to allow a drain to be choked. We keep a special establishment for this purpose, and if notice is sent to the Overseer's office, the work will be done at once. The fee for clearing obstructions in drains used to be Rs. 2-8; but to facilitate such work the Commissioners reduced it to one rupee.

The HON. BABU KALI NATH MITTER said in reply:—My own experience is that the Commissioners themselves are not able to do this within 24 hours, and sometimes they take 48 hours, although they have the means to do it at hand; whereas a private person will have to get men to do it. I ask whether the health of the town will be in danger if the obstruction is not cleared in six hours.

The HON. SIR ALFRED CROFT stated that when he had occasion to call in the Commissioners, the obstruction was cleared in three hours.

The motion was put to the vote and negatived.

The HON. BABU KALI NATH MITTER, by leave, withdrew the motion in his name that in lines 5 and 6 of section 290, the words "twenty hours" be substituted for "one hour."

The Hon. Sir Henry Harrison moved that, at the end of the second portion of section 290, the following be inserted:—

"And if any drain is choked, or if any other defect connected with the drain which requires to be forthwith remedied is brought to light by such inspection, the Commissioners shall then and there clear out the drain, or remedy the defect."

He said:—This is the section under which the drains are periodically inspected. If anything is found wrong which requires to be forthwith remedied, the Commissioners ought to do it at once.

The Hon. Babu Kali Nath Mitter said:—One part of this provision is very objectionable. As far as a drain is concerned, there is not the slightest objection, but to deal with a stable or a cowhouse in this way would be very objectionable. Suppose the officer considers that the dimensions of the stable or cowhouse are not such as they ought to be, is he to pull it down at once? The defect may be in the construction of the cowhouse or stable.

The Hon. Sir Henry Harrison agreed to a verbal modification of the section to meet this objection; after which the motion was put to the vote and carried.

The Hon. Sir Henry Harrison moved that in line 5 of section 291 for the words "any offensive matter or sewage into any sewer" the words "permits any offensive matter or sewage to flow, or be put into any sewer" be substituted.

He said:—This is a verbal amendment. A person cannot be said to throw or put offensive matter or sewage into any sewer.

The motion was put to the vote and carried.

The Hon. Sir Henry Harrison moved that, in line 6 of section 292, for the words "filth or other offensive matter" the words "sewage or offensive matter" be substituted.

He said:—Just about this part of the Bill we adopted a suggestion made by the Hon. Mr. Macaulay, and defined "offensive matter" to mean dung, dirt, putrid or putrifying substances and filth of any kind not included in the term "sewage," but this section contains the old wording which the definition of "offensive matter" is intended to supersede. This amendment is merely to substitute a properly defined word for the words previously existing.

The motion was put to the vote and carried, and so also were similar amendments moved by the Hon. Sir Henry Harrison in sections 300, 301, 308 and 344.

The Hon. Babu Kali Nath Mitter moved that, in line 6 of section 292, for the word "fifty" the word "thirty" be substituted.

He said:—In an earlier section we have provided that no hut shall be erected within 30 feet of a tank. Thirty feet is ample space, and will be sufficient protection against water being contaminated by any source. I therefore move that in the case of latrines, privies, urinals, &c., the same distance be prescribed.

The Hon. Sir Henry Harrison said:—I do not think sanitary authorities will at all agree with the hon. member in this matter. Our present rule is 50 feet in case of a latrine, privy or urinal, and has always been so, and it is the same in the Suburbs also. I quite admit that the rule may often cause inconvenience to a hut-owner who often cannot get any place for his privy, but we always have power to make a special exemption. It will be a retrogressive measure to substitute 30 feet for 50, when the rule is 50 feet now both in Calcutta and the Suburbs

The motion was put to the vote and negatived.

The Hon. Babu Kali Nath Mitter moved that section 301 be omitted.

He said:—This section enacts that when rubbish, offensive matter or sewage is thrown or placed on any street in contravention of the rules prescribed for that purpose, it shall be presumed that the offence has been committed by, or with the sufferance of, the occupier of such building or land, unless the contrary be proved. The Municipal Commissioners are not only to be invested with certain powers, but they are to have presumptions of law in their favour. This is a presumption of law. If my neighbour who perhaps is inimical to me

chooses to place some rubbish on the street in front of my house, I am to be presumed to be guilty of having thrown the rubbish on the street, and I am required to prove a negative, contrary to all principles of English law.

The HON. SIR HENRY HARRISON said:—There is a great deal of force in this objection, and it has been taken by the Government of India, but they have not insisted on it. But still more forcible is the necessity for a section of this kind, without which the law will be inoperative. The difficulty occurs in this wise. Rubbish is thrown out of a window, nothing but a hand is to be seen, and it is impossible to find out who did the act, because the mere fact of the rubbish coming from a particular house will not be sufficient. In Bombay there was a long discussion on this point, and they have in their Bill a section just parallel to this. It is quite impossible otherwise to exercise any control over the throwing of rubbish on the streets contrary to rule. It is one of the greatest evils in Calcutta. In other towns the people are not allowed to throw rubbish on the streets; here every one is allowed to treat the streets as the common sewer, and any attempt to deprive the people of the right is strongly resented. In the northern portion of the town they are not satisfied with throwing out rubbish once a day; the Commissioners would not hear of any proposal to limit the right to the morning only. The Executive does not object so much if the hours for throwing rubbish are limited, because after that the streets can be kept clean; but in the front of a bazar, for instance, it is done all day. If in addition to allowing the practice both in the morning and in the afternoon, when a person does throw out rubbish after the fixed hours, we have no power to deal with it because our hands are tied—improvement is hopeless. The presumption is the same in the Bombay Bill, but here it must be proved that it was thrown from some building or land.

The HON. BABU KALI NATH MITTER said in reply:—My hon. friend has tried to introduce confusion into the argument by adverting to matters which do not concern us at all. At present the question of throwing rubbish on the streets is not before us. Power is given to the Commissioners to provide proper times and places for the throwing of rubbish, and after that has been done whoever throws or suffers rubbish to be thrown in contravention to such rules is under this section liable to a penalty. This section alters the existing law in many respects. It compels the occupier to prove a negative which is contrary to all principles of the English law of evidence: he must show that he has not done it. My hon. friend points out that it must be shown that it came from a particular house. That I submit is no protection, as that can easily be done by an ill-disposed neighbour, and the presumption is to be that it was done by, or with the sufferance of, the occupier. I submit that that is contrary to all principles of law.

The motion being put the Council divided:—

Ayes 3.	*Noes* 9.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lall Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mitter.	The Hon. Moulvie Abdul Jubbar.
	The Hon. Sir Alfred Croft.
	The Hon Sir Henry Harrison.
	The Hon T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H J. Reynolds.
	His Honour the President.

So the Motion was negatived.

The HON. SIR HENRY HARRISON moved that, in line 3 of section 302, the word "liquid" be omitted.

He said:—The expression used in this section is "offensive liquid matter," but "offensive matter" is so defined as to include liquids: therefore the word "liquid" should be omitted.

The motion was put to the vote and carried.

The HON. SIR HENRY HARRISON moved that, at the end of section 307, the following be inserted:—

"And the Commissioners may cleanse the premises, and the expenses thereby incurred shall be paid by the occupier."

He said:—What is most desirable is that the premises shall be cleansed, and hitherto we have always acted on that principle, and the bill has been paid. In one case, however, payment was refused. We thought we should be able to recover the cost, but the Law Committee considered that we could not recover, as the provision of the existing Act did not authorise the doing of the work.

The motion was put to the vote and carried.

The Hon. Babu Kali Nath Mitter moved that, in clause 2 of section 315, the following words be omitted:—

"And until so paid the Commissioners may retain possession of the land or tank or the site of such tank, and utilise the same for public purposes."

He said:—The effect of this amendment will be that the section will end at the words "and the expenses thereby incurred shall be paid by the owner." In the course of my experience I have come across very many cases where owners have raised objections to the quantity and quality of the work and have refused to pay the bill, and in many cases the Commissioners have not thought fit to go to court to realise the cost, because it was considered that the issue would be a very doubtful one. They have all the powers it is possible to confer upon them for realising their dues, and in addition to that to propose that the property improved by them should be retained by them until the amount is paid is an innovation not warranted in law. In such matters the Commissioners should not be placed in any higher position than that of any other persons who are called upon to make improvements or to execute works. Only a particular class of persons is allowed to retain possession of property of a particular nature as security for charges payable to them. With that exception all persons have to recover their dues by suit before the ordinary tribunals. My hon. friend knows that there is considerable difficulty in realising the cost of such improvements owing to various objections raised from time to time, and in many cases the objection is that the work is not properly done, or that the amount charged is excessive; and it would be a hardship, when the claim is disputed, for the Commissioners to keep possession of the property until the dispute is settled,—it may be in six months or in a year. The Commissioners are not to pay for the property, but they may hold it in possession till the amount they claim is paid. There is no provision for compensation if the demand is found to be inequitable. It is an innovation in the law for the Commissioners to keep possession of the property improved by them, and to retain possession until their bill is paid, without making compensation to the person whose property has been retained There is such a thing as an usufruct mortgage, where the person who holds the property realises the income, and applies the income to the reduction of the debt. But here the debt remains the same, and there is no provision for damages. I submit, therefore, that there is no authority for the provision which it is the object of my amendment to omit.

The Hon. Sir Henry Harrison said:—I quite admit that this is a clause which it is perfectly justifiable to criticise, but the reasons are sufficiently strong to justify the retention of this clause as perfectly equitable. At present we do a great deal of work in the way of tank-filling, and we shall have to do much more afterwards in the Suburbs. For the past seven or eight years the expenditure on this account has averaged Rs. 10,000 a year and our recoveries Rs. 5,000; therefore the general rate-payers have contributed one-half, the reason being that it is extremely difficult in many cases to recover the amount spent. One source of difficulty is that when the Bill is presented the owner pleads poverty, because the charge is considerable, but the enhancement in the value of the property far exceeds the cost. Then, in a very large number of cases, there are joint-owners; some say they had no notice and were not called upon to do the work; in other cases the owner sells the tank, and the new owner says he is not liable. In other cases, again, we cannot find any moveable property to attach, and for these and other reasons we recover only about half. By this provision you put your finger precisely on the difficulty and remove it. We do not want to make any profit out of the land, but it will be exceedingly advantageous if we can retain it for a time. What ought to be done to make the improvement complete is not done. The site should be planted with grass or trees as far as possible to take away the evil effects of the matter

with which it is filled up. All the Health Officers of the Corporation, from Dr. McLeod downwards, say that that ought to be done. Next you want to keep it as an open space; you do not want huts built upon it, which at present we have no power to prevent. If these sites are left in our hands for some time, the effect will be extremely good, and I can see nothing unjust in it. The costs we are in all cases entitled to obtain, and the owner will have the same opportunity of challenging the bill. The operation of the provision will be very beneficial. It will not only do away with a large number of excuses, but it will enable us to keep the sites for the benefit of the public as open sites for a much longer period than they are so kept at present It is a power which will be put in the hands of a public body, because it will be used for the public advantage.

The Hon. Babu Kali Nath Mitter said in reply:—My hon. friend has omitted to refer to the cases where the parties have challenged the Commissioners to sue for the recovery of the expenses incurred. In many cases exorbitant demands have been made. and when disputed no steps have been taken for recovery. These are not the cases of poor people, and therefore the cost could easily be recovered if fair and just. Why should the Commissioners be allowed to retain the property? I submit that the reasons assigned by my hon. friend have no bearing on the subject. One of those reasons is that huts may not be erected upon the site for a certain time. The Commissioners have ample power to prevent either huts or houses being built upon the site. Is there any justice or equity in allowing the Commissioners to retain possession of the property without paying for the use of it? Suppose the Court admitted the objection taken by the owner: in such a case, would not the retention of the property be an aggravated injury? A man who contracts to build a house for another person is not allowed to retain possession of it until he is paid for having built it. Here the Commissioners can recover by distress and sale. Why, therefore, should this additional power be given?

His Honour the President said:—It is for the Council to say how far the hon. member in charge of the Bill has answered the objection which, I am bound to say, is a very powerful one, though he has shown conclusively that the course which the section proposes to adopt is a very convenient one for the Executive. To me, however, the provision appears so much opposed to our ordinary legal ideas of private rights that the Council would do well to consider the question carefully before accepting it. For my own part I shall vote against the retention of these words in the section.

The motion being put the Council divided:—

Ayes 5.	*Noes* 7.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mitter.	The Hon. Sir Alfred Croft.
The Hon. Moulvie Abdul Jubbar.	The Hon. Sir Henry Harrison.
His Honour the President.	The Hon. T. T Allen
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.

So the Motion was negatived.

The Hon. Babu Kali Nath Mitter moved that section 319 be omitted.

He said:—This section authorises a Magistrate, on the application of the Commissioners, to declare any building to be unfit for human habitation and to prohibit its use as such This is another unheard-of power, and may operate very prejudicially, especially in the case of the dwellings of joint-Hindu families. What is the owner to do with a building which has been condemned in this way? Why should not the Commissioners acquire it? The value of the property is gone. I challenge my hon. friend to show a house built within the last few years which is unfit for human habitation: houses built in the antediluvian period might be condemned, but not those now built. The condemnation or otherwise of a house will depend very much upon the Magistrate before whom the case is brought. If he is a would-be sanitarian, he will most probably condemn it; but if the matter comes before a person who will judge on principles of common sense, the result will be different.

What inconvenience has been felt from the want of such a provision? Has a single case occurred within the experience of my hon. friend where he considers an order of this kind ought to have been obtained? I have been a Municipal Commissioner since the introduction of the elective system, and I have never yet heard of such a case having been brought to the notice of the Corporation. I submit therefore that there is no necessity for such a provision of law, and that there is no authority for it.

The HON. DR. GOOROO DASS BANERJEE said:—I support this amendment, as it is one of which I myself gave notice, and my reason is shortly this. We can understand that the law should interfere to prohibit one man from using his property in such a manner as to be injurious to his neighbours. But the right of interfering with a man's use of property to prevent his injuring, not anybody else, but himself is a right, the exercise of which should be restricted to the very narrowest limits. It is only in very extreme cases that such a power should be conferred, and I submit that no case has been made out for conferring on a Magistrate the power to prohibit a man from dwelling in his own house. It is true that the Health Officer of the Corporation may be a learned expert in the science of sanitation, and it may be true that its executive officers may be zealous in the cause of sanitation; yet we ought to credit ordinary men with some degree of common sense and a knowledge of their own interests; and in the great majority of cases they are better judges in that respect than the Municipal Commissioners or a Magistrate.

The HON. DR. MAHENDRA LAL SIRCAR said:—With all my love of sanitation I cannot allow this section to pass as it is without clear and definite rules being laid down in what respect a house may be considered to be unfit for human habitation. We may leave it to the discretion of the Commissioners and the judgment of a Magistrate, provided we lay down the conditions under which a house may be held to be unfit for habitation, but unless you do that you arm the Commissioners and the Magistrate with a power which might be exercised most arbitrarily to the great injury and annoyance of the occupiers of houses.

The HON. SIR HENRY HARRISON said:—I cannot admit that there is anything to commend this amendment to the Council. Although this power may be unknown in Calcutta, it has been exercised in Bombay for a long time without complaint, nor is there any proposal to give it up. It has been pointed out that we may credit ordinary men with a due sense of their own interests. But this power is not wanted to deal with ordinary cases, but with such cases as that in which somebody is trying to make somebody else live in a house which is unfit for human habitation, and it is a power which is necessary in the interests of the public. How can the power be exercised arbitrarily? The Commissioners do not claim the power for themselves. They ask to be permitted to bring evidence which will satisfy a Magistrate. First the Commissioners must put the law in motion, and then they must satisfy an independent tribunal. It is all very well to talk of the necessity of making progress in local self-government. It is an experiment which has been tried in Calcutta for the last twelve years, and if you wish to induce the Government to trust the Commissioners further, is not this exactly the sort of extension of power you ought to expect? This section gives the Executive on behalf of the Commissioners the power of action, but the Corporation has full control over the Executive; and yet those who want the principles of local self-government to be advanced protest against their being entrusted with this power. I say that this and some other provisions of the Bill conferring extended powers on the Commissioners are the necessary result of the experiment of local self-Government having been tried and been found successful, and I cannot conceive any valid objection to a provision which is so safeguarded.

The HON. BABU KALI NATH MITTER said in reply:—I wholly fail to see what the principles of local self-government have to do with this discussion. My hon. friend says this is an extension of the privileges conferred upon the Corporation, and yet it is objected to. He of course looks at the matter from his own point of view, but from my point of view local self-government means a very different thing from placing a power of this kind in the hands of the Commissioners. The proper extension of the principles of local self-government

would be to confer greater privileges on the rate-payers, and not to intervene larger powers between the Commissioners and the rate-payers. I absolutely fail to see how local self-government has anything to do with this question. I have asked my hon. friend to point out a single case where the necessity for such a power has been shewn, but he has not done so, and therefore I am justified in assuming that he is not in a position to do so. Then in the name of common sense I ask how is it possible that in the future any building will be erected which will be unfit for human habitation? If such a building is constructed in the future, the Executive of the Corporation will be responsible, for ample powers have been given to regulate the construction both of houses and huts. The only cases in regard to which it could have been possible to claim such a power are in respect of buildings already existing, and as no such case has ever been brought to notice, I am justified in saying that there can be no necessity for it in the future, unless the necessity should arise from the culpable negligence of the Commissioners.

The Hon. Dr. Gooroo Dass Banerjee said:—The remarks of the hon. member in charge of the Bill go to show that he has a very bad case. In fact he gave up the case he had to support and tried to support a very different case. He says the power is wanted for extraordinary cases, for cases where the house is inhabited not by the owner, but by tenants. [His Honour the President—I did not understand the hon. member to say anything of the kind.] [The Hon. Sir Henry Harrison—I said that generally it would be applied to such cases.] I understood him to give that as an instance in which the power would be exercised. Then he brought in support of this provision the extension of the privileges of local self-government. But the section before the Council confers no privileges on the Corporation as a representative body. If the section conferred this power only on the Commissioners in meeting, then the hon. member's argument only would be pertinent. If that concession is made, it may take off a good deal of the objections to this section.

The motion being put the Council divided:—

Ayes 4.	*Noes* 8.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mitter.	The Hon. Sir Alfred Croft.
The Hon. Moulvie Abdul Jubbar.	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	His Honour the President.

So the Motion was negatived.

The Hon. Babu Kali Nath Mitter moved that section 320 be omitted.

He said:—In addition to the reasons which I have mentioned against the retention of section 319 of the Bill, an additional ground of objection against this section is the system which prevails here of all the members of a joint family living together. The Commissioners, for instance, may say that three persons only should reside in a particular house, when as a fact five persons are living in it; and that being so, I submit that this section ought to be struck out.

The Hon. Dr. Gooroo Dass Banerjee said:—I shall support this amendment, and I have in fact given notice of a similar motion; and I ask permission to move also in connection with it that, in the event of this motion being lost, the words "let out" be substituted for the word "used" in line 3 of the first paragraph of the section. This I move as an alternative amendment.

I quite admit that this section has been inserted in the Bill for a very excellent object, but considering all things I feel bound emphatically to protest against the retention of this section in the Bill. As I submit, this interference by legislation with private rights of property is not only unnecessary and useless, but is positively mischievous. It will be observed that the scope of the section is not limited to the case of lodging-houses, or to cases where there is a conflict of interest, where it is the interest of the owner to let in as

many tenants as he can whilst their interest lies in the opposite direction, and where legislative interference may be thought necessary as a check on improper overcrowding. The section equally applies to houses occupied by their owners. But in those cases I submit self-interest is a sufficient protection. And if nevertheless houses occupied by their owners are found to be overcrowded, it is not because they do not know the disadvantages of overcrowding, but because they have not the means to avoid it. The section makes no provision for housing poor people who may be turned out of their houses under its operation. Is there any chapter of the Bill which enacts any workable system of poor law? When we cannot provide the real remedy, there is no good to interfere, because interference will only result in mischief, and people will be driven from bad to worse—from imperfect shelter to no shelter at all. Then there is another difficulty in the matter, even as regards those who are allowed to remain in the house after some inmates are turned out. Those who are Hindus will be placed under this disadvantage. Their law imposes on them the obligation of maintaining and providing accommodation for poor dependent members of the family, and the result will be that they will have to pay more for the maintenance and housing of those who have been turned out than when the whole of them were living together as a joint-family. Thus the little additional space which may be set free for the remaining inmates will have to be purchased at the cost of diminished means of living, for, *ex hypothesi*, the section will operate in this way only in the case of poor families. Then add to this the vexation, annoyance and irritation caused by the interference of the officers of the Municipality in carrying out the provisions of this section. I have only noticed some of the evils which will arise from the enforcement of this section. I do not think I have given any exaggerated picture at all, but should any hon. member think it to be exaggerated, I venture to say that, it is only because unfortunately for the majority of the natives his knowledge of them and of the conditions of their society is limited. I therefore earnestly beg of the Council not to allow this section to pass into law, for the simple reason that the remedy provided for it will prove infinitely worse than the disease.

The HON SIR HENRY HARRISON said:—This section speaks so clearly for itself, that I do not think it necessary to say anything more on the subject. The section is taken from the Bombay law, and the Bombay law is taken from the English law, and I cannot see why there should be anything so peculiar in Calcutta, that what is acknowledged everywhere else to be an excellent provision should be considered here to be so great a hardship. It is a provision which will be rarely worked, but should a case occur where overcrowding is carried on to such a great extent as actually to lead to the apprehension of an outbreak of any epidemic disease, it seems to me that the municipality is the proper authority to be invested with power of this nature.

The HON. BABU KALI NATH MITTER said in reply:—My hon. friend again brings in the Bombay law in support of the Bill, but he should remember that in Bombay there is no such thing as a joint-family, nor does such a system prevail in English towns, and it is idle to ignore a system which has taken deep root in this country. The system exists and legislation should be directed to existing conditions and not to the subversion of them. If the section is intended to apply to the overcrowding of houses let to tenants, such as lodging-houses, let that be made clear. [His Honour the President—It is so intended.] I am quite willing to leave the decision of the question to any lawyer, whether it is limited in its application to lodging-houses. The wording does not so restrict it, for the section runs thus:—

> "If it shall appear to the Commissioners that any building used as a dwelling-house is so overcrowded as to endanger the health of the *inmates* thereof, they may apply to a Magistrate to prevent such overcrowding, and the Magistrate may * * * * require the owner of the building * * * * to abate the overcrowding thereof by reducing the number of lodgers, tenants *or other inmates* of the said building."

The words "inmates" will include owners living in their own houses with their families. If the intention is to limit the operation of the section to lodging-houses, why is it worded so as to include persons living in their own houses?

His Honour the President said:—I never for a moment implied that the section could not be applied outside of lodging-houses, but I referred to the wording of the section that the Magistrate's order is to abate the overcrowding by reducing the number of lodgers, tenants, or inmates as giving the clear intention of the section. Both the native members who have addressed the Council have spoken of this section as if it was intended to apply to themselves and their friends and the middle classes of the native population. If the hon. members knew the history of this provision, and what is done under it in other places, they would not have spoken as they have done. It is intended to apply to what are called rabbit warrens and overcrowded lodging-houses, houses of ill-fame, and the like. If you adopt the Hon. Dr. Gooroo Dass Banerjee's amendment, and make the section apply only to houses let out to tenants, the owner may live in such a house himself and say it is not let out. You must have a larger section, although I quite admit that by an ingenious perversity the section may be brought to apply to the hon. members themselves. Suppose the Executive of the Corporation had no common sense and no fear of the Commissioners themselves before their eyes, and the Magistrate was equally devoid of common sense, then perhaps what the hon. members apprehend may happen. I do not mean to say that by an ingenious perversity that may not be done. By ingenious hypercriticism you can always find out extreme cases to which a law is not intended to apply, and in that way every law can be made to look ridiculous or incompatible with the welfare of some one in the country. But I cannot conceive, if the object and intention of the section are understood, that there should be any reasonable opposition to it. I cannot help thinking that the opposition is based on a misunderstanding of the real meaning and object of the section.

The Hon. Babu Kali Nath Mitter's motion to omit section 320 was put to the vote and negatived.

The Hon. Dr. Gooroo Dass Banerjee's motion to substitute "let out" for "use" in line 3 of the first paragraph of the same section was also put to the vote and negatived.

The consideration of the further clauses of the Bill was postponed till the next sitting of the Council.

The Council was adjourned to Saturday, the 28th April, 1888, at 11 A. M.

WILLIAM GRAHAM,
For Asst. Secy. to the Govt. of Bengal,
Legislative Department.

Calcutta;
The 10th May, 1888.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 and 25 Vic., Cap. 67.

THE Council met at the Council Chamber on Saturday, the 28th April, 1888, at 11 A.M.

Present:

The HON. SIR STEUART COLVIN BAYLEY, K.C.S.I., C.I.E., Lieutenant-Governor of Bengal, *presiding.*
The HON. G. C. PAUL, C.I.E., *Advocate-General.*
The HON. H. J. REYNOLDS, C.S.I.
The HON. C. P. L. MACAULAY, C.I.E.
The HON. T. T. ALLEN.
The HON. SIR HENRY HARRISON, KT.
The HON. SIR ALFRED CROFT, K.C.I.E.
The HON MOULVIE ABDUL JUBBAR.
The HON. BABU KALI NATH MITTER.
The HON. DR. MAHENDRA LAL SIRCAR, C.I.E.
The HON. C. H. MOORE.
The HON. DR. GOOROO DASS BANERJEE.
The HON. H. PRATT.

CALCUTTA AND SUBURBAN MUNICIPALITIES AMALGAMATION BILL.

The HON. SIR HENRY HARRISON moved that the clauses of the Bill to consolidate and amend the Law relating to the municipal affairs of the Town and Suburbs of Calcutta, as further amended, be further considered for settlement in the form recommended by the Select Committee.

The motion was put to the vote and carried.

The HON. BABU KALI NATH MITTER moved that section 324 be omitted.

He said:—This section has met with serious opposition from various quarters. The public memorialists have, I believe, taken serious exception to it, and the members of the British Indian Association have also done so, and on behalf of the Hindu community I also take exception to it The effect of a section of this sort may be—I do not for a moment say it will be—the removal of a Hindu from his place of abode to a hospital superintended by other than Hindus. It will certainly interfere with the religion of the sufferer, and I do not think it was ever intended that by the municipal law the religious feelings of persons should be wounded in the manner contemplated by this section. As regards future habitations in Calcutta, the Commissioners under this law will have ample powers, and it will be impossible for any habitation to be constructed which would be unfit for habitation. They can object to any proposed building on the ground of the want of ventilation or open spaces and the like, because ample provision has been made for regulating the construction of buildings, whether masonry or otherwise. That being so, the danger contemplated by this section is of the remotest character and is not likely to happen. Therefore, under these circumstances, it will be a mistake to alarm the people by introducing a section like this, which in most cases will remain a dead-letter, but which may in some cases, where people are not able to resist its operation, prove a great hardship. As far as well-to-do persons are concerned, the Commissioners will not be able to enforce the provision of this section: they can only be enforced in the case of poor persons who can ill afford to defend themselves. As I have pointed out, the Commissioners will have the fullest power to regulate the construction of buildings, and the chance of any such buildings existing in Calcutta will be as remote as one can conceive. I therefore move the omission of the section.

The Hon. Dr. Gooroo Dass Banerjee said:—I will support this motion as it is in fact also one of my own, and I ask leave to move as an alternative amendment that, in the event of this motion not being carried, the following proviso be added to the section:—"Provided that such person gives his consent to such removal." There is no doubt that the section has been framed for a most salutary purpose, but at the same time it seems clear that its enforcement, especially under the peculiar circumstances of this country, is likely to be attended with difficulty. In the case of one large section of the community,—the Hindus—of whom I venture to think I know something, its provisions will in many instances be attended with violence to their religious feelings. We all know of instances where an orthodox Hindu would rather die from want of medical treatment than go to a hospital. Considering all things, therefore, I submit that this section should either be omitted, or it should be modified in the way indicated in my alternative amendment. I do not say this from any perverse spirit of hypercriticism, as I myself have the strongest dislike for any such spirit. Nor do I think one need be driven to a spirit of perverse hypercriticism, seeing that this Bill has so many features affording ground for very fair adverse criticism, sufficient to satisfy the most active critical propensity. And if I raise my feeble opposition to this section it is because, in my humble opinion, I think active compulsory interference with private rights ought to be confined to cases of extreme necessity, and also because, from my limited experience of men and things, I think that interference of this nature is often likely to lead to more harm than good I therefore submit that if the Council is not prepared to omit this section altogether, at any rate they may allow it to be modified in the way I suggest.

The Hon. Sir Henry Harrison said:—I think the true object of this section has not been understood, because if it is modified in the way proposed, then, in the case of opposition on the part of the person affected with any such dangerous disease, the provision will be almost inoperative. The parallel provision in the Bombay law has been in force since 1872, and has been reproduced in the present Bill. Owing to opposition to this section in Select Committee, we introduced the words "male person," so as not to make the section apply to females, and then we confined its operation to persons who are "without proper lodging or accommodation." How can the control, which the Commissioners will have over the construction of buildings, have anything to do with the fact that persons who may come to work in Calcutta without their families may be so situated in the midst of other persons that their suffering from a dangerous epidemic disease will be extremely dangerous to other persons in the house and to the community at large? This power is always given in towns in England, and no objection has ever been taken to it. It is one of those cases in which the community at large is entitled to require the individual to sacrifice some portion of his rights for the public good Should any person be allowed to claim the privilege of becoming a focus of epidemic disease? All that the section does is to require his removal to hospital. In Select Committee there was a strong feeling that if we made this concession it would practically nullify its effect. That was the opinion of the Health Officer, who expressed himself extremely disappointed with the section as it stands It is a provision which would very rarely be put in force, and when it is put in force it will be in very urgent circumstances indeed. Conceive the case of a *dhobie* attacked with small-pox who remains in his house where others in his family are engaged in washing clothes. Can anything be more dangerous? Under these circumstances I think the section ought to stand, and that both the amendments ought to be rejected.

The Hon. Dr. Mahendra Lal Sircar said:—This section contemplates the case of only those persons who are without proper lodging or accommodation; therefore, I do not see what possible objection there is to it. As regards the amendment of my hon. friend Dr. Gooroo Dass Banerjee, a person suffering from a dangerous epidemic disease may be incapable of giving his consent by loss of mind, and therefore it will be impossible to get his consent. I think it much better that a person who is without proper lodging or accommodation should be taken care of and treated in hospital, than that he should remain

without proper care and treatment. I am sorry that, though a Hindu, I cannot support either of these amendments.

The Hon. Babu Kali Nath Mitter said in reply:—There is one portion of the argument of the hon member in charge of the bill, wherein he said he found it difficult to understand how the fact of the Commissioners having control over the construction of buildings had anything to do with this section, which I have not been able to follow. If houses and huts are so constructed as to afford proper accommodation and ventilation, there can be no house or hut in regard to which it can be said that it does not afford proper accommodation or lodging. The section does not provide that every person who is suffering from a dangerous epidemic or infectious disease shall be removed to hospital, but that only persons who are so suffering and are without proper lodging or accommodation. Therefore my argument that the Commissioners have control over the construction of buildings and huts is material to the point at issue. I regret that my hon. friend opposite, though a Hindu, does not see any objection to the provisions of this section. Probably it is so, owing to the profession to which he belongs, but in this respect I am positive that he does not represent the Hindu sentiment; but I and my hon. friend opposite (Dr. Gooroo Dass Banerjee do undertake to represent that sentiment. I will remind the hon. member in charge of the Bill that when this provision in its enlarged form was first introduced against my most strenuous opposition, he was pleased to say that the section would remain tentatively in the Bill, but if he found that the other Hindu members of the Council were opposed to it he would not insist on the section remaining. Since the Bill was referred back to the Select Committee, various representations from several public bodies had been received, and no doubt, having regard to those representations and to my objections, its operation was limited to the case of male persons, and the section was modified in other respects. That I freely admit; but at the same time I do not see any necessity for the section.

The Hon. Babu Kali Nath Mitter's motion being put, the Council divided:—

Ayes 2.	*Noes* 11.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Babu Kali Nath Mitter.	The Hon. C. H. Moore.
	The Hon Dr. Mahendra Lal Sircar.
	The Hon. Moulvie Abdul Jubbar.
	The Hon. Sir Alfred Croft.
	The Hon Sir Henry Harrison.
	The Hon T. T. Allen.
	The Hon. C. P. L Macaulay.
	The Hon H. J. Reynolds.
	The Hon. the Advocate-General
	His Honour the President

So the motion was negatived.

The Hon. Dr. Gooroo Dass Banerjee then, by leave, withdrew his amendment to add the following proviso to the section :—"Provided that such person gives his consent to such removal."

The Hon. Babu Kali Nath Mitter moved that section 325 be omitted.

He said:—This section provides for the cleansing or disinfecting of a building to prevent or check the spread of any dangerous disease. Probably ten years hence, when sanitary science is better understood by the people, a section like this may with propriety be introduced; the people will by that time have learned the principles of sanitary science; but at present a provision of this kind will be viewed with alarm, and the utility of it to my mind is extremely doubtful.

The Hon. Sir Henry Harrison said:—We have got within measurable distance of the time when, in the opinion of my hon. friend, a provision of this sort will be admissible: but I am inclined to hope that if the Council adopts it now, that period of time will be shortened a little, and that nine years hence no objection will be seen to it. I admit that all the provisions of this

section will be very slowly put into application. This is another section taken from the Bombay Bill. There it has been in force for the last sixteen years, and they do not wish to postpone it for another ten years. Should there be any place which, from want of cleansing or disinfection, might prove dangerous by the propagation of disease, there can be little doubt that a power of this kind should be left in the hands of the Corporation.

The Hon. Babu Kali Nath Mitter said in reply:—There is nothing in the section to indicate the circumstances the existence of which will constitute the danger. The Commissioners are simply to judge on the certificate of the Health Officer; and, knowing as we do the propensities of Health Officers, there will be great danger of the section being put into operation without real necessity.

The Hon. Dr. Mahendra Lal Sircar said:—To guard against the certificate of the Health Officer being given on the report of his subordinates, whose opinion may not always be perfectly correct, I will, with the permission of the Council, move as an amendment that the words "after personal inspection" be inserted after "Health Officer" in line 2 of the section. I do not see that there can be any objection to the addition of these words.

The Hon. Mr Macaulay said:—I really think we ought to assume that the Health Officer will not give his certificate without good grounds. He will not give it unless he is satisfied that the provision ought to be put in force in a particular case.

The Hon. Sir Henry Harrison said:—I have no particular objection to this amendment, but I feel, as my hon. friend Mr. Macaulay does, that the certificate of the Health Officer will only be given in cases in which he sees sufficient grounds. Suppose, for instance, that two leading practitioners in the town have visited the house of a person suffering from an infectious disease, and they report that the disinfection of the house is necessary to prevent the spread of the infection, the Health Officer may, under such circumstances, feel himself relieved from the necessity of inspecting the premises. Otherwise he would be bound to satisfy himself.

The Hon. the Advocate-General said:—The Health Officer will be the person responsible for the certificate, and it may be left to him to do what is proper.

The Hon. Dr. Mahendra Lal Sircar said in reply:—I would not have proposed this amendment had not I known that duties of this kind are often perfunctorily performed. I have no objection to add the words "or after receiving the certificate of two qualified medical officers."

His Honour the President said:—I cannot allow this further amendment without notice.

The Hon. Mr. Allen said:—I do not think the personal inspection of the Health Officer should be a necessary condition. Suppose ten persons in a house died from small-pox, and every one who goes into it takes the disease, will not such a state of things ascertained from his reports justify the Health Officer's certificate? What can personal inspection add to his knowledge? Disease germs are not visible to human eyes. The house is full of them: the angel of death is sitting in that house and strikes every one who enters. The Health Officer by going there may himself be struck, but otherwise personal inspection will tell him nothing. I consider therefore that no such restriction should be introduced into the section. The circumstances which come to the knowledge of the Health Officer in his ordinary report will be quite sufficient to enable him to determine whether or not he should give his certificate.

The Hon. Babu Kali Nath Mitter's motion to omit section 325 was put to the vote and negatived.

The Hon. Dr. Mahendra Lal Sircar's motion to insert the words "after personal inspection" in line 2 after the words "Health Officer," was also put to the vote and negatived.

The HON. BABU KALI NATH MITTER moved that, in line 1 of clause 2 of section 326, for the word "may" the word "shall" be substituted; and that all the words from "but" to the end of the section, be omitted.

He said:—The object of this amendment is to make it compulsory on the Commissioners to pay compensation for the destruction of a hut under this section. If a hut is destroyed for the public benefit, I think the public should pay for it. We are here dealing with hut-owners who are generally men of humble means. The destruction of his hut may be a serious matter to him, and if it is destroyed for the public benefit, compensation should be paid, and not be left optional with the Commissioners.

The HON. DR. GOOROO DASS BANERJEE said:—The amendment in my name in regard to this section is substantially the same, and is made for precisely the same reasons as my hon. friend has advanced. It is this—that for the second paragraph of section 326 the following be substituted:—

"The Commissioners shall pay compensation to any person sustaining substantial damage by the destruction of any hut."

The HON. SIR HENRY HARRISON said:—This is a reasonable suggestion, nevertheless I submit that on the whole the weight of argument is against it. The section is exactly the same as in the Bombay Bill, that compensation *may* be given if the Corporation thinks fit. Would it never happen that the loss sustained by the individual was due to his own laches, and that in such a case it would not be justifiable for the Commissioners to give compensation? The tribunal which is made the judge will be a most lenient tribunal: the remarks which have been made by the hon. movers of the amendment will show how lenient the tribunal would be, and the cases in which compensation would not be given would be exceptionally bad.

The HON. BABU KALI NATH MITTER's motion being put, the Council divided:—

Ayes 6.	*Noes 7.*
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr Mahendra Lal Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mitter.	The Hon Moulvie Abdul Jubbar.
The Hon. C. P. L. Macaulay.	The Hon. Sir Alfred Croft.
The Hon. the Advocate-General.	The Hon. Sir Henry Harrison.
His Hon. the President.	The Hon. T T. Allen.
	The Hon. H. J. Reynolds.

So the motion was negatived.

The HON. DR. GOOROO DASS BANERJEE's motion was then, by leave, withdrawn.

The HON. BABU KALI NATH MITTER moved that section 332 be omitted.

He said:—This section provides that no person shall let a building or part of a building in which a person has been suffering from cholera, small-pox, diphtheria or typhoid fever, without having first disinfected the building or part thereof, and every article therein likely to retain infection, to the satisfaction of the Commissioners; not simply the room in which the disease occurred, but the whole building or part of the building. There are some houses which are let out in flats: that flat is not to be let out, and the Commissioners are to be judges of what is likely to retain infection. The words are so large that anything can be brought within the wording of the section. As I understand the section, it means that the building or any part thereof or any article therein likely to retain infection is to be disinfected, and the judges of what is likely to retain infection are to be the Commissioners. There are no qualifying words except those mentioned in the section. As soon as there is a case of cholera in any building, it will be supposed that the building should be disinfected, as it would be likely to retain infection. That will be the way in which this section will be worked.

The HON. SIR HENRY HARRISON said:—I read the section in just the opposite way from that in which my hon. friend does. The section is borrowed from an English Act, and has been in force in Bombay since 1872. It is

intended to mean that if the danger lies in any part of the building, that part is not to be let; if in the whole building, the whole building is not to be let. It does not mean that if cholera has occurred in one wing of a building, you are not to let out the other wing. Let us take the converse case. Are we to say that a person is with his eyes open to be allowed to let out the portion of a building in which he knows that a person has suffered from cholera or small-pox? Is that the spirit in which sanitary legislation is to be carried on?

The HON. THE ADVOCATE-GENERAL said:—The intention of this section is very clear. I cannot understand objections of the sort which have been raised to this and other cognate sections. One would have thought that Hindu sentiment would be in favour of strengthening all the purposes of sanitation. We have on one side an outcry that the people labour under heavy taxation; but here there are small measures designed to improve the health of the town without any additional taxation, and yet a complaint is preferred. I must say that I can have no sympathy with such objections: they should be more thoroughly considered before they are brought forward.

The HON. DR GOOROO DASS BANERJEE said:—I am bound to say that Hindu sentiment is in favour of having a building, in which a person has suffered from an infectious disease, disinfected or purified in some manner or other before it is let out again for habitation.

The motion was put to the vote and negatived.

The HON. BABU KALI NATH MITTER moved the omission of section 336, which provided a penalty on the owner of any land who permits animals to be kept thereon for purposes of profit without a license

He said:—I may at once say that I do not seek to enlist the sympathy of the learned Advocate-General in its favour. I do not want to enlist the sympathy of any of my colleagues I move the amendments which I think I am bound to move, and if I am mistaken it is my misfortune. But it is wrong to suppose that I try to ask the sympathy of any hon. member. In regard to this section, suppose a landholder lets out five cottahs of land to a tenant. He does not know for what purpose the land is wanted. The tenant having taken the land for, say, six or eight months, what control has the landholder over the tenant as to the use to which the land will be put? If the tenant uses it in a way which is objectionable, the tenant is responsible. If he does not make a proper use of the land, and injury is caused to the neighbours, the tenant alone is to blame. How can the landholder, who has simply let out his land, remain responsible for animals being kept upon it in contravention of the law? The way in which this section was understood in Committee was that if it is brought to the notice of the landholder that his land is being used in a particular way, unless he puts a stop to it he would be considered to be so using the land. But it seems to me that the landholder would have no control as long as the tenant has a lease. If the landholder let his land for a certain specified purpose, that would be a different thing; but the purpose to which the land will be applied is never contemplated when the land is let. The person, having got a lease of the land, uses it as he thinks proper; if he puts the land to an improper use, he is responsible, and not the landholder.

The HON. SIR HENRY HARRISON said:—This is one of the alterations in the existing law of which the urgent necessity has been shown by six years' practical working. At present the owner lets out the land, and a *goalabaree* is built upon it. The tenant is prosecuted for keeping it in an absolutely filthy condition, and is fined in a sum ranging from annas 4 to Rs. 10; he pays the fine, but the *goalabaree* remains in the same condition, and then we have another prosecution. There is nothing more difficult in the municipal administration than the endeavour to keep these *goalabarees* in a proper condition. There are some hundreds of prosecutions instituted annually, resulting in conviction after conviction, and the sole endeavour of the offender is to pay the fine which he tries to get made as small as possible, and he then hopes that he will not be troubled again for three or four months. The only real remedy is to make the owner of the land responsible for the use to which his land is put. The object is to prevent a landholder from letting his land for a *goalabaree*

unless he is satisfied that the requirements of the law will be observed, and when he does so let his land, he should be held responsible if it is kept in a filthy condition.

The HON. THE ADVOCATE-GENERAL said:—I do not understand the discussion which has arisen on the construction of the word "permits" in this section. The contention is that if the owner lets his land to another person, he ought not to be made responsible for what the tenant does. The hon. member in charge of the Bill says it is in the power of the landlord always to turn out the tenant. If a man lets his land for a certain term, he cannot be said after that to permit; he has no power over the land or the tenant. If his tenant were a tenant-at-will, it would be different. A man cannot be said to permit the tenant to do something when he has no power to prevent him, and I do not think it is intended to apply to a case of that sort. But when the landlord has the power to turn the tenant out and he permits, he is responsible. I can see no possible objection to that. If the law requires that a license should be taken out for a place of this description, and the landlord knows the land is to be used for that purpose without a license, why should he be allowed to assist any person to act in contravention of the law? The whole scope of the objection is to allow people to escape from the consequences of acts for which they ought to be liable.

The HON. BABU KALI NATH MITTER said in reply:—If the view of the hon. and learned Advocate-General is correct—and I suppose it must be taken to be correct—then there is no objection to this section; but the meaning which was given to it in Select Committee was very different, viz., that if the matter is brought to the notice of the landholder, and he still allows the same state of things to continue, he would be responsible. That is how the matter was understood in Committee. But if that is not the meaning, but the permission must be actual permission, I will not press the amendment.

The motion was then, by leave, withdrawn.

The HON. SIR HENRY HARRISON moved that, in line 2 of section 348, for the words "unregistered place" the words "not registered under section two hundred and ninety-seven of Bengal Act IV of 1876" be substituted.

He said:—This is only a verbal alteration, and provides fully for the object of the section. The expression "unregistered place" is ambiguous.

The motion was put to the vote and carried.

The HON. SIR HENRY HARRISON moved that, in lines 2 and 3 of the second paragraph of section 349, for the words "or permits it to be used" the words "for any of the purposes mentioned in section three hundred and forty-six, or permits it to be so used" be substituted.

He said:—This is an amendment of a similar kind. The penalty clause provides that, whoever after the expiration of the time "uses such place or permits it to be used." This may be misunderstood. There is no objection to the place being used, but it is not to be used for one of the prohibited purposes, and the amendment is to make that clear and to prevent the possibility of misunderstanding.

The motion was put to the vote and carried.

The HON. BABU KALI NATH MITTER moved that clauses (*a*) to (*e*) of section 385 be omitted.

He said:—The clauses ran thus:

"(*a*) Any premises in such a state as to be a nuisance or injurious to health:

(*b*) Any tank, well, ditch, gutter, watercourse, privy, urinal, cesspool, or drain so foul or in such a state as to be a nuisance or injurious to health:

(*c*) Any animal so kept as to be a nuisance or injurious to health:

(*d*) Any accumulation or deposit which is a nuisance or injurious to health:

(*e*) Any house or part of a house so overcrowded as to be dangerous or injurious to the health of the inmates, whether or not members of the same family:"

This is what the members of the British Indian Association say on this section—

"Looking to the extreme disparity between the modern ideas of European sanitarians about domestic arrangements and those of the people of this country, the clauses (*a*) to (*e*) of this section cannot but prove an engine of oppression, or a dead-letter. They would

doubtless be beneficial to the Corporation by bringing in frequent fines under section 367; but they can do no good to the people at large. The clauses have been reproduced from an English Act, but they are totally unsuited for the condition of life in this city. Even in England it has not been possible to enforce them to the full extent. Take, for instance, the clause about overcrowding. The complaint in that respect has not yet been removed. In Calcutta it is impossible to remove it. When people congregate together in houses under circumstances which are *not* unavoidable, they may be well asked to disperse to prevent the air in the house becoming noxious; but when members of the same family are compelled under the force of circumstances to live together, and have not more airy and better ventilated quarters to go to, what are they *to do*? A poor man living in a hut with a wife and eight children may be quite inclined, against the ties of affection and in the interests of sanitation, to separate, but who will give him a second hut? Unless the Commissioners are prepared to provide free quarters in all such cases, it will be practically impossible to prevent overcrowding in houses under unavoidable circumstances. No amount of fine or imprisonment or the sale of goods and chattels can do any good. If fines could improve the condition of the poorer classes, their condition would not be bad. *In fact, the fine in the law appears to be a penalty for poverty.*"

The objection has been taken not in the interests of the rich, but of the poor in Calcutta; and considering that as regards overcrowding a section has already been passed which relates to lodging-houses, &c., clause (*e*) of this section does not appear to be necessary. Other sections have also been passed which will enable the Commissioners to go into houses to see whether they are kept in a clean state, and, if not so kept, to have them cleaned and to realise the cost; therefore if there be anything which is likely to be injurious to health, the Commissioners may remove the cause, and clause (*d*) is superfluous. As regards the keeping of animals, provision has also been made by other sections; clause (*c*) is therefore not required. Clause (*a*), to my mind, is meaningless; certain specific acts are treated as nuisances, but this is a general clause. Then again, as regards clause (*b*), privies, cess-pools and drains are under the control of the Commissioners. If a drain gets choked, the Commissioners are allowed not only to point out the defect to the owner, but to repair them then and there. Therefore the Commissioners have the fullest power in respect of all these matters without having recourse to a prosecution. I do not think that in cases in which the Commissioners have the power to take executive action and to recover the cost of works done, they should also be allowed to prosecute the parties and have them fined. On these grounds I move that clauses (*a*) to (*e*) of section 385 be omitted.

The HON. DR. GOOROO DASS BANERJEE said:—I beg to move that clause (*e*) of this section be omitted. My amendment covers much smaller ground than that of my hon. friend. The question in my amendment has to some extent been discussed in connection with section 320, and it will be unnecessary to repeat what I said then. In the course of that discussion Your Honour observed that much of the apprehension regarding hardship resulting from the operation of that section was ill-founded. But the language of clause (*e*) is different from that section, and it is made expressly applicable to the case of the overcrowding of a dwelling-house by members of the same family, and that is one reason why I submit, subject to correction, that my apprehensions are better founded in the present instance. In the next place, there is no reason why there should be a double provision. Section 320 will practically suffice to prevent overcrowding in cases where it may be necessary to exercise the power, and it is not necessary to have this clause as well.

The HON. MOULVIE ABDUL JUBBAR said:—I quite agree in all that has fallen from the hon. member who has just sat down, and I wish to add a few remarks in reference to clause (*e*). That clause, if passed into law, will neutralise the effect of that principle of charity in which we natives have been instructed from our infancy. We have been taught to be charitable to our relatives and friends, and to that principle it will not always be possible for us to attend, because under the provisions of this clause we may sometimes have to turn out of our house some of those who, under our religious obligations, or according to our social customs, we are bound to shelter and maintain. I do not know what the Hindu religion teaches its followers in regard to charity; but the Koran enjoins on every Mahomedan the duty of helping relatives, paupers and travellers, and no Mahomedan true to his faith can excuse himself from this duty on the plea which may be furnished by the

Municipal law. An individual family includes not only one's parents and children, but relatives and dependants; and I do not see how, consistently with their duty, these relatives can be turned out of doors. There are few native houses which one with ideas of foreign sanitary regulations will not declare to be overcrowded in the sense of the words used in this clause. I therefore respectfully but earnestly hope that Your Honour will not sanction undue interference with the social habits and household affairs of the native community.

The Hon. Mr. Macaulay said:—It is with great reluctance that I wish to ask the Council to oppose the views which have been put forward on behalf of one section of the community by the hon. member who has just spoken. I think it is necessary that if people understand that charity begins at home, they should equally understand that in municipalities charity does not end at home. It is all very well to be charitable and to receive into one's house a number of relations and dependants; but you must also regard the health of the public. In connection with this subject, I would ask the hon. movers of these amendments whether it is not the fact that the Council has received these amendments and considered them carefully, and has exhibited great patience in listening to the arguments which have been adduced in support of them; but now that we are coming to the end of the long string of amendments, we should have two considerations before our minds: the first is that sanitary laws exist, and that it is our object and desire that they should be adhered to, and that pleadings of a special class which are brought to bear against them cannot be considered as against the claims of the community at large. The next is that the ends and object of these sanitary measures is the good of the people: and that we leave the administration of these measures to the Corporation which represent the community. We assume that this agency will administer them better than any other. The spirit of sanitary legislation requires that neither the rich nor the poor should be allowed to interfere with their operation. Bearing these two considerations in mind, I think we may put aside these amendments and proceed to carry the Bill into law.

The Hon. the Advocate General said:—I wish to point out to the hon. members who have spoken on clause (*e*) of this section that I limit my remarks, to one point of view, viz., that there may be some hardship in making clause (*e*) applicable to places where there are members of the same family. There are houses which are overcrowded by wealthy people who are not members of the same family. There is, for instance, a class of people who come from Madras—wealthy people who work on a capital of three or four lakhs of rupees, but who nevertheless crowd together to the number of sixty or seventy in one house. These people should not be exempted from the operation of this section. If they crowd together and render a house unhealthy, the powers of the Municipality should extend over them; therefore the amendment to leave out this clause altogether is too large. But with regard to members of the same family, there is something in what has fallen from the hon. member opposite (Moulvie Abdul Jubbar), that poor people very often cannot help themselves. People come to their houses, and they are wholly without the means of turning them away or of giving them more accommodation. I would therefore suggest that some modification of clause (*e*) be made so as to exclude from its operation members of the same family.

The Hon. Mr. Allen said:—I regret I cannot agree with the Hon. Advocate-General, that because a number of people are members of the same family they are to be at liberty so to overcrowd a house as to render it dangerous and injurious to the health of their neighbours. It may be to the interest of the members of a family to take the risk of disease to themselves, but why should they be allowed to endanger the health of their neighbours? Birds when they overcrowd the nest are thrown out by the old birds, but the people of this country will not imitate nature. It is nonsense to say that they harm nobody but themselves: it is impossible they can overcrowd a house so as to render it dangerous to the health of the inmates and not affect their neighbours. The disease generated there must spread. There was never

a doubt that the fact of being a source of danger to one's neighbours constitutes a nuisance, but there might have been a doubt whether people who voluntarily live in a house overcrowded so as to be dangerous to themselves created a state of things which amounts to a nuisance, and therefore this section says it does. It should be remembered that it is the Commissioners who will have to abate nuisances, and no doubt they will deal tenderly with cases of overcrowding by members of the same family. The hon. member opposite (Moulvie Abdul Jubbar) urged strongly the obligations of charity. That is mean charity which will provide for its objects by overcrowding a house so as to make it dangerous and injurious to health. That is no true charity, but an attempt to combine economy with ostensible charity. If a person wishes to be really charitable, let him provide proper quarters for his relatives and friends, so that their health will not be endangered. What is the use of charity except to keep a man alive, and what is the use of keeping a man alive by means which afflict him with disease? Let them practice true charity, and then they will have no objection to this clause

The hon. member on my right (Dr. Gooroo Dass Banerjee) objects to this clause, because he says the same object is already provided for. If that is so, what is his objection to let the clause stand? A double-barrelled gun has a great advantage in shooting: one barrel may miss, and you kill with the other. I cannot see the force of his opposition to let a section stand which he says is already in the Bill. That objection might lie in the mouth of the hon. member in charge of the Bill, on the ground of symmetry.

The HON SIR HENRY HARRISON said:—As far as the objection on the ground of symmetry is concerned, I am bound to say that this will not meet the same cases as the other section. The special object of the insertion of these clauses here is that any person who may feel himself aggrieved may give information to the Commissioners. We have had many cases in which persons have complained of nuisances in neighbouring houses, and there has been no way to help the complainants We have had to tell them, if it is a nuisance you can institute a prosecution. But this section gives the Commissioners the power of themselves prosecuting. In the first instance a notice will be served, and if the person complies with the terms of the notice, well and good. If not, the matter will come before a Magistrate. That will be an easy, convenient, and just way of bringing to an issue the matter between the complainant and the person complained against.

The HON. BABU KALI NATH MITTER said:—I have failed to understand the distinction which the hon. member in charge of the Bill has tried to introduce between section 320 and this section, apart from the general question whether the persons overcrowding belong to the same family or not. The distinction is this, that under this section the power lies in the Commissioners on the complaint of any person. What does section 320 say? "If it shall appear to the Commissioners." That includes cases where information is sent to the Commissioners, and in pursuance of such information they come to the conclusion that the building is overcrowded. Therefore, as regards the two sections, apart from the question of the inmates being members of the same family, there is no distinction. I certainly understood when we were discussing section 320 that Your Honour pointed that out. You styled what we advanced in support of our contention as hypercriticism based on a misapprehension of the meaning of the section, and, if my memory serves me rightly, the hon. member in charge of the Bill also referred to that section as being only intended for the cases mentioned by Your Honour [Sir Henry Harrison—I said that is how the section would ordinarily work] The proceedings of the last meeting are not before us, but from the nature of the discussion the impression left on my mind was that, so far as the meaning of the section is concerned, it would apply to lodging-houses and places of that sort where overcrowding occurred. If that is so, then what the learned Advocate-General advanced is met by the existence of section 320 in the Act. He referred to a case which is precisely a case contemplated under section 320; therefore [illegible] section 320 exists, there is no necessity for clause (e) of section 385 [illegible] members of a joint family are intended to be included. If they are incl[illegible] [illegible]on undoubtedly this section [illegible] larger powers.

As regards the rest of the clauses, not a single argument has been advanced against my contention, and the case is left where it was when I moved my amendment. I said that in regard to most of those matters the Commissioners have the fullest power; they can put a stop to those nuisances at the expense of the owners; they can inspect; they can repair, and they can improve. And that being so, it is unnecessary to provide for prosecution in respect to those offences.

His Honour the President said:—As I have been personally appealed to, I should like to state, as far as I can recollect, that what I said on the subject of section 320 was that I did not doubt for an instant that the words of that section could be made to cover the case of a Hindu joint-family, but that if you look at the wording of what the Magistrate has to do (the wording of the declaration which the Magistrate has to make) it makes it perfectly clear that what is aimed at in the section is not the houses of Hindu families, but lodging-houses and such like. The order which he has to issue is an order to reduce the number of lodgers, tenants or other inmates, and I take it that the first two words would give the lines on which the order was to be based, and that the rest would be interpreted on the principle of *ejusdem generis*. I admit that they can be taken beyond, but I was giving my own interpretation of the section. So far as to that. It does seem to me that the ground covered by section 320 and the ground covered by clause (*e*) of section 385, which we are now discussing, is practically identical. On the whole I have some sympathy with the motion of the Hon. Dr. Gooroo Dass Banerjee in regard to clause (*e*), partly because the object, though not the method, is already provided very clearly and broadly by section 320, and because I think there is a good deal of force in the arguments which he has used, and which the Hon. Moulvie Abdul Jubbar has advanced on the part of the Mahomedan community, that to a great extent they cannot help themselves. But the reply to that really is that the Commissioners are the people who will exercise the authority which this section gives, and I think we may fairly trust to them to exercise it wisely and well. I am inclined to agree with what fell from the hon. member in charge of the Bill on another matter before the Council to-day—that the time when this section will really be brought into force is not yet; that they will come into force by very slow degrees; and I believe the value of these sections for present purposes—I am sorry to believe it—is more educational than practical. I hope that in time the Commissioners will work up to them, but I cannot expect they will be very strongly carried out. The learned Advocate-General threw out a suggestion to the hon. mover of the amendment to alter the section in a way in which the power of prosecution will not be altogether lost. Section 320 does not give power to prosecute, but only to get a declaratory order of a Magistrate. As he said, we want to retain some power to prosecute in cases where a deliberate nuisance is created by lodging-house keepers and people of that kind. If any form of words to cover that can be framed, I shall vote for him.

The Hon. Sir Alfred Croft said:—I would ask leave to move that the words "whether or not members of the same family" be omitted, so as to leave the clause general and in the same state as section 320.

The Hon. the Advocate-General said:—What I pointed out was that it would be hard to prosecute persons who cannot help themselves, for in such cases they would necessarily incur penalties they cannot avoid. I think that if section 320 is carefully read, it will be found not to apply to overcrowding by members of the same family. It deals with landlords and tenants. It requires the owner to abate the nuisance by reducing the number of lodgers or tenants, and the second clause of the section provides that where the owner has sublet the building, the landlord of the lodgers or tenants or other actual inmates shall be deemed to be the owner of the building.

The Hon. Babu Kali Nath Mitter's motion to omit clauses (*a*) to (*e*) of section 385 was put to the vote and negatived.

The Hon Dr. Gooroo Dass Banerjee's motion to omit clause (*e*) of section 385 was also put to the vote and negatived

The HON. SIR ALFRED CROFT'S motion that from clause (e) of section 385 the words "whether or not members of the same family" be omitted, was put to the vote and carried.

The HON. BABU KALI NATH MITTER moved that section 390 be omitted.

He said:—This section authorizes a Magistrate to declare a house unfit for human habitation and to prohibit it being used for such purpose. The section is almost precisely the same as section 319, and as that section has been passed, I do not see the use of enacting it again in section 390. It practically leaves everything to the discretion of the Magistrate. The only difference is that here it is included in the chapter of nuisances, and section 319 is in the chapter relating to inspection and sanitary regulation. I believe the confusion has arisen from one section having been borrowed from the English Act, and the other from the Bombay Bill. I believe that the Bombay Bill has been borrowed from the English Act.

The HON. SIR HENRY HARRISON said:—This section did not come in by accident We very carefully considered it in Select Committee, and we were within an ace of taking out one or the other, but it was eventually found that they are not identical. It is desirable to make out quite clearly that the Magistrate has similar power whether the complaint is made to him under the procedure of this section or under the chapter relating to sanitary inspection. The sections are not taken one from the Bombay Act and the other from the English Act, and therefore reduplicated. This nuisance section has, I think, been adopted on the suggestion of the Health Society; it is a judicial procedure, and therefore it is left to the discretion of the Magistrate. It gives the same power to the Magistrate whether the question comes up on this procedure or the other, and it also annexes a penalty. Anyhow I cannot see any objection to it.

The motion was put to the vote and negatived.

The HON. SIR HENRY HARRISON moved that, for section 418, the following be substituted:—

"Every prosecution under this Act may be instituted by the Commissioners before any Magistrate having jurisdiction, who may summon the person charged to appear at a time and place to be mentioned in the summons; and if such person do not appear, the Magistrate may, upon proof of service of the summons, if no sufficient cause shall be shown for the non-appearance of the person charged, proceed to hear and determine the case in his absence. If such person do appear, then the procedure laid down in the Code of Criminal Procedure of 1882 from section two hundred and forty-two to section two hundred and forty-eight shall be followed

"All fines imposed by a Magistrate under this Act shall be levied under the provisions of sections three hundred and eighty-six, three hundred and eighty-seven, three hundred and eighty-eight, and three hundred and eighty-nine of the said Code."

He said:—This constitutes in fact two amendments. The gentleman who conducts the criminal prosecutions of the Corporation pointed out the desirability of making it clear whether anybody can prosecute, or only the Commissioners. I do not think it is desirable that any person except the Commissioners should have power to inaugurate prosecutions under the Act. That is the object of the first amendment. The second amendment is to add the words in the second paragraph. It was suggested by the same authority, who pointed out that it is very desirable to make it clear how the fine is to be levied.

The motion was put to the vote and carried.

The HON. SIR HENRY HARRISON moved that, after the first paragraph of section 429, the following proviso be inserted:—

"Provided that, if the projection be a verandah supported by pillars or props resting on the public street, the Commissioners may, in lieu of a fee, charge an annual rent not exceeding Re 1 per square yard of the public street covered by such verandah, if a verandah of only one storey, or Rs. 1-8 per square yard, if a verandah of two or more storeys in height. It shall not be lawful to shut in the sides or front of such verandah so as to obstruct the air, whether with brick-work, wood-work, mats or any other materials."

He said:—I now come to an amendment to which I would ask the careful attention of the Council. I do not profess to say that it certainly ought to be adopted; but on the whole I think it is fair in the interests of the

public, and I ask the Council to consider it from the point of view of justice to the public and the individual. Section 429 authorizes the construction of verandahs and projections. Under that section the Commissioners are allowed to charge a fee not exceeding Rs. 100, which has been increased in this Bill to Rs. 500 to meet special cases. A very few years ago only overhanging verandahs were sanctioned. Subsequently some one asked for leave—I do not think the Great Eastern Hotel started it—to put up a verandah over the pathway with supports on the footpath. The Town Council were not entirely agreed whether this should be allowed or not, but eventually the argument prevailed that as such verandahs would give shelter to the public from sun and rain, leave should be granted subject to certain safeguards They are improvements of the finest possible description to the houses themselves, and having once given sanction we have now about twenty of these in the town. I will not say they are not advantageous to the town itself; but to the owners of the houses they are an enormous advantage, and they pay only one fee in all. It seems to me fair that when a person gets a very great advantage he should pay something commensurate for it; and therefore I think that when a verandah is built with props or supports on the street, the form of charge should be an annual rent instead of the payment of a single fee.

The HON. THE ADVOCATE-GENERAL said:—I oppose this amendment. I happen to know the circumstances out of which this question has arisen. I think the charge proposed will be exorbitant. These verandahs are admitted to be a benefit to the public, and yet the enhanced fee of from Rs. 100 to Rs. 500 will not satisfy the Municipal Commissioners! They want to levy an annual fee for what? For allowing the owners of houses to occupy a few inches or a few feet of ground on which pillars are placed, and they want to charge a rental on the whole of the area covered by the verandah. The area is not occupied by them, passengers pass underneath, and are sheltered from the sun and rain; the charge appears to me exorbitant. I am surprised to hear the hon. member in charge of the Bill say that it is a matter of justice: from my point of view it is a matter of injustice.

The HON. BABU KALI NATH MITTER said:—The Commissioners have nothing to do with this; my hon. friend brings this proposal forward at his own instance. I have to point out, in addition to the argument of my hon. friend, that it is an improvement and a benefit to the public; that the man not only pays a fee, but has to pay rates on an increased assessment of his property by way of a permanent charge. It was pointed out that a fee of Rs. 100 is a very small fee for all cases, and the Select Committee fixed Rs. 500 as a maximum. That should be ample for all purposes. We had no intimation from the hon. member that he was not satisfied with that, and that he would bring forward a further amendment. If he wanted to impose this additional charge, he should have informed the Select Committee of it. But apart from that, I shall oppose the amendment.

The HON. MR. REYNOLDS said:—I am not in favour of this amendment. Instead of putting obstructions in the way, there are many parts of the town in which the construction of such verandahs should be encouraged, as they afford both shelter and shade to the public. It would be a great benefit if the foot-paths in Government Place and Old Court House Street were covered with verandahs of this sort, so that people might walk from one end to the other in the shade under a colonnade such as exists in some parts of Bombay. There is a further objection to the form of the amendment If an annual rent is to be charged for the portion of the street covered by the verandah, it will practically encourage the person paying the rent to look upon that part of the street as a part which he is entitled to use as he pleases.

The HON. SIR HENRY HARRISON said in reply:—I do not look upon this amendment as a matter of much consequence, except that I believe it to be a principle of real injustice that the individual should get a very great advantage without paying adequately for it.

The motion was put to the vote and negatived.

The HON. SIR HENRY HARRISON moved that, in line 2 of the second paragraph of sec[illegible] for the words "are known to the Commissioners"

the words "are registered under section one hundred and twenty-eight" be substituted; and that, in line 2 of the third paragraph, for the words "not known" the words "not registered" be substituted.

He said:—It seems to me that this amendment not only makes the meaning more definite, but more fair. The section provides a mode of service when an owner is known to the Commissioners. What is to constitute knowledge? He may be known to one or two of the servants of the Corporation. Is the head of a department to go round and find out whether any department of the municipality knows the owner? On the other hand, there is a plain and direct means by which an owner can bring his residence to the knowledge of the Commissioners, viz., by registration. I think this amendment will be an improvement, and will also be just and equitable.

The Hon. Babu Kali Nath Mitter said:—There are many house-owners whose names are not registered, and yet they are well known to the Corporation, whereas the amendment proposes to say that if a man's name is not registered he is not to be considered to be known. One mode of knowing is by registration; another may be by actual experience.

The motion was put to the vote and carried.

The Hon. Sir Henry Harrison moved that, in line 9 of section 443, for the words "such of the owners as are known" the words "such of the owners as are registered under section one hundred and twenty-eight" be substituted.

The motion was put to the vote and carried.

The Hon. Sir Henry Harrison moved that, in lines 9 and 10 of section 453, for the words "Chapter VII shall have effect within the boundaries so declared" the words "the provisions of Chapter VII of this Act shall take effect one month after the publication of such notification" be substituted.

He said:—This amendment is suggested by the Secretary, who considers the wording a little ambiguous. It is well to say precisely when the provisions relating to water-supply shall take effect in the portions of the environs to which they may be extended by the Local Government.

The motion was put to the vote and carried.

The Hon. Babu Kali Nath Mitter moved that clause (*b*) of section 456 be omitted. The clause empowers the Local Government to include within Calcutta any local area in the vicinity of Calcutta.

He said:—This provision has been introduced at the instance of the Government of India. So far as the exclusion of any portion of the added area is concerned, if for any reason it is considered necessary to exclude it, I have no objection to give the Local Government the power conferred by clause (*a*). But to include, it may be, large tracts of land without consulting the Commissioners and without making adequate provision for funds for making improvements, will not be for the good of the town. I contend therefore that clause (*b*) of section 456 should be omitted.

His Honour the President said:—I need only say that this has been inserted under instructions from the Government of India, the object being to bring this Act into conformity with other Municipal Acts all over India and elsewhere; but it is a procedure which, speaking for myself, I should be very unwilling to utilise without the consent of the Commissioners.

The Hon. Sir Henry Harrison said:—In France and England this power is usually given to the Government only on the application of the Municipality concerned.

The Hon. the Advocate-General said:—I think this is a really objectionable power, and unless there is any imperative necessity for giving it, I submit that provision of this kind should not be made. I remember that the Indian Trusts Act contains a clause that the Local Government may from time to time extend it to any part of British India. Bombay would not have it, Calcutta would not have it, and it was made in the first instance to apply to Madras, Coorg, and other places where it would be of little or no use, power being reserved to the Local Government to extend it to the rest of India at some future time. Surely that is not a proper method of legislation.

Under clause (*b*) of section 456 of this Bill, the Government may include within the Municipality of Calcutta any area it chooses. Suppose the Government want to include within Calcutta any place outside the limits, such as Barranagore, Chitpore, or Cossipore, the inhabitants of these places cannot be heard. The mere presenting of a memorial is scarcely tantamount to a hearing.

The HON. DR. GOOROO DASS BANERJEE said :—I will also support this amendment, and for this reason : It is clear from the discussion of the question as to what the boundaries of the Municipality should be, that we included all that is and can be desirable to be included for some years to come. It will not be until full twenty years or more that anything like proper municipal management can be introduced in the area included, and further inclusion of additional area should, I submit, be left to future legislation.

The HON. SIR HENRY HARRISON said :—Having omitted to give notice, I ask leave to insert the words "at the request of the Commissioners in meeting" at the beginning of clause (*b*). Then if the Government wishes to add any local area without the request of the Commissioners, they must do it by legislation. This is in accordance with the practice in other civilised countries. In France the Government is not allowed to make alterations in the boundaries of cantons without legislation: in England the Government can only do it at the request of the Council of the borough.

The Hon. Babu Kali Nath Mitter's motion to omit clause (*b*) of section 456 being put, the Council divided :—

Ayes 4.	*Noes* 9.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. C. H. Moore.
The Hon. Babu Kali Nath Mitter.	The Hon. Moulvie Abdul Jubbar.
The Hon. the Advocate-General.	The Hon. Sir Alfred Croft.
	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	His Honour the President.

The Hon. Sir Henry Harrison's motion was put to the vote and carried.

The HON. SIR HENRY HARRISON moved that, in the last line of clause (*a*) of Schedule II, *Class* IV, after the word "merchandise" the words "every person not coming under *Class* III who purchases goods in Calcutta for transport and sale beyond the limits of Calcutta" be inserted.

This and the two following were mere verbal amendments.

The motions were put to the vote.

The HON. SIR HENRY HARRISON moved that, in clause (*a*) of *Class* V, for the words "every broker" the words "every broker or dalall" be substituted.

The motion was put to the vote and carried.

The HON. SIR HENRY HARRISON moved that, in clause (*a*) of *Class* VI, for the word "shop" the words "shop or place of business" be substituted; and that in clause (*b*) for the words "every dalall" the words "every petty dalal not included in *class V*" be substituted.

The motion was put to the vote and carried.

The HON. SIR HENRY HARRISON moved that the following be inserted as the first rule under *Class* VII :—

"The agent of a Joint-stock Company having an agency in Calcutta, but not registered therein, shall be liable to take out a license on behalf of such Company."

He said :—This is a question of principle which ought to be settled by the Council. There are many Joint-stock Companies which are not established in Calcutta, but have their agents here. Some of these agents take out licenses on behalf of the Companies for which they are agents, but others refuse on the ground that, being foreign Companies, they are not liable to take out licenses.

The HON. THE ADVOCATE-GENERAL said:—I do not think an amendment of this kind ought to be accepted at this late stage of the Bill without notice. These gentlemen pay the tax on their own account as agents; and I see no reason whatever to require them to take out licenses for the Companies established in Europe or America for which they act as agents.

The HON. MR. MOORE said:—There are in Calcutta a number of small agencies of Insurance Companies established and working elsewhere; most of them do little or no business here, and some of them have agents here only for the purpose of paying claims. It would be hard to tax such Companies.

The HON. SIR HENRY HARRISON said in reply:—My chief object is to get the point settled. The question is, should a Company which carries on business in Calcutta through an agent—and some of them carry on a large business—pay the tax or not? At present the point is unsettled. Of course the agent takes out his own license.

The HON. MR. ALLEN said:—I do not see why a Company should pay a tax in Calcutta merely because it has an agent here, any more than every ship which comes to this port should pay because its cargo is sold here.

The motion was put to the vote and negatived.

The following verbal amendments were put to the vote and carried on the motion of the Hon. Sir Henry Harrison:—that, in line 5 of rule 3 of *Class* VII, after the words "his own account" the words "or with other partners" be inserted; that, in line 5 of clause (*a*) of rule 7, the words "and is resident in Calcutta" be omitted.

The Hon. Sir Henry Harrison moved that, after clause (*d*) of rule 7, the following be inserted:—

"If a person is summoned for not taking out a license, and service of notice under clauses (*c*) and (*d*) is not proved, it shall be incumbent on the Commissioners to prove that the person summoned is liable to take out a license, as well as to prove the class under which he is liable."

He said:—Suppose service of the notice required under clauses (*c*) and (*d*) of rule 7 in Schedule II cannot be proved, the object of this amendment is that, in such cases, the Corporation must prove their case. Generally notices are served, and if the person fails to object, it becomes binding upon him, and upon service of notice being proved the matter is settled. But suppose he successfully denies receipt of the notice, then the onus must be thrown upon the Corporation?

The motion was put to the vote and carried.

The following verbal amendments were put to the vote and carried on the motion of the Hon. Sir Henry Harrison:—that, in clause (*e*) (2) of rule 7, after the words "to a Court of Small Causes" the words "having jurisdiction in the place in which the profession, trade or calling is said to be carried on" be inserted; also that, after clause (*f*) of rule 8, the following be inserted:—

"The Commissioners may, if they think fit, extend the period of an appeal under clause (1)."

The HON. SIR HENRY HARRISON moved that, at the end of Schedule III, the following be inserted:—

"The Local Government may, at any time, on the recommendation of the Commissioners in meeting, by a notification to be published in the *Calcutta Gazette*, alter the number of wards and the boundaries of any ward as prescribed in this schedule."

He said:—This is an amendment of some importance. It may be necessary sometimes to alter the boundaries of wards. There is no power in the existing law to make such alterations, but I think the power should exist.

The HON. BABU KALI NATH MITTER said:—If the number of wards is altered under this proposed power, what becomes of the proportion of elected Commissioners prescribed by the Bill? Under section 15 two Commissioners are to be elected for each ward; with 25 wards, therefore, there will be 50 elected Commissioners. But suppose the number of wards is reduced to 8, which is the number the hon. member in charge of the Bill prefers, then there would be

only 16 elected Commissioners to 25 nominated Commissioners. I have no objection to conferring the power to alter the boundaries of wards.

The motion was put to the vote and carried in the amended form proposed, viz., by omitting the words "the number of wards and."

The HON. SIR HENRY HARRISON moved that, at the end of Schedule IX, the following words be inserted:—

"Or any other scale which the Commissioners in meeting may from time to time prescribe."

He said:—This is an important amendment, and it revives the discussion which took place at a previous meeting. I was able to circulate only yesterday a note by Mr. Kimber, giving the result of his experiments, with a schedule of ferrules proposed by him. These experiments show that in some cases the mathematical formula gives an under-estimate of the quantity passing through the ferrules, but in very many cases the ferrule will not work up to it; there is something which prevents the proper working, such as the pipes being too small, or a number of bends, or a dead end, so that the water is backed or stopped; and Mr. Kimber comes to the conclusion in paragraph 10 (page 5) of his note that for practical purposes the co-efficient 13 should be reduced to 9; it gives four-thirteenths less draught as the average result all over the town, and the discharge of the ferrules should be reduced in the same proportion, viz., as 13 is to 9.

The question is, how should we deal with this? He gives a scale of ferrules which is one degree more liberal all the way up. He commences with houses valued at Re. 1 to Rs. 5, and the next in the scale from Rs. 5 to Rs. 10, and the result is that he proposes to give a slightly larger ferrule in all the grades. The question for the Council to determine is—first, will they take Mr. Kimber's scale as given in his note, or the scale in the schedule as it stands, or will they leave the scale to be fixed by the Commissioners in meeting, or by the Government on the recommendation of the Commissioners? I have adopted the suggestion that a scale should be laid down in the Act as a sort of indication to the Commissioners upon which they should act. It seems to me that, looking to the probabilities of error, it should be left to the Commissioners to fix the scale from time to time.

HIS HONOUR THE PRESIDENT said:—When this subject was discussed before an amendment of the Hon. Babu Kali Nath Mitter was under consideration. His amendment was to omit Schedule IX, and to leave the fixing of a scale of ferrules to the discretion of the Commissioners in meeting.

The HON. BABU KALI NATH MITTER said:—I have no objection to the amendment of the hon. member in charge of the Bill if the wording of section 155 is altered. I think the hon. member's amendment should be in the body of the Act, otherwise there will be a great deal of ambiguity. I think his amendment will practically leave the matter in the hands of the Commissioners, and a good deal of the time of the Council will be saved if we adopt his amendment.

The HON. THE ADVOCATE-GENERAL said:—If the schedule is amended in the way proposed by the hon. member in charge of the Bill, the wording of section 155 must be altered also. I think it will be preferable to have a scale in the schedule and to amend section 155 as proposed. But it appears to me that there should be some limitation on the discretion of the Commissioners, as, for instance, by making the approval of the Local Government necessary. This is my principal objection.

The HON. BABU KALI NATH MITTER said:—In that case I shall have to move my amendment.

The HON. MR. MACAULAY said:—In the Select Committee it was decided that we should recommend, as a compromise, to allow the Commissioners an exceptional power of altering the size of the ferrule to meet special cases, but that apart from that we should fix something beyond which the Commissioners should not go. If, however, any sliding scale is to be allowed at all, then I think it should be made subject to the approval of the Local Government, the Commissioners being left to recommend any alteration in it.

The Hon. Sir Henry Harrison said in reply:—The hon. member is quite right as to what was decided in Select Committee. But as this is a matter of much difficulty, and there being so many disturbing elements to be taken into consideration, I think the Executive should not avoid the obligation of satisfying the Commissioners. Mr. Kimber gives his opinion unhesitatingly that the present scale is too liberal; therefore, after indicating a scale, the Council ought to leave it to the Commissioners to vary it as occasion may arise.

His Honour the President said:—It seems to me from what the Hon. Mr. Macaulay has said, that the Select Committee decided that a scale should be fixed in the Act, but that the Commissioners should have power to escape from it in exceptional cases.

The Hon. Sir Henry Harrison said in reply:—The exception was to depend on proof that the ferrule would not give the exact supply; but beyond that the Commissioners, with the sanction of the Local Government, were to have the power to alter the general scale of ferrules.

The Hon. Mr. Macaulay said:—I am quite sure that there was no question whatever in Select Committee of the scale being altered with the approval of the Local Government.

His Honour the President said:—There is in Schedule IX a scale of ferrules and an improved scale has been prepared by Mr. Kimber. As the Bill stands the schedule will have to be enforced by the Commissioners, and they will not have the power of altering it. Originally the motion of the Hon. Babu Kali Nath Mitter was that the law should be altogether silent on the point, that it should fix no scale, and that it should be left to the Commissioners to fix any schedule they pleased. The compromise suggested by the hon. member in charge of the Bill to meet that is that the scale should remain in the schedule as an indication for the Commissioners, but that they should be at liberty to alter it from time to time on their own authority. And now it has been suggested that the Commissioners should only have power to alter the scale with the sanction of the Local Government.

The Hon. Dr. Gooroo Dass Banerjee asked whether it was proposed to retain the scale in the ninth schedule, or to adopt the scale suggested by Mr. Kimber?

The Hon. Dr. Mahendra Lal Sircar said:—The scale as it stands in the schedule is based on calculations which have been proved to be incorrect by the experiments made by Mr. Kimber himself. I would beg to observe that the formula given by the hon. member in charge of the Bill is not the formula given by the most recent authorities on the subject. I would rather have Mr. Kimber's scale of ferrules than the scale given in the Ninth Schedule. I move that the scale of ferrules given by Mr. Kimber in his note be substituted for Schedule IX.

The Hon. Babu Kali Nath Mitter's motion that, in lines 9 and 10 of section 155, the words "through a ferrule of the size indicated by the Commissioners in meeting" be substituted for the words "through a ferrule of the size indicated in the ninth schedule," was put to the vote and negatived.

The Hon. Sir Henry Harrison's motion that the words "or such other scale as the Commissioners in meeting may from time to time approve" be inserted after "ninth schedule" in line 10 of section 155, being put, the Council divided:—

Ayes 4.	*Noes* 9.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Babu Kali Nath Mitter.	The Hon. C. H. Moore.
The Hon. Sir Henry Harrison.	The Hon. Dr. Mahendra Lal Sircar.
His Honour the President.	The Hon. Moulvie Abdul Jubbar.
	The Hon. Sir Alfred Croft.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	The Hon. the Advocate-General.

The HON. MR MACAULAY's motion that the words "or such other scale as the Local Government may on the recommendation of the Commissioners in meeting approve" be inserted after "ninth schedule" in line 10 of section 155, was put to the vote and carried.

The HON. DR. MAHENDRA LAL SIRCAR's motion that the scale of ferrules given by Mr. Kimber in his note be substituted for the scale given in the ninth schedule, having been proposed for consideration,—

The HON. MR. REYNOLDS asked whether the adoption of Mr. Kimber's schedule would require the Commissioners to refuse all future applications for connections?

The HON. SIR HENRY HARRISON said:—It would certainly not have that effect.

The HON. DR. GOOROO DASS BANERJEE said:—I submit that the adoption of Mr. Kimber's scale amounts not to liberality, but only to the correction of an error. The scale given in Schedule IX is based on the supposition that 16 gallons a minute can be drawn from a ferrule half an inch in diameter, and that is obtained by adopting 13 as the co-efficient on the formula. But we have now the opinion of Mr. Kimber, who is an expert, and he says that for the figure 13 we ought to have taken the figure 9, so that we cannot have 16 gallons per minute from a half-inch ferrule. If the standard is found to be incorrect, it is but fair and just that we should alter our scale accordingly.

The HON. DR. MAHENDRA LAL SIRCAR said:—In making these calculations only the normal pressure has been taken without reference to the distance of the taps from the place of pressure, and that accounts for the difference between the calculations and the actual results of the experiments; therefore there is no question of liberality in Mr. Kimber's scale. If he went further he would find reason to reduce the co-efficient to a lower figure still.

The HON. SIR. HENRY HARRISON said:—Mr. Kimber himself took the same formula as he did. There are a number of other formulæ which entail elaborate calculations, but the one which has been taken is simple and sufficiently accurate for all practical purposes.

The HON. DR. MAHENDRA LAL SIRCAR's motion was put to the vote and carried.

The HON. SIR. HENRY HARRISON moved that, after section 459, the following new section be inserted:—

"460. The provisions of Schedule XIII shall apply to the budget for the year 1889-90, and to the rates and taxes which shall be levied during that year; and the provisions of Act IV (B.C.) of 1876, so far as they are inconsistent with the provisions of the said schedule, shall be repealed so far as they relate to preparing and passing such budget, and to fixing the rates and taxes to be levied during the year 1889-90."

He also moved that, after Schedule XII, the following new schedule be inserted:—

Thirteenth Schedule.

"1. The budget for 1889-90 shall show what expenditure it is proposed to incur in the Town, as well as in the area added to the Town by this Act during that year, and the manner in which it is proposed to meet such expenditure.

2. Such budget shall at a special general meeting of the Commissioners of the Town of Calcutta to be held in the month of February 1889 be referred to a Special Committee of eighteen members, of which twelve shall be chosen by the Commissioners of the Town of Calcutta at the special general meeting which shall order the reference, and six shall be chosen by the Commissioners of the Suburbs of Calcutta.

3. Such Committee shall meet at such times and places as the Chairman, subject to the decision of the Committee, may appoint, and shall, within twenty-one days of its appointment, return the budget to the Commissioners of the Town of Calcutta with such modifications and comments as may seem expedient.

4. The Commissioners of the Town of Calcutta shall, at a special general meeting to be held in the month of March, consider such budget as modified by the Special Committee, and pass it subject to such further modifications or additions as may be thought fit. The said Commissioners shall thereupon at the same meeting, or if such meeting be adjourned, at an adjourned meeting, fix, with reference to the budget as passed, the rates at which the

rates and taxes mentioned in this Act shall be imposed for the year commencing the 1st April 1889; and the rates and taxes so fixed shall have the same force in Calcutta for the year 1889-90 as if they had been fixed by the Commissioners in meeting for any subsequent year under section seventy-one of this Act."

He said:—This motion explains itself. The budget has to be prepared during the last two months of a year for the year succeeding. How is a valid budget to be passed which will apply to the enlarged area from 1st April next? Will a budget framed under the present Act be legal? I suggest that what I propose will be a legal and equitable solution. I have suggested that the Suburban Commissioners should have a voice on the Budget Committee, but I thought it would be too complicated to allow them also a voice at the meeting of the Commissioners which will discuss and pass the budget. If the Council thinks that should be done, I have no objection, but the fact is that the real work is done by the Budget Committee; the Commissioners in meeting generally accept the budget with one or two amendments: this year, which was an exceptional one, three amendments were made.

The HON. BABU KALI NATH MITTER said:—As the budget has to be framed before the 1st of April, it is necessary that some provision should be made for its preparation. So far as the Town Commissioners are concerned, I am sure there will be no objection to some of the Suburban Commissioners assisting in the passing of the budget.

The motions were put to the vote and carried.

The HON. SIR HENRY HARRISON said:—The Council has now to dispose of the definitions, and I shall be glad of a short delay to look through the Bill in order to see whether any alterations are needed to meet the modifications which have been made by the Council. I would also ask whether it will be possible at the same time, supposing it should appear that any sections require reconsideration, to bring forward any such proposals. It is obvious that any attempt to reconsider the whole Bill will be preposterous, but the preparation of a Bill of this kind is a very serious task, and no doubt there are a great many flaws in it; but if any such are found between this time and the passing of the Bill, I hope I shall be at liberty to bring forward the necessary amendments for their correction.

HIS HONOUR THE PRESIDENT said:—I quite recognise the fact that a Bill of this kind, after being amended in Council, requires careful revision from the draftsman's point of view, to see that the amendments which have been made are so worded as to amalgamate and fit in with the rest of the Bill; and that is not the kind of work that can be done in a day. And as the hon. member in charge of the Bill has pointed out, it will be well to take the opportunity of pointing out any errors that may exist and making suggestions for the correction of such errors. I propose that the Council be adjourned for this purpose for a fortnight; but for the work which the Hon. Mr. Macaulay has in hand I shall have to ask the Council to meet again on this day week.

The Council was adjourned to Saturday, the 5th May, 1888.

CALCUTTA,
The *May*, 1888.

WILLIAM GRAHAM,
for Asstt. Secretary to the Govt. of Bengal,
Legislative Department.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 and 25 Vic., Cap. 67.

THE Council met at the Council Chamber on Saturday, the 5th May, 1888, at 11 A.M.

Present:

The HON. SIR STEUART COLVIN BAYLEY, K.C.S.I., C.I.E., Lieutenant-Governor of Bengal, *presiding*.
The HON. G. C. PAUL, C.I.E., *Advocate-General.*
The HON. H. J. REYNOLDS, C.S.I.
The HON. C. P. L. MACAULAY, C.I.E.
The HON. T. T. ALLEN.
The HON. SIR HENRY HARRISON, KT.
The HON. SIR ALFRED CROFT, K.C.I.E.
The HON. BABU KALI NATH MITTER.
The HON. DR. GOOROO DASS BANERJEE.
The HON. H. PRATT.

BENGAL MUNICIPAL ACT, III of 1884, AMENDMENT BILL.

The HON. MR. MACAULAY presented the Report of the Select Committee on the Bill to amend the Bengal Municipal Act, III of 1884.

The HON. MR. MACAULAY said:—By inadvertence notice was not inserted in the list of business of my intention to move that the Report of the Select Committee be taken into consideration. I ask His Honour the President to grant me permission under Rule VII of the Rules for the conduct of business to make that motion now.

HIS HONOUR THE PRESIDENT having granted the necessary permission—

The HON MR. MACAULAY moved that the Report of the Select Committee be taken into consideration in order to the settlement of the clauses of the Bill.

The motion was put to the vote and carried.

The HON. DR GOOROO DASS BANERJEE said:—I ask permission to move an amendment, which is sufficiently indicated in the note I have appended to the Report of the Select Committee, viz., that at the end of section 2 of the Bill, the following words be added: "after making reasonable compensation to such municipality for any loss of income resulting from such exclusion." My reasons for moving this amendment are these. In the first place, the exclusion of lands or buildings from the limits of any municipality will not necessarily relieve such municipality of the burdens it has to bear on account of such lands or buildings. For instance, it will have to maintain in proper condition the drains necessary for the surface drainage of such lands or buildings. Then, again, it will have to maintain in proper condition the roads that are necessary only for the purposes of such lands or buildings. It is therefore, I submit, but fair that, when municipalities are not likely to be relieved of such burdens, some compensation should be made. In the next place, wherever there are Government buildings within the limits of a municipality, it is well known that the amount of income derivable from rates on such buildings is by no means inconsiderable; so that, if the exclusion of such lands or buildings be not compensated for by a reasonable sum paid to the municipality, it will suffer a sensible diminution in its income. And as we all know there is hardly any municipality in the mofussil the funds of which are more than sufficient to meet its expenses, the result of such exclusion will leave municipalities to which the operation of this Bill may be extended with funds insufficient for the necessary expenditure. That is a result which I am sure Your Honour's Government, which has always shown itself most anxious to promote the cause of local self-government, and the hon. member in charge of the Bill, who is justly considered one of the best friends of local self-government, will never desire. Nor is it the object of this Bill to exempt such lands or buildings from rates. The object of the Bill, as far as I understand it, is to prevent any unseemly and inconvenient collision arising between the municipal authorities and the Government departmental authorities in immediate charge of such buildings; and so far as that is concerned, it may be secured on payment of reasonable compensation. I there

fore respectfully submit, for the indulgent consideration of the Council, the amendment I have suggested.

The Hon. Mr. Macaulay said:—I regret I am unable to recommend the Council to accept this amendment. In the first place, I think my hon. friend has lost sight of a very important consideration. When I obtained leave to introduce the Bill, I stated that it was not intended that the Government should have the power of excluding civil buildings and lands generally from municipal taxation, but that it was intended to take power only in regard to the very exceptional cases of military and naval buildings. What possible application then can there be of the argument that mofussil municipalities generally will lose their incomes? The number of municipalities to which the Bill can apply is extremely small. In any case I should object to the form of the amendment. This would force Government to give compensation in every case without exception for loss of income. Now we all know perfectly well that if lands and buildings exist in a municipality, they are liable to certain rates; that if they are excluded, for however good a reason, there must be aloss to the municipality. I cannot conceive, however, that the Government should in every case be forced to make good the loss on account of rates on lands and buildings excluded. The third consideration—and I think it is one which will satisfy the Council—is that, in the case of buildings in the occupation of the State for military or for naval purposes, the taxation is paid by the Supreme Government. It is not within the province of this Council to dispose of Imperial funds. But I do not suppose that my hon. friend would expect the Local Government to pay the compensation out of Provincial funds.

The Hon. the Advocate-General said: The proposal seems to me to imply that the assessment on Government lands and buildings is an unfair assessment, and unduly made at a very much higher rate than those lands and buildings ought to be rated. It is suggested if there had been an equable assessment, there would have been no objection raised. Consequently the objection seems to me to resolve itself into this A municipality has obtained a large benefit by the accidental inclusion of that which ought to have been originally excluded. The mistake having been discovered, the Government should clearly be relieved by excluding such lands and buildings from municipal limits. The burden having been once cast on the Government, the argument that it should not be altered, except on payment of compensation, seems to me fallacious.

His Honour the President said:—I may just say one thing in regard to what has been touched upon by my hon. friend to the left (Mr. Macaulay), and that is, that the original proposal of the Government of India was to take power to exclude all buildings and lands in the occupation of the Government, of whatever kind, from municipal limits. How far that might have been justified on financial grounds, I am not in a position to say, because the letter of the Government of India does not discuss it. It was put on the ground that in all other Municipal Acts in the different provinces in India similar power is taken. But it was partly on account of the financial effects which might have followed to such exclusion that I requested the Government of India to confine their proposal to what seemed to me strictly unobjectionable and necessary, namely, to buildings which are in the possession of the Government for military or naval purposes. As to these, I do not think the question of compensation can very well arise. Certainly I do not think it arises in the particular instance which gave rise to the Bill. But if it were to arise, the question is one which I think had much better be dealt with by the Local Government than by a hard-and-fast law, because it certainly may be the case that there ought to be no compensation, and the amendment proposed leaves no possibility of avoiding payment in such a case. It assumes that compensation is to be given in every case. The other argument touched upon by my hon. friend, namely, that we have no power to deal with Imperial funds, is of course well understood by the Council, and I do think that, in order to remove Imperial buildings from the governance of municipalities—and I do not believe there are more than two in the whole province—it will be very hard that the Provincial funds should pay compensation.

The motion was put to the vote and negatived.

The Hon. Mr. Macaulay said:—Although the Council has adopted my motion and taken the Report of the Select Committee into consideration, and although under the Rules the Bill might at once be passed, I ask permission to postpone that motion till the next meeting of the Council.

The motion that the Bill be passed was accordingly postponed.

HOWRAH BRIDGE ACT, IX OF 1871, AMENDMENT BILL.

The Hon. Mr. Macaulay asked permission to make a representation to the Council on a subject not on the notice paper regarding the amendment of the Howrah Bridge Act. He said :—At the meeting before last, I obtained permission to introduce the Bill, and I proceeded in the ordinary course to prepare a Statement of the Objects and Reasons, and these were in course of circulation for consideration at the last meeting, when a telegram was received which intimated that the Government of India had certain objections to offer to the Bill. The circulation of the papers was accordingly stopped, and it was considered desirable, before placing the matter further before the Council, to await the letter of the Government of India, and to see what objections really were taken. That letter has just been received, but there has been no time to prepare an amended Statement of Objects and Reasons. The Government of India has taken objection to the third proposal in the Bill to make over from the surplus bridge funds two lakhs of rupees to assist the Calcutta Municipality in making a road from the bridge to the Sealdah Railway station. The Government of India object to this on two grounds—first, they do not think the Calcutta Municipality has any claim to a share in the surplus, which has been in the main contributed from the general funds of the East Indian Railway by the terminal charges on goods and passengers carried by them; but even if that were desirable, the Government of India are of opinion that it would be more prudent, in view of possible dangers which might arise from the temporary nature of the bridge, that the whole of the surplus should be added to the reserve fund. We must of course defer to the decision of the Government of India, and it is therefore necessary to bring in a Bill differently constructed. I think in the circumstances that it will conduce to the despatch of business if the Council will now receive the Bill as it has been prepared, with the Statement of Objects and Reasons, and refer it to a Select Committee, and leave it to the Select Committee to make the necessary alterations in accordance with the wishes of the Government of India. The reason why I press this on the Council is that, until the Local Government is invested with the necessary power, local tolls must go on being levied. The Howrah Bridge Act having made the levy of local tolls compulsory, the levy of such tolls must continue until an Act is passed and sanctioned by the Government of India. I therefore ask that the Bill be now read in Council.

His Honour the President said :—I have given permission to bring this matter before the Council, and will be guided by their opinions as to the action to be taken The position seems to be this—that the present Bridge Act as it stands does not permit the local tolls being taken off without fresh legislation. At the same time the Act declares that these tolls are to be in force until the requisite sum is accumulated. That sum has now been accumulated, and we are going on levying tolls, which, as my hon. friend explained, ought, to a certain extent at all events, to be taken off at once, and the sooner the better. For that reason, instead of postponing the reading of the Bill, I thought it necessary to bring the question before the Council; and what the Council will have to consider is, first, whether the Bill may be read now and referred to a Select Committee, and then whether the procedure suggested, namely, that the cutting out of the third section, which deals with the grant of two lakhs of rupees to the Calcutta Municipality for the purpose of constructing the new road, may be dealt with by the Select Committee. These are the points which the Council will have to consider. If any hon. members object to the proposed facilities being now given, that will be a point for consideration.

The motion was put to the vote and carried.

The Hon. Mr. Macaulay also moved that the Bill be referred to a Select Committee, consisting of the Hon. Mr. Reynolds, the Hon. Babu Kali Nath Mitter, the Hon. Mr. Piatt, and the Mover, with instructions to report upon it at the next sitting of the Council.

The motion was put to the vote and carried.

The Council was adjourned to Saturday, the 12th May, 1888.

Calcutta; } C. H. REILY,
The 15th May, 1888. } *Asstt. Secretary to the Govt. of Bengal, Legislative Department.*

REPORT OF THE CHEMICAL EXAMINER TO GOVERNMENT FOR 1887.

RESOLUTION.

MEDICAL.

Dated Calcutta, the 7th May 1888.

READ—

A letter from the Inspector-General of Civil Hospitals, No. 2596, dated the 3rd April 1888, forwarding the Report of the Chemical Examiner for the year 1887.

Read also—

The Report for 1886 and the Resolution recorded on it.

There has been some delay in the receipt of the report from the Inspector-General of Civil Hospitals, due to the fact that Dr. Warden, the Chemical Examiner, submitted it 25 days after it was due.

2. The number of analyses performed during the year under report was 2,402 against 2,286 in 1886. The following table shows the general nature of the work done during the year compared with that of the previous year:—

	1886.	1887.
Medico-legal—		
Human viscera tested for poison	266	233
Animal ditto ditto	157	119
Fowls ditto ditto	8	......
Substances suspected to be or to contain poison, including cattle-poison	634	594
Articles tested for blood stains	148	180
Ditto for seminal stains	37	54
Articles tested for purity and quality—		
Potable water	71	47
Petroleum and inflammable oils	103	212
Lime-juice	9	15
Opium, confiscated	55	119
„ from the Board of Revenue, Lower Provinces	4	4
Salt	8	9
Ghee	30	10
Spirit for deleterious adulterations	44	8
Spirit determinations for the Collector of Customs	104	139
Small Arms Ammunition Factory, Dum-Dum ...	400	402
Fort William Arsenal	23	22
Ishapore Gunpowder and Cossipore Shell Factories	10	3
Medical Store Department	14	14
Telegraph Store „	24	8
Commissariat „	38	96
Army Clothing „ Alipore	48	2
Other departments	51	112
Total ...	2,286	2,402

3. There was an increase of 116 cases in the number of analyses performed during the year under review. Twenty reports were also submitted on technical questions to departments under the Imperial and Bengal Governments. The increase in analytical work was mainly under the following heads: articles tested for blood and seminal stains, petroleum, opium confiscated, Commissariat and other departments. There was a diminution under other heads, namely, human and animal viscera tested for poison, suspected substances, potable water, ghee, spirit for deleterious adulteration, Telegraph Stores, and Army Clothing Department.

4. The number of medico-legal examinations was 1,180 against 1,250 in 1886 and 1,437 in 1885. Among these the most important were those of human viscera; in 14·6 per cent. of those examined arsenic and in 24 per cent. opium was detected while other poisons were found in 6 per cent. of the cases. Poison was thus detected, in 44·6 per cent. of the viscera against 42·48 per cent. in 1886. There is a decrease in the number of cases in which arsenic was detected, but the number for the last three years

(118) is very much larger than in any other similar period since 1875 From 1880-81 to 1882-83 only 72 such cases were discovered. The increase is probably largely due to the fact that during the last four years a far larger proportion of the *post-mortems* have been conducted by highly qualified officers than was formerly the case. In 1882-83 Hospital Assistants held 49 per cent. of *post-mortem* examinations against 3 4 per cent. in 1887; 201 substances suspected to be cattle-poisons were examined against 144 in 1886, and in 133 cases against 115 last year poisons were detected. 119 animal viscera were examined against 157 in 1886, and arsenic was detected in 76·9 per cent. of those examined against 75·79 in 1886. A large number of samples of petroleum were tested, and in every case satisfied the requirements of the Petroleum Act A very much smaller number (10) of samples of ghee were tested in 1887 than in 1886, and only in three cases were the samples found to be adulterated.

5. Dr. Warden has continued to investigate the properties of indigenous drugs, and has also succeeded in isolating from *Embelia ribes* an acid which appears to be its active principle.

6. Dr. Warden's report on the subject of experiments in connection with tube wells is awaited by the Lieutenant-Governor.

7. The thanks of the Lieutenant-Governor are due to Dr. Warden for his concise but full report, and for the good work he has done during the year. The Lieutenant-Governor also notices with satisfaction the high terms in which Dr. Warden speaks of the work done by Assistant Surgeon Taraprasana Ray and Baboo Ram Chandra Datta.

By order of the Lieutenant-Governor of Bengal,

J. WARE EDGAR,

Chief Secretary to the Government of Bengal.

RESOLUTION ON THE ANNUAL REPORT ON THE WORKING OF ACT I OF 1882, THE INLAND EMIGRATION ACT, IN THE DISTRICT OF CHITTAGONG DURING THE YEAR 1887.

GENERAL DEPARTMENT—INLAND EMIGRATION.

Calcutta, the 12th May 1888.

RESOLUTION.

READ—

Memorandum No. 339GM, dated the 3rd April 1888, from the Commissioner of the Chittagong Division, and enclosed reports from the Magistrate of Chittagong and the Deputy Commissioner of the Chittagong Hill Tracts, respectively, on the working of the Inland Emigration Act I of 1882 during the year 1887.

The most marked feature in the reports on the working of the Inland Emigration Act during the year 1887 is the great falling off in the number of labourers employed under its provisions. These amounted to 915 in 1884, they declined to 723 in 1885, to 717 in 1886, and have now been reduced to 433. The Commissioner has on previous occasions recommended the withdrawal of the Chittagong district and the Chittagong Hill Tracts from the operation of the Act, which has never been introduced in any other part of Bengal, and he now observes that the system is apparently dying a natural death. This is literally true of the Hill Tracts, where no labourers were employed under the Act during the year, and the observation applies in great measure to the district of Chittagong also. The result is gratifying, inasmuch as it is not connected with any decline in the tea industry, but indicates a disposition on the part of planters to rely upon kindness and fair treatment for retaining the services of their labourers rather than upon penal contracts. In the Resolution on the report for the year 1885 it was stated that in view of the falling off in the number of labourers it appeared that the time was approaching, but had not then arrived, when exceptional provisions for the execution of labour contracts would be unnecessary in Chittagong and in the Chittagong Hill Tracts. The further decline now reported affords a suitable opportunity for the reconsideration of the subject, and the Commissioner will be asked to report, after consulting those best qualified to advise, whether it is desirable to continue the operation in those districts of the clauses of the Act which are applicable only to "labour districts," as defined in the law.

2. The death-rate among contract coolies was favourable, only 1·82 per cent. against 2·39 in the previous year. It appears that the labourers in the gardens, those under the Act as well as others, are well provided for in respect of lodging, drinking-water, and medical attendance. There were 16 reported desertions; two of the deserters were punished under section 175 of the Act, most of the others being discharged with a warning at the request of their employers. The work of inspection appears to have been done thoroughly when gardens were visited, but in some cases no inspection was made, the number of contract labourers being so few. This illustrates the inconvenience of working the Act where the labourers under its provisions constitute a small minority among a large number of free coolies; the inspecting officer, who is the Joint-Magistrate of Chittagong, has either to spend much time to little purpose in travelling to gardens where there may be only two or three labourers under engagements, or to neglect a safeguard contemplated by the Act.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Government of Bengal.

AMENDED FORM OF RENT RECEIPT UNDER THE BENGAL TENANCY ACT, 1885.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 10th May 1888.

RESOLUTION.

READ—

A memorial, dated the 29th March, 1886, from Maharajah Sir Jotendro Mohan Tagore, on the subject of the particulars to be entered in the form of rent receipt prescribed by the Bengal Tenancy Act, 1885.

A letter to the Board of Revenue, No. 1120—456LR, dated the 31st March, 1886, communicating the instructions of Government on the above subject.

A letter from the Board of Revenue, No. 236B, dated the 29th February, 1888, supporting a proposal of the Collector of Backergunge that the words "particulars of the holding" should be omitted from the form of rent receipt.

THE form of receipt for rent introduced by the Bengal Tenancy Act contains in two places the phrase "particulars of the holding," as a general heading, against which no entries are to be made, its object being merely to introduce the subordinate headings as to area and rent. In the memorial quoted in the preamble, it was represented to Government by Maharajah Sir Jotendro Mohan Tagore that this was not understood by his tenants, who declined in many cases to pay rent unless their status as occupancy ryots, or ryots at a fixed rent, was entered in the receipt against the general heading specified above. The misunderstanding proved to be very general, and in many places it led to a suspension in the payment of rent. With a view to remove the misapprehension, the Board of Revenue, under the instructions of the Lieutenant-Governor, issued a Circular to Commissioners and Collectors in April, 1886, requesting them to explain to the public the true meaning of the law. The measure produced the immediate effect desired, and the complaints as to the withholding of rents on the ground that the position of the tenant was not specified in the receipts ceased for the time. But the Collector of Backergunge has reported that the ryots are still misled by the form of receipt, and the Board of Revenue recommend that, to remove all future doubt, it be amended by the omission of the words which have been misconstrued.

2. The Lieutenant-Governor approves this alteration, which does not in any way affect the meaning or substance of the receipts; and in exercise of the power conferred upon him by clause 3, section 56 of the Bengal Tenancy Act, he sanctions the accompanying modified form for general use. As considerable stocks of copies of the form as at present authorized probably exist, it is directed that the form now sanctioned shall be introduced from the commencement of the next agricultural year, that is to say, where the Bengali year prevails, from the first day of Bysack,* where the Fasli and Amli year prevails, from the first of Assin, and, where any other year prevails for agricultural purposes, from the commencement of that year.

* In April 1889.

ORDER.—Ordered that a copy of the foregoing Resolution be forwarded to the Board of Revenue for information and guidance, and for communication to the Commissioners of Divisions and District Officers.

Ordered also that this Resolution be published in the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Government of Bengal.

BENGAL TENANCY ACT, 1885.

FORM OF RECEIPT.

(LANDLORDS' PORTION.)

Serial number of receipt______

Estate______; village______; thana______

Tenant's name______, son of______

Area of holding ... { *Nukdi*, Bighas______ / *Baouli*, Bighas______ }

Rent of holding ... { Rupees______ / Maunds______ }

{ Julkur, Rs.______ / Bunkur ,, ______ / Phulkur ,, ______ }

Government cesses ... { Road cess, Rs.______ / Public works cess, Rs ______ }

Signature of the landlord or his authorised agent______

Section 55 of the Bengal Tenancy Act, 1885, provides as follows:—

(1) When a tenant makes a payment on account of rent, he may declare the year or the year and instalment to which he wishes the payment to be credited, and the payment shall be credited accordingly.

(2) If he does not make any such declaration, the payment may be credited to the account of such year and instalment as the landlord thinks fit.

BENGAL TENANCY ACT, 1885.

Government cesses ... { Road cess, Rs.______ / Public works cess, Rs. ______ }

5. Signature of the landlord or his authorised agent______

Section 55 of the Bengal Tenancy Act, 1885, provides as follows:—

(1) When a tenant makes a payment on account of rent, he may declare the year or the year and instalment to which he wishes the payment to be credited, and the payment shall be credited accordingly.

(2) If he does not make any such declaration, the payment may be credited to the account of such year and instalments as the landord thinks fit.

DISTRICT ROAD FUND.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

GENERAL—ROAD CESS.

Dated Calcutta, the 10th May 1888.

No. 1938R.C.

READ—

LETTER from the Accountant-General, Bengal, No. 47 L. F., dated 1st May 1888, submitting an abstract of the receipts and expenditure of the several District Road Committees in Bengal for the quarter ending the 31st December 1887.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees for the third quarter of the year 1887-88 be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette.*

Ordered also that a copy of this Resolution, and of the abstract referred to, be forwarded to the Commissioners of the Rajshahye, Bhagulpore, Chittagong, and Chota Nagpore Divisions; to the Superintending Engineers of the Eastern and Western Circles; and to the Financial Department of this Government, for information.

By order of the Lieutenant-Governor of Bengal,

W. B. BESTIC,
Under-Secy. to the Govt. of Bengal,
P. W. Dept.

E. T. ATKINSON,

Accountant-General, Bengal.

THE subjoined report is published for general information.

W. B. BESTIC,
Under-Secy. to the Govt. of Bengal,
P. W. Dept.

QUARTERLY INSPECTION OF THE KIDDERPORE DOCK WORKS.

FOURTH REPORT.

Dated Calcutta, the 7th May 1888.

From—T. H. WICKES, ESQ., and H. CLOETE, ESQ.,

To—The Secretary to the Government of Bengal, Public Works Department.

WE have the honour to report that, in accordance with the orders of the Government of Bengal, No. 415 Mne. of the 21st ultimo, we made the fourth quarterly inspection of the Kidderpore Docks on the 2nd instant.

2. The usual tabular statement and index plan showing the work done during the quarter, and the total amount executed from the commencement of the work, which have been prepared by the Superintending Engineer in charge of the Docks, are already with Government.

3. The state of the works on the 31st of March last was as follows:—

TEMPORARY WORKS AND PLANT.

The tramway along the bank of the Boat Canal, for connecting the Eastern Bengal Railway near Ballygunge with the docks and Akra brick-fields (which was referred to in our last report), was pushed on, but was not completed during the quarter under report.

PERMANENT WORKS.

Sixty feet lock.—The portion of the lock nearest the river was excavated to its full depth, and the masonry foundation was in hand; considerable progress was made with the middle portion which was commenced in the previous quarter; and the end nearest the tidal basin was also founded. During the quarter, 553,000 cubic feet of earth were removed, and 270,000 cubic feet of masonry built. Altogether more than half the earthwork and one-sixth of the masonry have been executed.

Tidal basin.—The foundations of the south-east and south-west corner of the tidal basin were successfully laid. Up to date 42 per cent. oft he quay walls have been founded; and more than one-third of the whole of the masonry and earthwork completed.

Dock No. 1.—About 1,096 running feet of quay wall were founded, and the masonry of the portions previously commenced were proceeded with; 1,015,000 cubic feet of masonry were built, and 1,115,000 cubic feet of earth moved; in all nearly two-thirds of the entire length of quay wall have been founded, and about half the masonry and one-third of the total amount of earthwork executed.

Boat canal.—The excavation for this work was proceeded with, and 7,922,000 cubic feet of earthwork executed during the quarter, making in all about 46 per cent. of the total amount.

Expenditure.—The total expenditure up to the end of the quarter was Rs. 84,69,241, of which Rs. 62,60,584 were for works and Rs. 22,08,657 for land.

SANITARY.

The health of the work-people continued satisfactory. The average number employed was 11,012, amongst whom 49 deaths, are reported to have occurred, being equivalent to a death, rate of 17·8 per thousand per annum.

GENERAL REMARKS.

We consider that the progress on the works which have been taken in hand has been extremely satisfactory; and that, so far as we could judge from a quarterly inspection, the arrangements were good and the quality of the work all that could be desired.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 12th May 1888.

	No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.		*Western Districts.*			
BURDWAN DIVN.	1	Burdwan May 12,	'88	0·43	Weather—exceedingly hot, with light winds from south-east. Ploughing and early rice and jute sowings in progress. Rain wanted. Prospects fair. Price of common rice 22½ seers per rupee.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*			
	Eastern Districts—concld.		
CHITTAGONG DIVN. 22	Chittagong May 15, '88	1·76	Weather—seasonable. *Pania aus* being sown. Prices unchanged.
23	Noakholly „ 11, '88	Nil	Weather—very hot. Sowing of *aus* continues. Prospects favourable.
24	Tipperah „ 10, '88	0·70	Weather—dry and seasonable; occasionally a storm, with more or less rain, comes up generally at night. Late heavy rain has done some harm to chillies and other crops, but weather has been fine since, and probably the damage will be found to have been slight. Agricultural operations are in full swing, and prospects are not unfavourable.
	Brahmanbariah ...	3·78	
	Chandpur ...	0·60	
25	Chittagong Hill Tracts. „ 8, '88	0·55	Weather—unsettled, but excessively hot throughout the week. Sowing in *jums* continues; seeds already sown are germinating. Planting of sugarcane now finished; shoots are appearing. Cutting of tobacco over.
	Hill Tipperah „ 9, '88	Nil	Weather—hot and stormy Early rice is being sown. *Jums* are being cultivated. Chillies are being gathered.
BEHAR.			
PATNA DIVN. 26	Patna May 12, '88	Nil	Weather—hot and close. *Rubbi* threshing and winnowing completed. Fields have been prepared for *cheena* sowings. Stock of food-grains sufficient. Prices stationary.
27	Gya „ 12, '88	Nil	Weather—very hot. Threshing of *rubbi* crops finished. Sugarcane being irrigated.
28	Shahabad „ 12, '88	Nil	Weather—exceedingly hot. East wind again prevails. *Cheena* and sugarcane are being irrigated and doing well.
29	Durbhunga „ 12, '88	Nil	Weather—hot. Fields are being prepared for *bhadoi* and paddy sowings. Prospects of early rice and *moong* are promising. Prices remain stationary.
30	Mozufferpur „ 12, '88	Nil	Weather—hot. Threshing of *rubbi* crops almost complete. Prospects of standing crops favourable. Lands being prepared for *bhadoi* sowings.
31	Sarun „ 12, '88	Nil	Weather—hot and sultry. Sugarcane, *cheena* and indigo doing well. Fields are under preparation for *bhadoi* and *aghani.*
32	Chumparun „ 12, '88	Nil	Weather—hot; easterly wind prevails. Sowing of *bhadoi* and *aghani* in progress. Prospects good Indigo coming on well.
BHAGULPORE DIVN. 33	Monghyr May 12, '88	0·02	Weather—very hot and occasionally cloudy. Lands are being prepared for *bhadoi* crops. More rain wanted.
34	Bhagulpur „ 12, '88	1·06	There was a short but severe storm with hail on 9th. Weather cooler since. Sowing of *bhadoi* crops is in progress in north. Mango crop further damaged. Indigo improving. Sugarcane doing well.
35	Purneah „ 12, '88	Nil	Weather—warm; cloudless still. All crops doing well. *Aghani* sowing in progress.
36	Maldah „ 12, '88	0·48	Weather—fine with occasional clouds. Harvesting of *boro* paddy continues. *Bhadoi* sowings going on. Some injury to *boro* crop by hail reported from thanas Shibgunge and Gomastapur. Other crops doing well, as there has been rain more or less throughout the district. Common rice selling at an average of 23 seers per rupee.
	Chanchal ..	0·07	
	Shibgunge ...	0·83	
37	Sonthal Perghs. „ 12, '88	0·84	Weather—hot. One sharp storm with wind and hail on the 7th. Rain in east, hardly any in south-west and north-west, none in Deoghar. Sugarcane and mangoes need rain badly on Deoghor side. *Borodhan* and indigo doing well in east. Ploughing begun.

ORISSA.			
ORISSA DIVN. 38	Cuttack May 11, '88	Nil	Weather—mornings and evenings cool; middays extremely hot. Rain much wanted for next crop throughout the district. *Dalua* rice being harvested. Common rice sells at 20 seers per rupee in town.
39	Pooree „ 10, '88	Nil	Weather—seasonable. Rain is urgently needed for sowing *sarad* crops. *Dalua* crop is still being harvested. Common rice, 23 seers 8 chittacks per rupee in the Sudder sub-division and 23 seers 14 chittacks in the Khoorda sub-division. The Sub-divisional Officer of Khoorda reports "tanks, springs, and wells drying up everywhere, and great inconvenience experienced in many places for want of water. Old and weakly cattle are dying for want of pasture and water."
40	Balasore „ 11, '88	0·14	Weather—hot. Rain much wanted. Ploughing and sowing of rice in progress.
CHOTA NAGPORE.			
	South-West Frontier Agency.		
CHOTA NAGPORE DIVN. 41	Hazaribagh, May 11, '88	Nil	Weather—hot and dry. Sugarcane doing well. Mango promising. Lands being prepared for coming crops. Prices of food-grains rising in several thanas.
42	Lohardugga „ 12, '88	0·41	Slight rain on the 8th Weather now very hot. More rain urgently wanted. No crops to report on.
43	Singbhoom „ 11, '88	0·32	Weather—rain has made it cooler, but it is still very muggy. No crops to report on. Land being ploughed and highland rice being sown in some places where rain has been sufficient.
44	Manbhoom „ 12, '88	0·92	Weather—hot, with east winds. Rain has done good, and fields are being prepared for cultivation. Sugarcane plants are beginning to sprout.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, lr lightning reflection, t thunder, ⌓ dew, < lightning.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF APRIL 1888.

THE month of April in Bengal is noticeable as being almost the hottest of the whole year, and it is usually characterised by steadily increasing temperature, with decreasing pressure, the decreasing pressure being brought about by a series of oscillations, in which the downward movement is greater than the upward. Hot weather storms or nor'-westers are generally rather frequent in this month. For some days before they occur the barometer falls steadily, and sometimes largely in Bengal, and probably over Northern India. The moist and fairly cool southerly or sea winds, blowing across the Bengal and Orissa coasts also increase in force. At the same time hot dry westerly and north-westerly winds blow steadily from Central India over a considerable part of the west and centre of the province, while moist easterly winds also blow down the Assam Valley. Bengal thus becomes a focus towards which these three wind systems, opposed in character and direction, converge, and it is apparently by their interaction that the usual hot weather storms are formed. At such periods pressure oscillates rather rapidly, and the changes at neighbouring stations are unequal, showing that the atmosphere is in a disturbed state, and more or less numerous thunderstorms with rain occur. Each storm is generally confined to a narrow area, and its existence is brief, and so far as is known they do not travel, as violent storms, more than about 30 or 40 miles. These storms form the only source of rain in Bengal during April. The rainfall brought by these storms is therefore very irregularly distributed; but, roughly speaking, the falls are greatest in the districts of East and North Bengal bordering on the Himalayas, and in the Assam and Arakan Hills, while the rainfall is least in the western districts generally, and in Behar and Central Bengal. Thus the normal rainfall in East and North Bengal varies from about two and-a half to three and-a-half inches; in South-West Bengal it is about two inches; in Orissa rather more than an inch, while in Behar and Chutia Nagpur it equals about half an inch.

Meteorology of the month.—The meteorological conditions of the first few days of April call for no remark, except that they were of normal hot weather character. A few rain showers occurred on the 3rd and 4th, due to small local storms in a few of the districts of Orissa, South-West Bengal and Chutia Nagpur, but they were of no practical importance. From the 4th up to the 7th again was a period of fairly normal conditions, but on the latter date nor'-westers occurred at about three stations in East Bengal

Dacca was one of the stations at which a nor'-wester occurred on the evening of the 7th April; but while the nor'-wester was in progress at about 7 o'clock in the evening, this station was visited by a most violent and fierce tornado, which caused great destruction of life and property. A detailed account of this noticeable storm has been prepared, and has been read before the Asiatic Society of Bengal at their meeting on May 2nd; the meteorological portion of the paper having been contributed by the Officiating Meteorological Reporter, and the actual account of the storm by Dr. Crombie, Civil Surgeon of Dacca. The paper in question will be shortly published in the Journal of the Society, so that it is only necessary at present to allude somewhat briefly to the storm.

The meteorological conditions of the province on the 6th, 7th and 8th of April, when discussed in detail, show that the three more or less opposed wind systems, such as have been previously referred to, were present in a pronounced form in Bengal. On the 6th an extremely dry and hot westerly wind was blowing over the western, central, and part of the northern districts of the province. Strong, very moist and comparatively cool southerly winds were blowing across the Bengal coast, being partly converted by interaction with the westerly winds into a south-westerly current, while a cool moist easterly wind was blowing down the Assam Valley. On this day also there was an extremely feeble low-pressure area existing over parts of Western Bengal and Chutia Nagpur, and which was travelling in a north-easterly direction. On the 7th, a large increase in the area occupied by the moist southerly winds was noticed, and it is clear that a considerable increase must have taken place in their strength, or a corresponding decrease in the strength of the dry westerly winds, though the former is more probably the case. On this day also the feeble area of low pressure had moved in a north-easterly direction, and was in Central Bengal. The advance of the moist southerly winds was, however, very temporary; and by the morning of the 8th they had been driven back even further than they had advanced on the 7th, and hot dry westerly winds obtained over a very large part of the province. The low-pressure area on this day had again advanced in a north-easterly direction, and was in North Bengal. There must have been, therefore, on the 7th April a very large amount of interaction going on between these two opposing wind systems, each apparently struggling to force back the other, until the cool moist current, which had up to the morning of the 7th rapidly advanced, was still more rapidly and completely forced backed by the hot dry westerly wind.

The conditions, therefore, which existed in Central and North Bengal on the day of the formation of the Dacca tornado, were a large amount of interaction, which was probably both rapid and rather violent, between two wind systems blowing in different directions, and totally opposed in characters of temperature and humidity; second, violent contrasts of temperature and humidity at neighbouring stations of the same area; and third, the passage of a feeble area of low pressure through the province in a north-easterly direction. It was to the south-east of the line of advance of the feeble low-pressure area, and to the south,

east of the violent contrasts of temperature and humidity, that the tornado was formed. It may here be remarked that in the United States it has been found conditions such as have been above described almost invariably precede or accompany the formation of tornadoes. A peculiarity in the case of the Dacca tornado appears to be that it visited that station while an actual nor'-wester was in progress, and this would, perhaps, tend to show that the meteorological conditions in Bengal, which are usually only followed by ordinary nor'-westers, may, with the addition of some other cause or causes of which at present nothing is known, and which may perhaps be more or less of an accidental nature, also produce tornadoes; but if such is the case it is fortunate for Bengal that the necessary combination of circumstances is rare, and does not occur more than once in about five or ten years.

The following is a very brief abstract of the excellent and exhaustive account of the Dacca tornado, which has been prepared by Dr. Crombie, and which will shortly be published, as before stated, by the Asiatic Society of Bengal:—

Dr. Crombie first discusses the action which a storm, with winds gyrating in direction opposite to the hands of a watch, would have on obstacles in its path, and proves that the storm in question was a tornado, with winds rotating from right to left (e g., against the hands of a watch) by taking up its action in one part of its course on the Buckland Bund close to the Nawab's palace, and shows also how, by the position of the objects thrown down, the precise track of the centre of the storm can be proved. It appears the tornado began its destructive course soon after seven in the evening of the 7th of April at the extreme west end of the municipal limits of Dacca. The first clear signs of the rotating nature of the tempest occur in an orchard to the north-east of Fakrnika masjeed, where there is a clump of plantain trees thrown down and twisted in all directions, and even in its first manifestations it is clear that the storm was of great violence. The vortex commenced to travel in a south-easterly direction between the old river bed and the road running parallel to it, destroying every *kutcha* hut in this portion of Dacca. In its passage eastward it gradually edged more and more towards the old river bed, and when it was opposite the Elephant Ghât the vortex was actually in the bed of the river, and it appeared as if it would have moved in the direction of least resistance, and would pass out into the open maidan, lying to the south of Nawabgunge. Suddenly, however, the vortex moved to the north, and was met with winds of hurricane force, apparently quite separate from the true tornado, and blowing from the north, the track of which was not more than 60 paces across, and which were very local. Having advanced a short distance in a north-easterly direction, it again turned towards the south-east. Up to this time the tornado does not seem to have had power to destroy *pucca* masonry buildings, though it had destroyed very numerous huts, trees, &c. It, however, here passed into the maidan to the south of Lalbagh, and on being freed from such obstacles as buildings, &c., it seems rapidly to have accumulated additional force, and from this point it was able to destroy even the strongest houses. From Lalbagh the vortex passed into the river, gradually crossing to the opposite bank, where it almost ground to powder a newly-built masonry house. It was then approaching a village called Subadiya, and at this time the part of Dacca on the north bank of the Buriganga seemed safe, and Subadiya doomed; but when crossing an open maidan, it appears to have encountered a strong current of air blowing up from the south, when it abruptly altered its direction, wheeled nearly at a right angle to the north, and travelled in a north-easterly direction back to Dacca, when the largest amount of damage was done, masonry houses, part of the Nawab's palace, &c., being demolished, and everything in the track being destroyed, until the storm reached the Sankari bazar, where it more or less suddenly rose from the ground, and passed high into the air. In no part of its course did the breadth of the tornado exceed 200 paces, and at the part where it did most damage it was only 180 paces broad. It travelled altogether over three and-a-half miles, and its rate of progress was according to different estimates from 20 to 12 miles an hour. The lateral force of the wind as above stated was enormous, and the uprush attending it must have been equally strong, as in some cases, after the walls of houses had been blown out, large beams were actually kept from falling for distinct periods by this violent uprush of air. The shape of the tornado cloud appears to have been something like a top; it was accompanied by a distinct rumbling sound, and considerable electrical disturbance seems to have accompanied it, and the cloud appears to have been more or less illuminated. The storm caused 118 deaths, while 1,200 persons were somewhat severely wounded, and about seven lakhs worth of property was destroyed.

After the occurrence of this storm ordinary hot weather conditions again obtained over the province for some time Dry westerly winds prevailed over the greater part of Bengal, and these had a more or less northerly element in them at the northern stations, while they were south-westerly at the southern stations. Temperature was unusually high, while pressure was low, and there were very few local storms or nor'-westers reported, so that rain was practically absent from the province. These conditions remained unaltered, except for the usual oscillations of pressure and temperature, and slight changes in the wind directions, up till Tuesday, the 17th, and on the morning of Wednesday, the 18th, the meteorological observations taken at the eastern stations showed that a decided change was taking place, for at all the stations on the Arakan and Burma coasts, and at the stations in North and partly in East Bengal, an easterly wind current set in, attended at some of these stations also with an unusually rapid rise of pressure. This easterly wind current then gradually forced its way across Bengal; and by the 20th more or less easterly winds were reported over the greater part of the province. The interaction between the two opposing

wind systems at once caused the weather conditions to become disturbed over the province, and thus nor'-westers with rain occurred, and with the extension of the interaction, the area affected by the disturbed conditions gradually enlarged. Thus in East Bengal, from the 17th and 18th, local storms occurred frequently, in North Bengal the disturbance commenced on the 19th, and South-West Bengal received showers on the 20th. Similar conditions have obtained almost uninterruptedly till the close of the month; a very moist easterly wind current has prevailed over the greater part of the province, and has even penetrated over the greater part of Behar, though westerly and south-westerly winds have been still blowing generally in Chutia Nagpur and Orissa and at the neighbouring stations of South-West Bengal. Consequently weather conditions have remained decidedly disturbed in Bengal, and local storms with rain have been extremely frequent. The districts of Pooree and Cuttack in Orissa, and all the districts of South Behar and Chutia Nagpur, except Sonthal Pergunnahs and Manbhoom, have, however, been comparatively free from these storms, and rainfall in these district has been scanty, but in the districts of East and North Bengal these storms have been very numerous, and the rainfall brought by them has been heavy. Some of these storms have been exceptionally severe; and notice has been received that in the Hooghly district, on the evening of April the 23rd, the small town of Bhudressur, which is close to Serampore, or only 16 or 17 miles north of Calcutta, was visited by a small but severe tornado, which lasted from about three to six minutes. Mr. Duke, the Sub-divisional Officer, Serampore, writes that the storm entered the south-eastern part of the town from the river about 8 o'clock in the evening. At first the direction of the track was north-west by north, and having travelled about 1½ miles, finally left north-east about the northern part of Bhudressur, disappearing in the river as it had come. The breadth of the course was about 200 to 300 yards on land from the shore, and the centre and point of greatest violence about the line of the riverbank near the gunge. The winds rotated from right to left, and the tornado was preceded by a booming sound. Much damage was done and large boats were lifted out of the water and thrown over the banks, and in one case a dinghi had been blown up on to a tree which had first been partially blown down. Seven persons are known to have been killed and three are missing, while a considerable number have been injured.

The month of April may therefore be divided into two periods: for the first sixteen or seventeen days ordinary hot weather conditions and comparative absence of local storms prevailed, while from the 17th to the end of the month local storms with rain were common in all districts except in the Pooree and Cuttack districts in Orissa, in the Chumparun and Sarun districts of North Behar, in the Shahabad, Gya, Patna and Monghyr districts of South Behar, and in the Hazaribagh, and Lohardugga districts, and in the greater part of the Singbhoom districts of Chutia Nagpur.

Pressure.—For the first week of April pressure was decidedly low, and was on the average about 0·045 inch below the normal. This defect was rather increased during the second week, when it equalled 0·067 inch, and for the greater part of the third week also pressure continued very low, the defect equalling nearly the same amount as in the second week. With the setting in of the disturbed conditions, however, pressure generally rose, and for the remainder of the month it became above the normal, the mean pressure of the fourth week showing an excess of 0·012 inch. Taking into consideration only those stations which have sent in observations for a long series of years, and which therefore yield reliable averages, the mean pressure for the whole of Bengal for April was 0·042 inch in defect of the normal. This defect has been fairly equally distributed, though it has been actually greatest at the western and smallest at the eastern stations. Thus at Calcutta the defect has been 0·056 inch, at Burdwan 0·051 inch, and at Gya 0·07 inch, while at Dacca it has been 0·031 inch, and at Purneah 0·033 inch. In Assam also the defective pressure has been rather smaller than in Bengal, and it has only equalled 0·036 inch.

Temperature.—The month of April may be fairly sharply divided into two periods, during the first of which, or up to about 18th or 20th, temperature was exceptionally high, while for the remainder of the month, during which period storms with rain were numerous, temperature was decidedly low. The general mean temperature of Bengal for the first and second weeks of April was about 2° above the normal, while in the third week the excess had risen to 2·2°. The excess temperatures were, however, during this period mainly confined to the west of the province, the western districts sometimes showing temperatures five degrees above the normal. During the fourth week temperature had fallen so rapidly that it was 3·5° below the normal, and the defect was particularly large in North Bengal, where it amounted to 6·9°, and in East Bengal and North Behar, where it amounted to from 5° to 6°. At Rampore Beauleah in this week the mean temperature was no less than 10·2° below the normal, and at Berhampore 9° below it. The mean temperature of the whole of Bengal for the month has therefore been 0·6° in excess of the normal. The excess has been to a great extent confined to the west of the province, and thus Chutia Nagpur shows an excess of 2·6°, North Behar one of 1·1°, South Behar one of 0·9°, and South-West Bengal an excess of 0·6°. In East Bengal temperature has been in defect by 0·7°, and in North Bengal by 1·1°, while in Assam temperature has been in defect by 1·2°.

The following table will show clearly the general variation of the temperature from the normal in different districts of the province week by week for the month, the figures showing the actual temperature variations at nine typical stations :—

Monthly variation table from the weekly comparison table during the month of April 1888.

Some very high maximum temperatures have been recorded in Bengal during April, principally during the first half.

The following will show some of the highest temperatures registered in the various meteorological divisions :—

In Orissa, Cuttack, on the 19th	...	...	... 110·4°
„ South-West Bengal, Midnapur, on the 18th	...	...	... 112·4°
„ ditto, Bankoorah, „ 18th	...	...	... 110·6°
„ ditto, Ranigunge, „ 18th	...	...	... 110·5°
„ East Bengal, Furreedpur, „ 15th	...	...	... 100·5°
„ North Bengal, Bogra, „ 8th	...	...	... 106·5°
„ North Behar, Purneah, „ 15th	...	...	... 104·3°
„ South Behar, Dehree, „ 18th	...	...	... 110·0°
„ Chutia Nagpur, Chyebassa, „ 19th	...	...	... 111·6°
„ Assam, Dhubri, „ 8th	...	...	... 99·4°

Humidity —The humidities which were registered during the early part of April over a considerable part of the province were extraordinarily low. The following figures represent the percentage amount of saturation of the air with moisture at 10 A.M. on the respective dates, one hundred equalling complete saturation :—

Ranigunge	on the 9th	...	...	...	7 per cent.

Bhagulpur	„ 8th	...	...	...	6 „ „
Hazaribagh	„ 8th	...	...	...	4 „ „
Ditto	„ 9th	...	...	...	5 „ „

Rainfall.—The periods at which rainfall has occurred during the month have already been described, and it therefore only remains to state its amount and distribution. The falls have been heaviest in East Bengal, which has received an average amount of between eight and nine inches, or considerably more than double the normal fall In North Bengal the falls have averaged a little more than four inches, which is again nearly twice the usual fall. North Behar has recorded an average fall of about two and-a-half inches, which is more than three times the quantity which usually falls in April, and South-West Bengal has received an average fall of about three inches, which is about half as much again as the normal. In the other districts the falls have been considerably below the normal. In Orissa an average fall of a little more than half an inch has been registered, which is about half the usual April fall ; in South Behar about three-tenths of an inch of rain has fallen, or about three-fourths of the usual amount, while finally in Chutia Nagpur the fall only equals a tenth of an inch, or less than a quarter of the normal fall for April.

Taking up the distribution of the rainfall a little more in detail, the following are some of the districts in which the falls during April have been considerably below the normal amounts for the month. In Orissa, Pooree, and Cuttack districts ; in South-West Bengal, the Burdwan district only has received a somewhat defective fall ; in East Bengal, all districts have received good falls ; in North Bengal, the Maldah district has received a rather defective fall ; in North Behar, rainfall has been above the normal in all districts ; in South Behar, Shahabad has received an exceedingly small fall, averaging 0 07 inch, while the Gya district has received none at all, and the Patna district practically none ; and finally all the districts in Chutia Nagpur show largely defective falls.

The rainfall in Assam in April has been very heavy, particularly in Silchar and Sibsagar. Thus a rainfall of 26·93 inches is reported from Silchar ; one of 11·68 inches from Sibsagur, while at Dhubri the fall has equalled 5·57 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven Meteorological divisions of the Province for the month of April 1888 :—

Meteorological Divisions.	Temperature.						Rainfall.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten years. The *humidity* of the atmosphere is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number [illegible] means or average of the rainfall in that district [illegible] from the returns sent in by the sub-divisional station for the period in question during the past 48 hours in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

for the week ending Friday, the 11th of May 1888.

Average humidity at 10 A.M.	Average cloud amount at 10 A.M. for week.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. RAINFALL. Of week. Mean for district.	Of week. Normal mean.	Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 15th May 1887. Mean for district.	Since 15th May 1887. Normal mean.	Since 15th May 1887. Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	DISTRICT.	METEOROLOGICAL DIVISION.

** The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater. The number denoting cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal means years. The means of the district are the numerical average of the rainfall returns received in the district, i.e., from total rainfall at the sub-divisional

Statement of Rainfall in Bengal for the week ending Friday (6 p.m.), the 11th of May 1888.

Meteorological division.	District.	Station.	Rainfall. Saturday, 5th May.	Sunday, 6th May.	Monday, 7th May.	Tuesday, 8th May.	Wednesday, 9th May.	Thursday, 10th May.	Friday, 11th May.	Total. Number of rainy days.	Rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 15th May 1887.	Average rainfall from 15th May to date.

Explanation.—...... Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 15th May* 1888.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM FOR THE WEEK ENDING FRIDAY, THE 11TH OF MAY 1888.

THE meteorological conditions which obtained at the close of the previous week were simple, and were of the ordinary settled hot-weather character. Winds were more or less westerly over almost the whole of Bengal, though in Assam they were north-easterly. Pressure though was distinctly below the normal, and temperature considerably above it. There was also an almost total absence of rainfall, and local storms had become very infrequent. These conditions continued unchanged on the 5th or the first day of the week under review, though there was a slight reaction noticeable in the wind directions, and an easterly wind current commenced to make itself felt at the eastern and northern stations, while in Chutia Nagpur and at some of the central stations in Behar northerly and north-easterly winds were reported. On the following day winds in Chutia Nagpur became north-westerly, though more or less easterly winds were still blowing at the eastern stations. On the 7th the easterly winds again extended to Chutia Nagpur and parts of Behar, and until the close of the week similar oscillations took place from day to day. These changes in the wind directions and the slight interaction taking place between the wind systems over the province at once caused weather conditions to become slightly disturbed, and local storms with rain became rather more numerous from the 6th, and they continued moderately frequent up to the end of the week. Conditions, however, have been by no means so disturbed as they were at the close of April, and the storms of the present week have been decidedly restricted in the area of their action, and the rainfall brought by them has also usually been light. The storms also have only extended over parts of the various districts, and thus the rainfall brought up by them can scarcely be called general in any part of the province. Rainfall has in fact been mainly confined in Orissa to the Balasore district; in South-West Bengal to the Burdwan, Bankoorah, Beerbhoom, Nuddea, Jessore, and Moorshedabad districts; in East Bengal to the Furreedpore, Dacca, Tipperah and Mymensingh districts; in North Bengal to the Rajshahye, Maldah, and Julpigoree districts; in South Behar to the Sonthal Pergunnahs district; and in Chutia Nagpur to the Manbhoom district. Over the whole of North Behar and in the remaining districts of the other meteorological divisions, local storms have been very few in number, and rainfall has been almost absent.

While, however, the meteorological changes in Bengal during the week have been unimportant, in the south of the Bay conditions have decidedly altered. From about the middle of the week under review it was clear that the general distribution of pressure over the Bay was favourable for the first advance of south-west monsoon winds in the south of the Bay, and towards the close of the week the first feeble advance did take place. The advance was decidedly less powerful than usual; but nevertheless in front of the inrush of moist winds a small cyclonic storm was formed which on Friday, the 11th, appeared off the South Madras coast, the centre being not far off the land, and apparently to the east-north-east of Negapatam at 8 A.M. of the 11th. This storm brought rough sea and strong winds with rain along the whole of the Madras coast, and it passed inland before the morning of the 12th.

Pressure—At the close of the previous week had been decidedly below the normal. On the 5th there was a general rise, which continued on the 6th, 7th and 8th in all districts except South Behar. By this continued increase, pressure had become above the normal by amounts varying from 0·1 inch to 0·15 inch. On the 9th, however, pressure generally fell by small amounts, but on the 10th and 11th it again rose, so that on Friday, the 11th, pressure was generally above the normal by amounts ranging from 0·15 inch to 0·20 inch. Taking into consideration those stations from which observations have been received for a series of years, and which therefore yield reliable averages, the mean pressure of the province has been above the normal by nearly 0·07 inch, and the excess has been largest in the western and central districts of the province, while it has been smaller at the eastern stations. In Assam the excess pressure for the week has only averaged 0·036 inch.

Temperature.—Has continued above the normal over almost the whole province throughout the week, and the mean temperature has been 2·2° in excess. This excess has been fairly equally distributed, the smallest excess being 1·5° in North Bengal, and the largest 2·9° in East Bengal. The average excess temperature in Assam has been 2·5°.

Rainfall.—As previously stated, rainfall has been rather scanty and local during the week, and no district has received an average fall of an inch of rain. The largest falls are reported from South-West Bengal, the stations in which have recorded the average amount of 0·78 inch, which is, however, only about half the usual amount for the week. North Bengal has received an average fall of 0·47 inch, or about a quarter of the usual fall; the stations of East Bengal average 0·31 inch, or only about a seventh of the usual quantity; Orissa reports 0·20 inch, or roughly a fifth of the normal amount. Chutia Nagpur 0·22 inch, equal to about a third of the usual fall; and South Behar 0·18 inch, about two-fifths of the normal; while North Behar has received no rain at all.

In Assam, Sibsagar has received 2·27 inches of rain during the week, Dhubri 0·57 inch, and Silchar 0·36 inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 11th of May 1888 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May 1887.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

CONTENTS.

THE following is published for general information.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Government of Bengal.

The 21st May 1888.

ESTIMATED OUTTURN OF THE RUBBEE HARVEST AND OF IMPORTANT CROPS SUCH AS JUTE, TOBACCO, &c.

No. 917Agri., dated Calcutta, the 12th-16th May 1888.

From—E. W. COLLIN, ESQ., C.S., Offg. Director of the Department of Land Records and Agriculture, Bengal,

To—The Secretary to the Government of Bengal, Revenue Department.

IN continuation of Mr. Finucane's letter No. 51Agri., dated 10th January 1888, I have the honour to submit the report called for in your letter No. 408—9Fam., dated the 8th February 1887, regarding the estimated outturn of the rubbee harvest and of important special crops, such as jute, tobacco and others.

2. The statistics given in the appended tables have been compiled in the manner described by Mr. Finucane in his letter submitting the previous return, and the figures which are given cannot lay claim to complete accuracy. The letter from Mr. Finucane, calling upon District Officers for the information, and giving instructions as to the manner in which the statistics should be compiled, has been already submitted to you, and explains the system which was adopted.

3. The season was generally unfavourable to the rubbee harvest. There was a late rain in October which injured the sowings, and the winter rains were delayed till late in January, and thus were of little benefit. The outturn of the rubbee harvest, as was to be expected under these conditions, is reported to have been deficient throughout Behar, Chota Nagpore and the Bhagulpore Division. Wheat is reported to have been little more than half an average crop; but other crops, such as gram, rahur, barley, and mustard, were not much below the average, except in Chota Nagpore where, however, there is said to be no cause for anxiety. Some injury to wheat was also caused by insects in the Patna district. The dryness of the season was equally unfavourable to the rubbee harvest in Eastern and South-Eastern Bengal, except in parts of the Dacca Division where the mustard crop was rather over the average. In the Chittagong Division the deficiency of the rainfall in autumn, which was unfavourable to the winter rice crop, had a good effect on the cold weather harvest, while in Orissa the outturn of the rubbee crops was better than usual. In no locality was the crop worse than half a crop, except in parts of the Darjeeling district, especially in the Terai, and of the Chota Nagpore Division. The good mohwa crop will, however, afford some compensation to the latter.

4. The returns which are appended do not distinguish the areas cultivated with the different rubbee crops, so that it is impossible to estimate the total area on which wheat or any other crop is grown. An attempt will be made to remedy this defect in future, though in consequence of the absence of any accurate information on the subject, it will not be possible to guarantee the accuracy of such returns.

5. The important special crops, regarding which information has been collected, were sugarcane, jute, tobacco, ganja, opium, mulberry, and potatoes. Sugarcane was generally a better crop than in the preceding year throughout East and South-East Bengal. It was, however, an indifferent crop in Bhagulpore and Behar, and was almost a failure in Shahabad. The deficiency of outturn in that district is attributed to excessive rainfall during the planting season, and to the ravages of grasshoppers. Tobacco was an average crop in the Burdwan and Presidency Divisions, but gave an inferior outturn throughout the Rajshahye Division, especially in Rungpore, where it is largely grown. In the Behar districts reports vary. In Durbhunga the tobacco crop is said to have been a bumper one; while in the neighbouring district of Mozufferpore it was less than a three-quarter crop. In Orissa, where a considerable amount of tobacco is grown, the outturn was better than in the preceding year. Jute, so far as it has been reported on, is shown to have suffered to some extent from the want of seasonable rain and, in Nuddea, from floods. The opium crop was better than in the previous year, while the mulberry and potato crops were rather below the average.

6. The area under the several crops has not been separately shown in the return, and hence it is not possible to make an estimate of the total area cultivated with any special crops. District Officers will be requested to separate the areas under the different crops in future reports.

STATEMENT I.—*Estimated Outturn of Rubbee Crops.*

1	2	3	4	5	6	7	8	9
DISTRICT.	Sub-division.	Total area of sub-division.	Total area estimated to be under cultivation.	Estimated area under rubbee crops.	Names of principal rubbee crops of sub-division.	Estimated outturn expressed in annas of current year's rubbee crops.	Same of previous year's rubbee crops.	REMARKS.
				BURDWAN DIVISION.				
		Sq. miles.	Sq. miles.	Sq. miles.				
Burdwan	Sudder	1,242	993	124	Pulse, mustard ...	8 annas	10 annas	Want of timely rain affected the crops in some places during the last two years
	Culna	432	324	48	Wheat, grain, linseed, peas.	12 "	10 "	The rains ceased early in October, after which there was no rain till the end of January. There was deficiency of moisture in the soil, which interfered with the normal growth of the rubbee crops.
	Cutwa	352	274	24	Matar (pea), gram, arhur, masur, teora, teshi (linseed), oilseed.	11 "	12 "	Owing to the deficiency in the rainfall, the outturn of the rubbee crops for the current year has been affected. The above remark applies also to the crop of the previous year.
	Ranigunge ...	671	214	29	Gram, peas, khesari, barley, mustard, til, linseed, arhur.	10 "	12 "	Owing to deficiency of rainfall the current year's crops have been affected. Last year there was rain both at the time of ploughing and sowing.
	District Total ...	2,697	1, 05	225	.....	.....	......	
Bankoora ...	Sudder	1,921	576	*28	Mustard or rye ... Pea ... ... Gram .. ... Masur (pulse) .. Wheat ... ... Barley	6 annas 6 " 8 " 6 " 6 " 6 " or about 8 annas on the whole.	......	The falling off in the current year's outturn is due to deficiency of rainfall in September and October 1887. * About half of this yielded two crops in bhadoi and rubbee.
	Bishenpore ...	700	280	19	Mustard, barley, wheat and pulses.	12 annas	12 annas.	
	District Total ...	2,621	856	47	.. ..	......	......

REPORT ON THE STATE OF THE SALT MARKET FOR THE FOURTH QUARTER OF 1887-88.

No. 396B, dated Calcutta, the 11th May 1888.

From—K. G. GUPTA, Esq., Offg. Secretary to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal, Financial Department.

SALT.

F. M. HALLIDAY, Esq.

I AM directed by the Board of Revenue to submit the following report on the state of the salt market for the fourth quarter of 1887-88, comprising the months of January, February and March 1888.

2. The quantity of salt of every description cleared during the quarter under report amounted to 22,01,094 maunds 7 chittacks against 27,10,003 maunds 8 seers 2 chittacks in the previous quarter, and 26,06,814 maunds 38 seers 7 chittacks in the corresponding quarter of the previous year; and the net amount of duty levied thereon was Rs. 42,45,508-4 against Rs. 50,56,522-2-8 in the previous quarter, and Rs. 48,91,893-8 in the corresponding quarter of the previous year.

3. The quantity of excise salt sold in the districts of Cuttack, Pooree and Balasore during the quarter under review from the stock of the different seasons' manufacture, and the quantities which remained in store at the close of the quarter, are shown in table I :—

* The difference between these figures and the corresponding figures shown in the statement submitted with the report for the previous quarter is due to revised figures since received from the Collector.
† Found in excess in the golah.

4. The above statement shows that the total sale of excise salt during the quarter under review amounted to 41,745 maunds 15 seers against 59,660 maunds 5 seers in the previous quarter, and 52,848 maunds 30 seers in the corresponding quarter of the previous year.

5. The subjoined table shows in comparison the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter under review and the corresponding quarters of the previous two years :—

* Means for 6 day. † Means for 4 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last two years. The *humidity* of the atmosphere is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past 15 [illegible] A rainy day is one on which at least hundredth of an inch fall.

for the week ending Friday, the 18th of May 1888.

Average humidity at 10 A.M.	Average cloud amount at 10 A.M. for week.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Of week. Normal mean.	Rainfall. Explanation.—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the* 18*th May* 1888.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM FOR THE WEEK ENDING FRIDAY, THE 18TH OF MAY 1888.

AT the close of the previous week the meteorological conditions in Bengal were of the ordinary hot-weather nature, and except that a few local storms with rain continued to occur in most of the divisions, there were no points calling for any particular remark. In the south of the Bay, however, conditions had distinctly altered, and the first advance of south-westerly monsoon winds had taken place at the South Ceylon stations, and in front of this advance a small cyclonic storm had formed, the centre of which was situated on Friday, the 11th, a short distance from the South Madras coast to the east-north-east of Negapatam. The storm was by no means an intense one, and it during the night of the 11th advanced across the coast in a westerly or west-north-westerly direction, the centre apparently passing near Cuddalore, and on the morning of the 12th the centre was well inland to the north-west of Negapatam. Though the storm was by no means an intense one, yet it gave strong winds, a rough sea, and rather squally weather along the whole of the coast from Madras southwards. On the 13th the small storm had again advanced in a north-westerly direction, but it had rather rapidly filled up, and had practically disappeared. This advance of the monsoon winds was rather a feeble one, and it does not appear to have advanced as a definite moisture bearing current very far up the Bay, but the low pressure, which apparently accompanied its advance in the south of the Bay, afterwards spread in a northerly direction, and a wave, or perhaps two waves of decidedly low pressure, have advanced over the Bay into Bengal. The first rapid fall of pressure in the north of the Bay took place on the 13th, and continued on the 14th, when at some stations pressure fell by no less than a fifth of an inch during the two days; on the 15th there was a slight recovery; but on the 16th a further very rapid fall commenced, which was greatest on the Burma coast and in Orissa, and there was again a very large decrease on the 17th off the Arakan and Pegu coasts, the fall in some cases exceeding 0·15 inch. This caused a very distinct low-pressure area to be formed to the south-west of Akyab, and this diffused depression was accompanied by a distinct cyclonic circulation of winds. The depression probably gave somewhat squally weather over the northern half of the Bay on this day; but it did not concentrate or develop into any definite storm, and on the following day the area of low pressure advanced over South Bengal, when the pressure recorded became extremely low, as for instance Balasore registered 29·544 inches—a pressure almost as low as is generally recorded at the commencement of the rainy season. Beyond, however, this abnormal pressure and bringing up with it moderately strong, but very moist, winds, and giving rather numerous showers, the depression did not influence the weather in Bengal to any material extent, and it subsequently passed into the interior of the province and afterwards appeared in Behar.

The conditions in Bengal during the week have been therefore slightly more disturbed than they were in the previous week, and local storms with rain have again been rather numerous, particularly after the appearance of the low pressures above recorded. These storms have again been most numerous in East and North Bengal, and less numerous in North Behar, South-West Bengal and Orissa, but still a few showers have fallen in the present week in South Behar, though in Chutia Nagpore rainfall has been almost absent. In Assam moderate rain has fallen almost throughout the week.

Pressure—Had at the end of the previous week been nearly a fifth of an inch above the normal over a large part of the province, but the changes during the present week have caused the mean pressure to become below the normal, and taking into consideration only those stations from which records have been received for a long series of years, the average pressure of the province of Bengal for the week has been 0·04 inch in defect of the normal, the defect being largest at such stations as Calcutta, Berhampore, Purneah, and Durbhunga, where it equals 0·05 inch. In Assam the mean defect is even larger, and it equals 0·052 inch. On Friday, the 18th, pressure was generally in defect of the normal by amounts varying from a tenth to a fifth of an inch.

Temperature.—The variations of temperature during the week have been of little importance, and it has been rather largely above the normal in almost all districts. In Chutia Nagpur the excess in the mean temperature has averaged about four degrees; in South Behar, South-West Bengal, and Orissa it has averaged about three degrees; in East Bengal nearly two degrees, and in North Bengal and North Behar less than one. For the whole of Bengal temperature has therefore been 2·2° in excess of the normal. In Assam, on the other hand, the variation has been small, and temperature has been in excess of the normal by only 0·3°. The highest maximum temperatures reported this week have been 111·9° at Dehree on the 17th and 109·4° at Cuttack also on the 17th.

Rainfall—Has been rather below the normal over the whole province. In East Bengal the fall has averaged 1·90 inches, which is equal to the normal fall. North Bengal has received an average fall of a little more than an inch, or about two-thirds of the normal. The fall in Orissa has been about half an inch, or little more than half the usual fall; while in North Behar it has only averaged four-tenths of an inch, or about two-thirds of the normal fall. In South-West Bengal an average fall of little more than a third of an inch is reported, or about a third of the ordinary fall at this period. In South Behar the fall has only averaged a little more than a quarter of an inch which is, however, about two-thirds of the normal fall, while Chutia Nagpur has been almost rainless.

Taking up the rainfall rather more in detail, the following districts have received fairly good falls: in South-West Bengal—24 Pergunnahs, Howrah, and Hooghly; in East Bengal—Chittagong, Noakhally, Tipperah, and Mymensingh; in North Bengal—Pubna, Bogra, and Rajshahye; in North Behar—Purneah and Durbhanga; and in South Behar—the Monghyr and Sonthal Purgunnahs districts. On the other hand, the following districts have received

very deficient rainfall: in Orissa—the Pooree and Cuttack districts; in South-West Bengal—Midnapore, Burdwan, Birbhoom, Moorshedabad, Nuddea, Khoolna, and Jessore; in East Bengal—Burrisal, Furreedpore, and Dacca; in North Behar—Mozufferpore, Chumparun, and Sarun; in South Behar—Shahabad, Patna, and Gya; and in Chutia Nagpur—all districts.

In Assam during the week Silchar has received 4·22 inches, Sibsagar 3·55 inches, and Dhubri 3·51 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the week ending Friday, the 18th of May 1888:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10. 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, p passing temporary showers, t thunder, < lightning, ⌓ dew, ♂ dust storm.

A. PEDLER,

For Offg. Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;

Calcutta, the 21st May 1888.

MEMORANDUM.

The mortuary statistics of the districts in Bengal for the month of March 1888 present the following results :—

1. That the deaths of 116,225 persons were registered among a population of 66,163,884, representing an annual casualty-rate of 21· per 1,000 against 19·08 in the preceding month, and the same proportion in the corresponding month of the preceding year, indicating, as compared with both the periods, an improvement in the number of deaths recorded.

2. That the following districts returned the highest proportions of deaths :—

Districts.	Ratio per *mille.*	*Districts.*	Ratio per *mille.*
Backerganj	40·20	24-Pergunnahs	26·76
Birbhum	32·40	Howrah	26·52
Darjiling	29·76	Serampore	26·40
Rungpore	29·40	Midnapore	25·92
Julpaiguri	28·44	Burdwan	25·68
Khulna	28·32	Puri	25·44
Dinajpur	27·96	Rajshahye	25·32
Hughli	26·88	Hazaribagh	25·32

3. That referring to the incidence of the specific death-causes mentioned in the table given below, it is seen that fever prevailed with noticeably high mortality during the month under notice as compared with the results of the corresponding month of the preceding year, and that the fatal results from the other diseases exhibited only fractional variations, excepting bowel-complaints, the death-rate from which was the same as that recorded in March 1887 :—

	Ratio per *mille* during—	
	March 1888.	March 1887.
Cholera	1·80	1·56
Small-pox	·12	·08
Fever	14·64	13·56
Bowel-complaints	·72	·72
Injury	·12	·24
Other causes	3·24	2·76

4. That cholera and fever exhibited greatest activity in the undermentioned Municipalities, while the rest of the diseases did not display noticeable fatility anywhere, excepting in Puri and in Tipperah, where 14·16 and 10·56 per 1,000 of the population, respectively, died from the maladies classed under the head of Other causes :—

Cholera.	Ratio per *mille.*	*Fevers.*	Ratio per *mille.*
Backerganj	18·60	Rungpore	26·76
Khulna	7·68	Dinajpur	26·40
24-Pergunnahs	7·32	Julpaiguri	26·40
Howrah	6·36	Birbhum	23·40
Serampore	4·80	Rajshahye	23·16
Chittagong	4·32	Darjiling	22·00
Puri	4·32	Bogra	21·60
Balasore	4·08	Maldah	21·60
Jessore	3·48	Hazaribagh	20·88
Faridpore	3·24	Purneah	20·76
Burdwan	3·00	Murshidabad	20·28
Tipperah	2·76	Pubna	20·04
Midnapore	2·64		
Manbhum	2·64		
Bankura	2·52		

5. That the death-rates in relation to *Sex*, *Class* and *Age* stood as noted below :—

According to Sex.

	Ratio per *mille.*
Males	23·52
Females ...	18·60
Ratio of male deaths to every 100 female deaths ...	124

According to Class

	Ratio per *mille.*

OFFICE OF SANITARY COMMISSIONER FOR BENGAL,
The 21st May 1888.

B. LIDDERDALE, M.D., *Deputy Surgeon-General,*
Sanitary Commissioner for Bengal.

MEMORANDUM.

THE table annexed to this memorandum shows—

1. That during the week ending 5th May 1888, the birth and death-rates of the principal Municipalities in Bengal amounted to 16·8 and 25·4 per 1,000 of population respectively, as opposed to 18 and 24·7 per 1,000 respectively, in the preceding week ending 28th April, indicating a retrogression in the registraiton of births.

2. That the following Municipalities furnished the highest proportions of births and deaths :—

Births.

	Ratio per mille.
Comillah	42·3
Durbhanga	37·0
Bhagulpore	31·7
Beauleah	31·5
Monghyr	29·8

Deaths.

	Ratio per mille.
Comillah	61·6
Utterpara	56·6
Suburbs of Calcutta	47·2
Chittagong	47·0
Durbhanga	37·8
Gya	37·6
Serampore	35·3
Hughli	34·9

3. That the mortality from the principal diseases does not exhibit any noticeable differences in comparison with the death-rates from the same diseases during the preceding week :—

	Ratio per mille during the weeks ending— 5th May 1888.	28th April 1888.
Cholera	7·5	7·3
Small-pox	·4	·2
Fever	8·2	8·5
Bowel-complaints	2·1	2·0
Injury	·2	·3
Other causes	6·9	6·4

4. That the suffering from cholera and the maladies classed under the head of "Other causes" was greatest in the undermentioned Municipalities, the other diseases exhibiting no special local severity :—

Cholera.

	Ratio per mille.
Chittagong	42·3
Suburbs of Calcutta	18·4
Comillah	15·4
Hughli	13·4
Howrah	10·8
Patna	6·5
Dacca	5·8
Gya	4·8

Other causes.

	Ratio per mille.
Comillah...	34·6
Serampore	15·7
Durbhanga	14·2
Suburbs of Calcutta...	10·8
Gya	10·2

5. That the death-rates under the heads of *Sex, Class* and *Age* stood as follows :—

According to Sex.

	Ratio per mille.
Males	27·6
Females	22·9
Ratio of male deaths to every 100 female deaths	136

According to Class.

	Ratio per mille.
Christians	30·4
Hindus	24·5
Mahomedans ...	27·5

According to Age.

	Ratio per mille.
Under 1 year ...	166·3
1 and under 5 years ...	3[illegible]·3
5 " 10 " ...	13·5
10 " 15 " ...	1·[illegible]
15 " 20 " ...	25·1
20 " 30 " ...	16·1
30 " 40 " ...	20·9
40 " 50 " ...	19·1
50 " 60 " ...	29·5
60 years and upwards ...	49·7

R. LIDDERDALE, M.D., *Deputy Surgeon-General,*
Sanitary Commissioner for Bengal.

The 21st May 1888.

Statement showing the Results of the Registration of Births and Deaths in the Principal Municipalities in Bengal during the week ending 5th May 1888.

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remain, as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "*Age*," the ratios under which have been omitted, inasmuch as the census of the Europeans above alluded to cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorized form of age classification.

Excludes local traffic of the Dacca, Northern Bengal, and Kaunia and Dharla Railways during 1887.

Comparative statement of the principal commodities carried over the Eastern Bengal State Railway during the month of January 1888.

INCREASES.

	Tons.
Coal	5,038
From the East Indian Railway for railway and flotilla purposes.	
Cotton	359
The total weight carried during the month was only 390 tons. The traffic is from Naraingunge principally.	
Cotton piece-goods	323
Demand from Eastern Bengal districts.	
Rice	8,620
From the Northern and Southern sections. Mograhat shows the largest individual increase with 54,000 maunds.	
Grains	5,307
Good crops and a favourable market.	
Jute, screwed	550
The increase is trifling.	
Oilseeds	314
The Calcutta market in seeds was very unsettled during the month.	
Provisions	318
For the Darjeeling and Himalayan Railway principally.	
Sugar	773
From Ramnagar and Alamdanga principally.	
Tobacco	312
From the Northern Section. Kaunia and Domer show the principal increases.	

DECREASES.

	Tons.
Jute, unscrewed	2,564
Large decreases in despatch from Goalundo, Naraingunge and Serajgunge.	
Metals	337
Due to dullness of market.	
Railway plant &c.	1,550
Decrease in despatch of materials for construction, repairs and renewals.	
Salt	1,854
Falling off in despatches from Chitpore for Dacca and hide-curing-stations on Northern Section, said to be in some measure due to difficulties about rawannahs	
Firewood	312
From the Southern Section.	

CALCUTTA, *the 4th April* 1888.

F. P. QUINLAN, *Examiner of Accounts.*

CONTENTS.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Beng assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 and 25 Vic., Cap. 67.

THE Council met at the Council Chamber on Saturday, 12th May 1888, at 11 A.M.

Present:

The HON. SIR STEUART COLVIN BAYLEY, K.C.S.I., C.I.E., Lieutenant-Governor of Bengal, *presiding*.
The HON. G. C. PAUL, C.I.E., Advocate-General.
The HON. H. J. REYNOLDS, C.S.I.
The HON. C. P. L. MACAULAY, C.I.E.
The HON. T. T. ALLEN.
The HON. SIR HENRY HARRISON, KT.
The HON. SIR ALFRED CROFT, K.C.I.E.
The HON. BABU KALI NATH MITTER.
The HON. DR. MAHENDRA LAL SIRCAR, C.I.E.
The HON. DR. GOOROO DASS BANERJEE.
The HON. H. PRATT.

BENGAL MUNICIPAL ACT AMENDMENT BILL.

The HON. MR. MACAULAY moved that the Bill to amend the Bengal Municipal Act, III of 1884, be passed.

The motion was put and agreed to, and the Bill was then passed.

HOWRAH BRIDGE ACT AMENDMENT BILL.

The Hon. Mr. Macaulay presented the Report of the Select Committee on the Bill to amend the Howrah Bridge Act, IX of 1871.

The Hon. Mr. Macaulay also moved that the Report of the Select Committee be taken into consideration in order to the settlement of the clauses of the Bill, and that the clauses of the Bill be considered in the form recommended by the Select Committee.

The motion was put and agreed to.

The Hon. Mr. Macaulay also moved that the Bill as amended be passed.

The motion was put and agreed to, and the Bill was then passed.

CALCUTTA AND SUBURBAN MUNICIPALITIES AMALGAMATION BILL.

The Hon. Sir Henry Harrison moved that the clauses of the Bill to consolidate and amend the law relating to the Municipal Affairs of the Town and Suburbs of Calcutta, as further amended, be further considered in the form recommended by the Select Committee.

The motion was put and agreed to.

The Hon. Babu Kali Nath Mitter moved that such of the sections of the Municipal Bill to which objections have been taken by those residents of Calcutta who have memorialized His Honour the Lieutenant-Governor on the subject, and which had been passed previous to the receipt of their memorial, be reconsidered.

He said:—On the 17th of April last a memorial was presented to Your Honour by a deputation appointed by a public meeting in the Town Hall, and in answer to that memorial Your Honour was pleased to say:—

"Your memorial will, however, be duly laid before the Council, and if the Council should wish to have any of the points enumerated re-opened and reconsidered, I shall not allow a technical objection to stand in the way."

If my memory serves me right, at the meeting of the Council on the 18th April, Your Honour referred to this memorial, and also then said pretty nearly the same thing as you stated to the deputation which waited on you. Availing myself of what Your Honour then said, I thought the practical way to give effect to it was to bring forward this motion, because the matter could not otherwise be discussed and considered. The memorial, I think, was circulated to the Council before the meeting of the 21st April, and the first section of the Bill which was considered on that day was section 235, so that, if this motion of mine is now carried, the sections prior to 235 would have to be reconsidered. I do not mean that all those sections would be reconsidered, but only those to which exception has been taken by the memorialists. In going through the memorial, it seemed to me that only a small number of sections would require reconsideration, such, for instance, as the sections which relate to the constitution of the Municipality, the section about the appointment of the Chairman, the sections about the control which the Local Government should exercise over the Municipality, and the section about the general Committee, and that about the assessment of house property. I think these are all the sections which would have to be reconsidered if my motion is carried. I do not wish to take up the time of the Council by entering into those matters now, because in the course of the various amendments which I moved I fully discussed those questions. I will only remind the Council that the body which presented the memorial belong to an important community, and that being so, their representations should have some effect on the Council. To my mind the result will be clear. I do not for a moment anticipate that the result will be in any way different from what it has been, or that any amendments I may bring forward will share a better fate than those I had the honour to place before the Council at its earlier meetings. But still I think it my duty to take advantage of the statement made by Your Honour that you will not allow any technical objections to stand in the way of reconsidering these questions if the Council so desire; and I therefore make this motion for discussion by the Council.

HIS HONOUR THE PRESIDENT said:—I think that what the hon. member has just said is perfectly correct, and that he is quite within his right under the special circumstances of the case in asking for an opportunity of getting an expression of opinion from the Council on the question he has raised. In deference to the important body that deputed the gentlemen referred to with the memorial, I said on that occasion that, though a great many of the sections of this Bill to which they objected had already been considered by the Council, I should not, if the Council wished to reconsider them, let any technical difficulty stand in the way. The question has practically been left dormant from that time to this, and now the hon. gentleman takes the opportunity of raising the question whether the Council does or does not mean to reconsider these sections. I think, in consideration of what I said before, that the most respectful way I can deal with this question is simply to put it to the Council.

The HON. SIR HENRY HARRISON said:—Being the member in charge of this Bill, I can have no objection to any reconsideration of the Bill, because it is my conviction that the overwhelming force of argument and reason is on the side of the decisions to which the Council has already come in respect of the several matters to which the hon. member has referred, and a rediscussion would only serve to bring out that preponderance of argument and reason still more forcibly. But looking at the motion from the point of view of the Council, I would ask whether any useful purpose can be served by re-opening the consideration of these questions. My hon. friend has himself made a statement which, I think, closes the door to any further discussion, namely, that it will make no difference in the result. If he rightly diagnoses the effect of the rediscussion of these questions, which would occupy at least one or two sittings of the Council, what useful purpose would be served by further discussions in which the same arguments would be repeated, and the result of which the hon. member himself virtually acknowledges would be inevitably the same as before?

The HON. THE ADVOCATE-GENERAL said:—The hon. mover of the motion before the Council himself took a most prominent part in the discussion of these sections and stated fully his arguments, and I take it that we ought not to be asked to reconsider the sections or arguments which have already been adduced. Unless the hon. member can adduce additional arguments, throwing further light on the discussions which have taken place, I don't think we ought to re-open the consideration of these questions. I have not heard a single additional argument in respect of any of these questions, and that being so, we are not in a position to take the matter into consideration again. That an important section of the community has taken objection to these provisions is no doubt a matter of significance, but that taken by itself, without any additional arguments being adduced to support those objections, affords no sufficient reason for reconsidering matters which have already been fully discussed. Are we to discuss questions again on grounds which have already been discussed? I apprehend that is not a procedure we should be called upon to adopt. No fresh grounds having been put forward, I shall therefore vote against the motion.

The HON. DR. GOOROO DASS BANERJEE said:—I wish to say one word in support of the motion. Although it may be quite true that the speculative reasons which may be advanced for and against any of the matters which have already been settled may be the same as before, still as many of the points which were discussed involve matters of opinion more than matters of mathematical demonstration, the views and sentiments of a large and important section of the community ought properly to be taken into consideration. The fact that the Council has now before it the formulated expressions of opinion of a very large and important section of the community is of itself a reason why, if the Council be so disposed, these questions might be reconsidered in the light of those opinions, and with the additional information that those views convey to us. The parties who are most likely to be affected by the provisions of the Bill have also a right to say what they think about those provisions; they have said something, and we may fairly take into consideration what they have said.

The Hon. Babu Kali Nath Mitter said :—In reply I will simply point out that the very fact that an important section of the community has taken serious objection to many provisions of the Bill is a strong argument in favour of their reconsideration. It is one thing to discuss and decide a matter without knowing the views of the community which are most affected by the provisions of the Bill, and it is another thing to discuss them in the light thrown on the discussion by that community coming forward and making a representation before Your Honour. Therefore it is not necessary for me to advance any argument in favour of this motion in the way pointed out by the hon. and learned Advocate-General. No doubt, if I have to argue these sections again, I would argue them in the same manner as I did before, adding thereto the opinions and representations submitted by the memorialists; and therefore the mere fact that I do not advance any fresh arguments now is, I submit, not a sufficient reason for refusing to consider this matter. For after all, who are the persons most interested? They are the persons who have come forward to offer suggestions. As far as this Council is concerned, it may pass the Bill, and there its responsibilities and its duties cease; but as far as the outside public is concerned, they will be affected by these provisions almost daily, and therefore I submit it will only be gracious on the part of the Council if they accede to this motion. The hon. member in charge of the Bill complains that there would be one or two additional sittings of the Council; but considering the amount of time we have spent upon the consideration of this Bill, I do not think that argument should at all influence my colleagues. If for the interests of the public there should be two or three or even four meetings more, I do not think we should grudge them. My hon. friend referred to my own sentiment on the subject. I have formed the impression that as far as the present Council is concerned, I do not think it will be possible to have modifications introduced in the sections which have already been passed. I have formed that impression after careful consideration: but that is neither here nor there. Certain persons have come forward and raised serious objections to several very important sections of the Bill, and it would only be gracious on the part of the Council to yield to those representations and to reconsider those provisions.

The motion being put, the Council divided:—

Ayes 3.	*Noes* 8.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Dr. Mahendra Lal Sircar.	The Hon. Sir Alfred Croft.
The Hon. Babu Kali Nath Mitter.	The Hon. Sir Henry Harrison.
	The Hon. T. T. Allen.
	The Hon. C. P. L. Macaulay.
	The Hon. H. J. Reynolds.
	The Hon. the Advocate-General.
	His Honour the President

The Hon. Sir Henry Harrison said :—I have now to move a series of amendments in the Bill before the motion finally to pass it is brought forward, and I must ask the indulgence of the Council, and remind them that in a large measure of this kind there must be a number of flaws, and the object of these amendments is simply to remove some of them. The first of these amendments was brought to my notice by the Hon. Mr. Reynolds, who pointed out that section 460, which provides for the preparation of the budget in anticipation, is in a part of the Act which will not come into force before the 1st of April. It is therefore necessary to provide that that section and the schedule appended to it shall come into force on an earlier date, and with this object I move that, to section 1, the following be added :—

"And section four hundred and sixty and the schedule referred to therein, shall come into force from the 1st January 1889."

The motion was put and agreed to.

The Hon. Sir Henry Harrison said :—The next amendment has reference to a certain difficulty, especially in the added area, owing to the fact of there being owners and sub-owners in possibly two or three grades, and possibly also occupiers, though that does not come in here, and is of less importance.

The present Act places the liability of ownership on the person who receives the rent; but several persons may be receiving the rent. In the Mofussil Act the words are "every person who is entitled to receive any rent in respect of land"—not as proprietor, for that is already met, but in the various grades of sub-proprietors, such as a mokuriridar, darmokuriridar, as well as a lakhirajdar, and in that case each one of them would come under the definition of "owner," because each would be receiving rent from the land. I therefore move that in line 2 of clause (*a*) of the definition of "owner" in section 3, for the word "rent" the words "any of the rent" be substituted.

The motion was put and agreed to.

The Hon. Sir Henry Harrison moved that, in line 4 of section 8, for the words "resident in Calcutta" the words "residing or paying rates in Calcutta" be substituted; also that, in line 11 of section 4, for "residing, carrying on business, or personally working for gain in Calcutta" the words "residing or paying rates in Calcutta" be substituted; also that, in line 4 of section 9, after "resides" the words "or pays rates" be inserted.

He said:—I shall explain to the Council that *some* amendment is necessary here, and it is for them to say whether these or any other amendments should be made. According to my view it is desirable first to amend section 8, and therefore I preferred to put this amendment first. But the difficulty may also be met by altering the section in another way. I will first refer to section 14, which provides that any person qualified to vote under any of the preceding sections shall, subject to the provisions of section 32, be qualified to be elected a Commissioner. So the qualification to be elected is the same as the qualification to vote. But by section 4 the seventy-five members shall be male persons, "residing, carrying on business, or personally working for gain in Calcutta," while by section 8 the electors must reside in Calcutta. How are these two sections to be reconciled? First the qualification to vote and the qualification to be elected are the same; but the qualification to vote requires residence, whereas the qualification to be elected may be either residence or working for gain or carrying on business. The reconciliation I propose is to substitute for "resident" the words "residing or paying rates." That seems a fair and not embarrassing way of reconciling the difference; and if that is done, we must put in the same words in section 4. If, on the other hand, we take the words of section 4 and put them in section 8, we shall have to alter several other sections. A person who pays no rates at present is not supposed to vote; if he resides in Calcutta, he can be qualified by paying taxes. But the section which provides for the place of voting says that a person qualified under clause (*d*) of section 8, which refers to the payment of the trades and professions tax, shall, if he pays rates directly to the Commissioners for his place of business, vote in the ward in which his place of business is situated, or if he does not pay rates for any place of business directly to the Commissioners, he shall vote in the ward in which he resides. That presumes that he must do one or the other. The amendment which I propose will meet the difficulty, and seems on the whole reasonable and fair. A person who resides out of Calcutta and only comes to his office and does his work there has the smallest possible interest in the town, but a person who either resides in the town or pays rates on account of property has a substantial interest. That is the reason why I have selected this solution of the difficulty.

The Hon. Mr. Allen said:—I wish to ask the hon. member in charge of the Bill whether there is such an antagonism as he supposes. The qualifications for election are laid down in section 8, and I understand these are exactly the same qualifications which are required in respect of the persons to be elected and those who are to elect them, and therefore so far the Bill is perfectly harmonious. The discrepancy is supposed to be between sections 4 and 8. But section 4 lays down a rule not only for the 50 Commissioners to be elected, but also for the other 25 Commissioners to be nominated. That is a wider rule. It allows the 25 Commissioners not elected to be qualified in a different manner. [The Hon. Sir Henry Harrison—"That may be the meaning, but that is not intended."] It is quite easy to give effect to the two sections; for before a person can be proposed as a candidate for election, he must fulfil the conditions prescribed in section 8, which are quite consistent with the qualifications further on in the Act. But the 25 Commissioners to

be nominated, which is the difference between 75 and 50, do not require such strict qualifications. It would be open to the Government to nominate a person who may be carrying on business or personally working for gain, even though he does not reside in Calcutta. I do not see that there is any inconsistency or that there is any necessity for making any change.

The HON. SIR ALFRED CROFT said :—This very point was discussed and decided in the opposite sense. An amendment was proposed that instead of " male persons resident in Calcutta " it should be " male persons residing or paying rates in Calcutta," but the hon. member in charge of the Bill was opposed to the change.

HIS HONOUR THE PRESIDENT said :—I think the Hon. Sir Alfred Croft is right in saying that the literal point contained in this amendment was decided before, but it was decided without any reference to those grounds upon which the hon. member in charge of the Bill now proposes to amend what appears to be a contradiction between the two sections. I do not think there is any objection to the question being discussed now. It is a technical amendment,—really an amendment in drafting,—although it does involve a change of the rule on general grounds.

The HON. DR. GOOROO DASS BANERJEE said :—I submit that there is really some antagonism between sections 4 and 8 of the Bill; but supposing that there were none, the argument of my hon. friend on my left (Mr. Allen) would go to show that the ground upon which the two sections are proposed to be reconciled is itself a most objectionable ground, and if that ground holds good, this amendment is the more necessary. It is as regards the fifty elected Commissioners that the qualification of residence applies, but as regards the remaining twenty-five Commissioners that qualification is unnecessary. If that is so, you will give greater latitude of selection to the special constituencies, such as the Chamber of Commerce, the Trades' Association, and the Port Commissioners, than you do to the general body of electors. Is that fair ?

The HON. THE ADVOCATE-GENERAL said :—It may be said in one sense that section 8 cuts down the meaning of section 4, because it is a subsequent section. Every one of the seventy-five Commissioners must be qualified as in section 4, and then section 8 says that the fifty Commissioners to be elected must come from a more limited class. But, as the hon. member who spoke last has said, all the Commissioners should be of the same class, whether they are elected Commissioners, or Commissioners nominated by the Government or the other special constituencies. If the hon. member in charge of the Bill is right, that a person who comes to Calcutta merely to work at a Government office during so many hours in the day can be said to have only a transitory interest in the town, the qualification should be so defined that only those should have votes who have a permanent interest in the town.

The HON. BABU KALI NATH MITTER said :—Section 4 provides that the seventy-five members shall be male persons, residing, carrying on business, or personally working for gain in Calcutta, and section 8 says that of the remaining members fifty shall be elected as hereinafter provided by male persons resident in Calcutta. Why should not this section be on precisely the same footing as section 4? The words " carrying on business " have a recognised meaning ; there are many decisions of the High Court which have given them a special meaning, and they are better understood than the words " paying rates." I therefore submit that if there is to be any modification at all, it should be on the lines of section 4. But I would point out that an amendment of this sort is not a verbal amendment. It is an amendment which goes to the merits of the section. [His Honour the President—" It has been decided on the merits, but the ground for the amendment is the discovery of a contradiction."] This matter was fully discussed, because my hon. friend opposite (Dr. Gooroo Dass Banerjee) brought forward amendments on all these sections, and the hon. member in charge of the Bill objected to all of them, as he would do to every amendment which might be brought forward. [His Honour the President—" I don't think this particular point was brought forward. We were then not aware of the contradiction in terms. If the fact was as you say, you are right in objecting on a point of order. "]

The HON. SIR ALFRED CROFT said:—On the 4th of February last, the hon. member opposite (Dr. Gooroo Dass Banerjee) proposed to substitute the words "residing or paying rates in Calcutta" for the words "resident in Calcutta," in section 8, defining the qualification of voters. Upon this the hon. member in charge of the Bill said:—

"I do not attach any very great importance to this question, but on the whole I think it better to leave the Bill as it stands. As long as the the Suburbs and Calcutta were under entirely different bodies, a very large number of persons came into Calcutta from the Suburbs for purposes of business. Now these persons will be in Calcutta, and therefore the amendment will be inoperative; but under the amendment some persons living out of the enlarged Calcutta, such as Howrah or up the line, would still get a vote for the business which they carry on in Calcutta, and it is on the whole but fair that those who do not reside within the limits of the Municipality should leave the administration of its affairs to those who do."

The business which they carry on includes, I presume, business premises for which they pay rates, and I myself voted in favour of the amendment. I think that only fair; because a man who sleeps out of Calcutta, but carries on his business in Calcutta all day, has just as great an interest in the good government of the town as the man who lives in Calcutta, but carries on his business in the railway yard across at Howrah. On that ground I support the present amendment, as I did the previous one. But when I take the amendment in connection with what the hon. member proposes to move in section 9, I find a difficulty. By that amendment he proposes that any person qualified to vote under clauses (*a*) to (*e*) of section 8, shall vote in the ward in which he resides or pays rates. Clause (*e*) of section 8 says "having paid on his sole account and in his own name not less than Rs. 24 either in respect of rates levied under Chapter IV or in respect of taxes under Part I and Part II of Chapter III." Now Part II of Chapter III refers to the carriage tax and the license tax. We have already discussed the question whether a person who pays the license tax but resides out of Calcutta should vote, and it was decided that he should not vote. So that unless it is clearly understood in section 9 that paying rates does not include paying taxes, this amendment will include a number of persons as qualified to vote who were declared to be disqualified under the previous amendment.

The HON. SIR HENRY HARRISON said:—I think it is more than ever necessary that the Council should accept this amendment, not only because it is the only key by which a number of locks in the sections which follow can be opened, but because what my hon. friend has just pointed out was specially taken into consideration. I myself do not see any contradiction. Clause (*e*) of section 8 gives everybody who pays taxes to the amount of Rs. 24 a right to vote, provided he is otherwise qualified. Now that qualification will not accrue unless he resides in the town, or pays rates. He can help out his qualification by the payment of taxes, and that was always intended, but the essential qualification must be that he must either reside in Calcutta, or pay rates: if he does not reside, he must pay rates for property. If the Council adopts this amendment, all the subsequent parts of the Act will work consistently, as far as I have been able on a careful investigation to make out. The Chairman has a list of the owners and occupiers of houses, and prepares the list of voters from that. He does not know whether a particular person resides in the town or not; and if the payment of rates does not give the qualification, the list will contain the names of a number of persons who are non-resident. I maintain that, when the amendment was previously rejected, it was exactly on the opposite ground. The hon. member opposite (Dr. Gooroo Dass Banerjee) wanted to introduce the words "or carrying on business," to which I objected: if a man is a mere bird of passage, I purposely did not want to give him a vote. The whole tenor of the voting qualification is the payment of rates; and if you do not insert payment of rates in these sections, it will throw them out of joint; but if the words are inserted, it will bring them into joint again. It may be discussed separately whether this qualification should apply to the fifty elected Commissioners only, or to the whole seventy-five.

The motion that in line 4 of section 8, for the words "resident in Calcutta" the words "residing or paying rates in Calcutta" be substituted, was then put and carried.

The Hon. Sir Henry Harrison said:—With regard to section 4 in particular, I don't see any good reason why there should be a larger scope for the selection of the twenty-five nominated Commissioners than is given for the fifty elected Commissioners. It is admitted by the vote just taken that the fifty Commissioners must be persons either residing or paying rates. I am free to confess that, if a wider qualification is given to the twenty-five Commissioners, it will work; but that is not the intention, and I think it is better that all the Commissioners should have the same qualifications.

The Hon. Sir Alfred Croft said:—I think there is a very good reason for making a distinction between the elected and the nominated Commissioners. The qualification to be a Port Commissioner does not consist in residence or the paying of rates, but in being closely connected with the trade and commerce of the port; and the same is true of members of the Chamber of Commerce and of the Trades' Association. In these cases there is no need to impose restrictions which are necessary in the case of elected Commissioners.

The motion that in line 11 of section 4, for "residing, carrying on business, or personally working for gain" the words "residing or paying rates" be substituted, was put and carried.

The motion that in line 4 of section 9, after "reside" the words "or pays rates" be inserted, was put and carried.

The Hon. Sir Henry Harrison moved that the clause newly added to schedule III be transferred to the end of section 15. He said:—This is really an enacting clause, and ought rather to be attached to the section than to the schedule appended to it.

The motion was put and agreed to.

The Hon. Sir Henry Harrison moved that in line 12 of section 31, after "two electors" the words "in each ward in which he proposes to stand" be inserted; and that in line 14, after "eight electors" the words "in each such ward" be inserted.

He said:—This amendment is intended to remove an awkwardness in the wording of the section, from which it might be inferred that a person who gets two electors to propose and eight others to approve his nomination may start as a candidate for several wards; but the words in the section are based on the assumption that he stands for only one ward. It was certainly intended that he should have two electors to nominate and eight others to approve his nomination in each and every ward for which he may wish to stand. I think it is only right that no man should be allowed to stand for a ward unless he can get the electors of that ward to bring him forward.

The motion was put and agreed to.

The Hon. Sir Henry Harrison moved that, in line 7 of section 39, after "Local Government" the words "at its discretion" be inserted. This, he said, is really a verbal amendment. It has been pointed out by high authority that as the section stands the Local Government would have no authority to remove a Chairman unless on the recommendation of the Commissioners. I should not have thought that it would have that effect, but as there is no reason for leaving doubtful what is intended, it is better to insert the words proposed in order to remove all doubt.

The motion was put and agreed to.

The Hon. Sir Henry Harrison moved that, in Chapter IV and elsewhere wherever the expression occurs in the Bill, for "halalkhor rate" the words "sewage rate" be substituted. He said:—I place myself in the hands of the Council in this matter. We took the word "halalkhor" from the Bombay Act, but after doing so we adopted a definition of "sewage" which exactly meets the case. To my mind the term "sewage rate" is a better phrase.

The motion was put and agreed to.

The Hon. Sir Henry Harrison moved that, in line 4 of section 108, the words "by the occupier" be omitted, and that in line 7, for "from the occupier" the words "from the person who pays him rent" be substituted; and that in line 13, to the end of the section, for "rent payable by the occupier, and shall

be recoverable by the owner for him" the words "added to the rent and shall be recovered by the owner from the person liable for the payment thereof" be substituted. He said:—The object of these amendments is very much the same as the amendment already adopted in the definition of "owner." The section assumes that there is only one owner and one occupier. If the owner lets his house for Rs. 200, and the assessment is fixed at Rs. 300, the owner can say to the occupier, you only pay Rs. 200 as rent, you must pay the owner's rate on the other Rs. 100, as well as the occupier's rate. That has always been the rule. It is intended that the owner shall not pay the tax on a higher assessment than that for which the house is let. But in the area to be added, especially, the owner may not be the sole owner, but we may have sub-owners. The amendment is intended to save the case which may occasionally occur of a person not being an occupier who pays rent to the owner.

The motion was put and carried.

The HON. SIR HENRY HARRISON moved that, in line 15 of section 122, for "estimated cost of building" the words "estimated present cost of building the house" be substituted. He said:—This is the most important amendment on the list, and in regard to it I must throw myself on the indulgence of the Council, inasmuch as this is a motion which I made before and which was lost. Ordinarily such a course would be unjustifiable, and in fact I do not propose to take it in reference to any of the other motions which I made and were lost, because I have no sufficient reason to offer in regard to them. But for the motion which I now make there are very strong reasons, and if those reasons are considered sufficient, I hope the Council will accept this motion rather than allow the Act to go forth with a serious blot in it. This section of the Bill, it is well known, has caused more heart-burning than any other of its provisions, and the main cause of this is the fact that a certain class of the community have got off hitherto by paying from one-third to one-half of what they will have to pay under this section, which still will make them pay only about five-sixths of what the rest of the community are paying as rates. We have no reason to be surprised that a provision of this kind should create strong opposition. It is an opposition which would be met with under similar circumstances in any other country in the world. In France, for instance, the old French aristocracy, rather than submit to be taxed, brought on a revolution and their own ruin. It is obviously a self-interested opposition which must be experienced from any class which may be similarly situated. But as a matter of principle, it is the bounden duty of the Legislature to tax all classes alike. But while, as regards the justice of the case, I could not ask the Council to re-open a question which has been previously discussed and decided, when we come to apply the principle which has been adopted we are confronted with real difficulty. We find in England political economists like Mr. Mill and practical statesmen like Mr. Goschen, as well as the Courts of law, recognizing the necessity of some interpretation being put by the Legislature. The reasons given by them are in favour of one of two interpretations, either that the assessment shall be on the market value or upon the present cost of rebuilding the house; but no authority can be found in favour of taking the original cost of building; and so little was I prepared for the possibility of the Council adhering to the latter view that I scarcely directed a single argument against it. I directed my arguments to the principle that either the market value or the cost of rebuilding should be taken. I have the more reason to ask for the reconsideration of this question because I have reason to believe that at least one vote against the amendment was given on the ground that the hon. member thought the section as it stands means estimated present cost, and immediately after the vote was taken the learned Advocate-General drew the attention of His Honour to the fact that the decision was an extremely embarrassing one, because the interpretation which the Courts would be likely to put upon the words "estimated cost of building" would be the very same which the Council had rejected. I hope the Council will see that, having regard to the proper interpretation of these words, we shall put ourselves into an extremely embarrassing position, because the Courts may still attach to them the meaning which we rejected. On the other hand, the Courts may say, how are we to put a meaning which was rejected by

the Legislature? If, therefore, the Council wishes the words to bear the meaning which they intended, that meaning should be made clear.

Now as regards the arguments on the subject. There is a great deal to be said in favour of 5 per cent. on the market value being the test of the assessment. My own impression, after reading much which has been written on the subject, is that this in itself would be the better test; and if we decided to take the market value we should not require the exception which follows. But at the same time we have been advised by those who are experienced in the interpretation of laws that we should be introducing the greatest possible trouble, and therefore on the previous occasion that proposal was abandoned in consequence of the difficulty of rating property, and I will not ask the Council to re-open that question. But when we come to consider the other two proposals, then it is necessary that we should put in the section a defensible instead of an indefensible principle. The more the section is attacked, the more necessary it is that it should not be vulnerable on a point of this kind. Those who oppose the section naturally wish to see a principle incorporated in it which they will hereafter be able to find fault with because it fixes a wrong standard of assessment, but those who approve of the section ought to be on their guard against this danger. A house was built, say, a hundred years ago when materials and labour were cheap; it has been thoroughly repaired several times. What is the money spent upon that house? The original cost would be the cost of building the house *plus* the cost of repairs from time to time, *minus* the amount of depreciation, and that is a completely impracticable test. If labour and materials become dearer, there is no reason why the house should remain at the lower instead of the higher value. It is altogether an indefensible principle. The question for consideration is the worth of the house to whoever gets it. Suppose by some means a person builds a house at 50 per cent. less than any one else could build it. It is evident it will be worth to the owner the whole hundred per cent. The proper test, therefore, is what will the house now cost to rebuild it in its present condition after making the fullest allowance for depreciation. I daresay I shall be excused for again pointing out the grounds upon which Mill rejects the market value as a fair test. He says—

"When the occupier is not the owner and does not hold on a repairing lease, the rent he pays is the measure of what it costs him, but when he is the owner some other measure must be sought. A valuation should be made of the house, not at what it would sell for, but at what would be the cost of re-building it, and this valuation might be periodically corrected by an allowance for what it had lost in value by time, or gained by repairs and improvements."

This is a much more practical test, and the assessor, who is an experienced officer of the Municipality, could easily estimate according to this rule. If the estimate is disputed, builders and contractors can be brought in who would perfectly well know what the cost would be. But suppose the question is what did that house cost to build 40 years ago? It is perfectly evident that that must be a matter of pure guess work, and even worse, because it would open the door to all sorts of accounts being produced of what the actual cost was, in order to prove that the cost was considerably less than the surveyor's valuation. Whereas if the Legislature puts a proper interpretation, viz., what would be the estimated present cost of rebuilding the house, then you will have a test which can be applied without any extraordinary difficulty, making of course due allowance for depreciation. If the Council will adopt this principle, then I think, with the exceptional clause to which I have referred, we shall hold a defensible position, because on the one hand we take a true and proper test, namely, the actual amount of money in the house, and secondly we say that if a valuation of 5 per cent. upon the estimated present cost is excessive, a less rate can be taken. But if this interpretation of the meaning of the section is rejected, then I think the section will be altogether vulnerable, and it will not be reasonable to hold me responsible for the section which, without this interpretation, I admit will be indefensible. I therefore submit that I have shown sufficient grounds for asking the Council to allow the consideration of this question to be re-opened.

HIS HONOUR THE PRESIDENT said:—I rather regret that the hon. member in charge of the Bill, in bringing this question before the Council, should have done

so in such a way as to re-open the whole policy of the section and invite discussion on the section generally. I think he has very good ground for bringing the particular point before the Council, which is this. Does the Council mean that the estimated cost of the building should be the present estimated cost, or the estimated cost at the time when the house was built? The reason why I say he has good ground for bringing the question before the Council is that the outside opinion, as well as the opinion of experts generally, is that there is a blot in this section; that you are leaving a question open which ought to be decided; that the probability is that on reading the words "estimated cost" the courts would take the present estimated cost, but that the discussion which has taken place in this Council places a difficulty in the way, and you should say what the interpretation is. Under these circumstances, I think the hon. member has fair ground to ask the Council to decide which of these two views it will take. But if we open up the whole question of this rating clause, I cannot prevent hon. members from discussing it at equal length and with equal seriousness from another point of view. I would ask the hon. members of the legal profession to help us in this matter, both as to what course should be adopted, and also as to which interpretation should be adopted.

The HON. MR. ALLEN said:—In voting against the hon. member's former amendment I was influenced by the conviction that the words as they stand at present "estimated cost of building," truly interpreted, could refer to no other time than the time when the estimate is made. If any other time was pointed at, some indication of the time should have been introduced. If the intention had been to look back to the time when the building was put up, the clause should have run thus—"estimated original cost;" or if it was intended to refer to some future time, some words implying futurity should have been inserted. But the words "estimated cost of building" in their simplicity, to an unsophisticated mind could convey a reference to no other period of time than the time at which the estimate is being made. For that reason, partly, I voted against the amendment. But there was also another reason, namely, this. The amendment as originally stated was to substitute the words "present esimated cost;" but when the hon. member proposed it, he did not seem quite sure whether it should be "present estimated cost" or "estimated present cost," and he kept see-sawing from one to the other, and I was within my right in recording my protest against such vacillation. After having had ample time to consider the point, the hon. member had not been able to make up his mind. But I am free to confess that now the question stands upon a different footing. The fact that the amendment was lost may be used as an argument for putting on the words of the section a construction different from what I still consider their proper meaning, and therefore I am quite willing to vote for the present amendment; but I think the hon. member would obtain all he desires by simply prefixing the two letters "re" to the word "building," so that it should read—the estimated cost of *re-building*.

The HON. BABU KALI NATH MITTER said:—I must oppose this motion. This question was fully discussed by the Council, and the Council deliberately rejected the amendment proposed by the hon. member in charge of the Bill. The question was fully discussed, and we came to the conclusion that this amendment would be worse than the provision which is now in the Bill. We understood the meaning of the section to be the estimated cost at the time the house was built. Several hon. members of the Council met together, discussed the question, and came to the conclusion that they should oppose the amendment. Two of our hon. colleagues are now absent, and I think it extremely unfortunate that a matter of this sort should be brought forward again at this time. On that ground I also oppose the amendment, because it will not now have that amount of attention which it would have otherwise received, and which it received before. Who can say on what grounds those two gentlemen voted against the amendment. The cost of rebuilding now the large buildings erected in former times would be simply fabulous, and under the method of assessment proposed here, the owners of those houses would not think of building them. There are old buildings in the town which cover from five to ten bighas of land, and how unjust would it be to assess such buildings at 5 per cent. on the estimated present cost of building them, which would perhaps be a hundred times more

than when they were built. I submit that a proposal of this kind should not be allowed to be brought at this time, especially as the matter was thoroughly discussed at a full meeting of the Council, and also because it has been brought forward without the slightest previous intimation. All the intimation the Council has had is that the hon. member has obtained Your Honour's permission to bring forward verbal amendments. But this question, I submit, has already been settled, and that it is not competent for the Council to re-open it, principally on the ground that two hon. members who voted against it before are not now present.

The Hon. Dr. Gooroo Dass Banerjee said:—While I fully admit the necessity of having certainty in the law, and of avoiding uncertainty or any possible chance of it, I am still bound to oppose the amendment, and for this simple reason. Unless the question is discussed fully in the Council, and unless the Council is prepared to go fully over the same ground again, we cannot do justice to this particular amendment. The remarks of the hon. member in charge of the Bill clearly went to show that this amendment imperceptibly glides into the other amendment, viz., whether we ought to have the market value instead of the estimated cost. It has been said that the use of the word "value" applied to anything, is what it is worth to the owner just now, and not the money which it cost him years ago. If that is so, that brings us very near the other matter, namely, the market value. If we do not adopt the market value, there is hardly any reason why we should have the present estimated cost rather than the actual cost of the building or house when it was built. Then there are other difficulties in the matter. With regard to old buildings to which one of these provisions would apply, the materials of which they were built are practically historical now. Some of these houses were built of bricks only six inches long, none of which kind are now to be found, and it would be very difficult now to say what the value of those six-inch bricks would be. Then, again, we have many old houses with low windows and small doors which are of no value now, and if we are to apply the present cost of building with reference to these houses, we shall be exaggerating their value beyond measure. Would it be fair to apply the present raised standard value to houses which would not agree with the tastes of the present day at all? These are all serious objections which I have pointed out.

The Hon. the Advocate-General said:—I have to submit that those who oppose this amendment are making a mountain of a mole-hill. As I understand this matter, the amendment has arisen entirely out of a mistake which the hon. member on my right (Mr. Allen) acknowledges, at all events to this extent, that in voting against the inclusion of the word "present" he did it for the reason that this section as it stood read as if the word "present" already existed, and that that word was superfluous. That was the main ground on which he voted, and I believe I am right in thinking that my hon. friend Mr. Reynolds was actuated by the same reason. It is clear, therefore, that these two hon. members, if it had been brought to their notice that the omission of the word "present" introduced an ambiguity, considering that they were voting for the section as against the opposite view, would undoubtedly have voted for the inclusion of the word "present." At the time this motion was lost, I immediately perceived that a mistake had been made. Every member who voted for it intended that the rate should be on the present estimated value, and yet the word "present" was struck out. There were two questions before the Council then, as I understood the subject. The hon. member in charge of the Bill, who presented, I think, very forcibly and very fully a fair view of the case, said this:—In assessing a house we must proceed on the present value of the house: the present value of the house and land will determine the amount of the assessment. He said there were two ways of determining the present value. One is the market value; the other is the present estimated value deducting a certain amount for depreciation. These were the two questions he formulated. The estimated letting value was excluded altogether, because it had been found to be a fallacious test. The test of the market value was, I think, rightly abandoned for the reasons stated by the hon. member on my right (Mr. Allen). He pointed out that there was no market value, which is a value obtained by a certain multiple

of the letting value, which is an unknown quantity. Under the Land Acquisition Act, the Courts had decided that the value of house property in Calcutta is sixteen times the letting value; but as these buildings have no letting value, the assessment on the market value was abandoned. I submit, therefore, that the market value cannot be taken as the basis of assessment. We are thus forced to accept the present value as the basis. Any one who in opposition to that basis supports the position that the original cost should be the test, would in my opinion be dreaming of applying a test next to impossible, for it would be idle to suppose that at this present moment you could get evidence of what the original cost of a house built 50 or 60 years ago actually was. Such an idea I believe never entered the mind of any hon. member; those who oppose the amendment are trying now to support a view which was not thought of before. If you consider the two principles, whether the assessment should proceed on the original cost of the building or upon the probable letting value, the test of the original cost would land the Commissioners in as great a difficulty as the letting value. That test being left out of consideration, the Council clearly intended that the assessment should be on the present estimated value. But the wording of the section created an ambiguity; and that being so, the hon. member in charge of the Bill, when he found that the wording was ambiguous, deemed it his duty to remove all ambiguity and to render the meaning of the section clear and definite. Can that be said to be a re-opening of the whole discussion? I submit not; and I therefore contend that this is only a desire on his part to do that which he was bound to do. There is a great difference between re-opening a discussion, and simply asking the Council to express that which it really meant: there had been an unfortunate omission, and he desired to correct it; and it is as much in the power of the Council to do that as to correct a word which has been misspelt or a wrong word which had crept into the Bill.

The Hon. Sir Henry Harrison said:—I regret if I have in any way opened out the discussion in a wider sense than Your Honour thought it desirable; if I did so, it is due to an obscurity in expressing myself. What I did intend to press upon the Council was that, seeing that this has been such a controverted section on grounds which are perfectly explicable, seeing that it is the one section in the Bill on which attention will be concentrated more than on any other, its meaning and intention should be made as clear as possible. The only question I intended to open out is this. I think this discussion has abundantly proved that in reality the majority of the Council did recognise the proper test to be the estimated present cost of building the house, and in fact the hon. and learned Advocate-General seems to consider that it is utterly impossible to interpret the section in the opposite view. And I also pointed out that the vote took me by surprise. It occurred to me that the whole of the motion I brought forward on the previous occasion might be rejected, that the majority of the Council might be in favour of taking the market value as the test; but it never occurred to me that the test of taking the original cost would be adopted as against the estimated present cost. I assumed that if the test of the market value was rejected, the estimated present cost would be adopted, because those were the only two intelligible and defensible solutions of the difficulty. I regret very much that two hon. members of the Council are absent; but it seems hardly right that we should send this Bill out to the public with an admitted blot in it, a blot which my hon. friends would be the first to press upon us. They would fasten on this and drive us into a corner in consequence of the indefensible wording of this clause. It therefore seems to me that the Council would be acting in a very unreasonable manner if, on a question of interpretation, it refused the indulgence of re-opening the question with a view to state clearly what the section is intended to mean. I admit that I am asking the Council to do something very exceptional, something not justifiable except on irrebuttable grounds; but I think I have really made out the strongest ground for what I ask the Council to do.

His Honour the President said:—I feel myself in a position of some little difficulty as to putting the question before the Council, for I think the hon. members opposite have a strong argument to urge that they have not been allowed to re-open, in their own interest, the discussion of the whole question.

But in this particular matter we ought to look at what really happened in the Council on the occasion to which reference has been made. Then, the substitution of the words "estimated cost of the building" for these words "estimated present cost," was proposed by the hon. member in charge of the Bill, and not a word was said about it. Neither was the question of the actual interpretation of the law considered in the previous discussion as to what would be the interpretation of the words "estimated cost of building." We have learned that at least one hon. member voted against the amendment, not because he considered that the interpretation the hon. member in charge of the Bill wished to put upon it was wrong, but because he thought the amendment was superfluous, and that the section could mean nothing but what it was desired it should mean. How many hon. members followed and took the same ground is more than I could say. But I have to point out, with reference to the observation of the hon. member opposite (Babu Kali Nath Mitter) that two hon. members who voted against the amendment were now absent, that I have before me the division which was then taken, and I find from it that the Hon. Moulvie Abdul Jubbar voted for the amendment and the Hon. Mr. Moore voted against it. Practically those two votes cancel each other, and the question therefore concerns not the members who are now absent, but those who are present. I have to choose between two unpleasant alternatives—to let the Bill go forth with a very great blot in it, leaving an ambiguity which the Council know is an ambiguity, and which, if not corrected, will lead to great trouble in the future; or, I will not say to strain a point, but at all events to bring before the Council the reconsideration of a point which I confess is a little more than technical. Under these circumstances, I think it is my duty to let the motion go to the vote.

The motion was then put to the Council and carried on the following division:—

Ayes 6.	*Noes* 4.
The Hon. Mr. Pratt.	The Hon. Dr. Gooroo Dass Banerjee.
„ Sir Alfred Croft.	„ Dr. Mahendra Lal Sircar.
„ Sir Henry Harrison.	„ Babu Kali Nath Mitter.
„ Mr. Allen.	„ Mr. Macaulay.
„ Mr. Reynolds.	
„ The Advocate-General.	

The HON. SIR HENRY HARRISON moved that between clauses 4 and 5 (line 29) of section 138, the following be inserted:—

"When there are gradations of owners or occupiers, and doubt exists as to who is entitled to be registered as owner or occupier of any premises, the Commissioners shall determine which of the several owners or occupiers is entitled to be registered as such, and their decision shall remain in force for the purposes of this Act till set aside by the order of a competent Court."

Also that, after section 448, the following new section be inserted:—

"Whenever by this Act any right is conferred or duty imposed on the owner or occupier of any premises, and doubt arises owing to there being gradations of owners or occupiers as to who is the owner or occupier entitled to exercise such right or bound to perform such duty, the Commissioners may, after due enquiry, determine from time to time which of such persons is thus entitled or bound:

"Provided that, if one of the persons regarding whom doubt exists is registered under section one hundred and twenty-eight as owner or occupier, such person shall be entitled to exercise such right or bound to perform such duty till his name has been duly removed from the register."

He said:—The Bill is full of rights conferred and duties imposed on owners and occupiers. They have the right to vote; the Corporation has the right to compel them to take certain order with their premises, &c.; but at the same time in the area now to be added to Calcutta we may have difficulty in determining who is the person where there are several grades of owners, and similarly in the case of occupiers. Suppose a house is let to A, who leaves Calcutta and lets the house to B, which of the two is the "occupier"? There should be some mode of solving the difficulty. I propose in the first instance to give power to the Commissioners on due enquiry of deciding who is, for the purposes of this Act, the owner, or who is the occupier, amongst the various grades of owners and occupiers. Subject to certain limitations, if one of these owners has registered himself as owner, we hold him to be the owner for the purposes of rating and

performing the duties required of him; but suppose more than one person has so registered himself, then it is necessary to have some means of deciding which of these is for the purposes of the Act to be considered the owner, and therefore I propose to introduce a clause providing that the Commissioners shall decide which of them shall be considered the owner, leaving the owner who thinks himself aggrieved to go to a competent Court and establish his right to be registered. If we have the owner and occupier registered, we can deal with them in the first instance. It is obviously necessary that there should be some means of deciding, in case of doubt, which of several grades of owners is to be considered the owner, and I therefore ask leave to move these two sections as the best solution which I can suggest.

The motion was put and agreed to.

The Hon. Sir Henry Harrison moved that the words "so far as may be reasonably practicable" be transferred from line 4 so as to stand after "Commissioners" in line 1 of section 153. He said:—It has been pointed out that these words are so placed in the section as to make a great anomaly, because the easier task of supplying water at low pressure is only made obligatory so far as may reasonably be practicable, but that condition will not apply to the keeping up of high pressure at 30 feet, which will be a far more difficult task under certain circumstances. Therefore it will be better to put the qualification into the forefront of the section, so that it shall apply to the whole section, instead of only to the supply of water at low pressure. So far as is practicable we are now bound under the present Act to supply water at a pressure of 50 feet, and although at the pressure gauge that pressure can easily be kept up, the pressure in houses even to half that extent cannot be maintained, and yet no one has brought any suit against the Corporation, and the section might probably stand as it is without any fear of our being molested. But the fact of attaching the qualification to what is by far the easier task and leaving it out in respect of what is more difficult, is an anomaly which, I think, ought to be corrected.

The Hon. the Advocate-General said:—I shall oppose this amendment. I think the Commissioners are bound to give water at a pressure of 30 feet between 6 o'clock and 8 o'clock in the forenoon. I think a discretion may be allowed to the Commissioners in respect to one of the modes of supply, but I think one portion of the requirements of this section should be imperative. I therefore object to transferring the words "so far as may be practicable." The hon. member in charge of the Bill has advocated very forcibly the interests of the Corporation in raising taxation, but he should also bear in mind the interests of the public.

The Hon. Sir Alfred Croft said:—The whole discussion on this subject outside the Council has understood these words as applying to the second clause of this section equally with the first, and I was surprised to find that the hon. member in charge of the Bill allowed the words to remain in what was evidently the wrong place. The sword of Damocles has been hanging so long over the head of my hon. friend, that he has lost all fear of its falling upon him; but it will clearly be better to protect him against the consequences of an accident.

The Hon. Sir Henry Harrison said:—If this provision is going to be put into force, it will in some cases be found impossible to drive the water to all houses up to a height of 30 feet, especially after the occurrence of a fire, when as much as half the day's supply may be consumed in the course of a few hours. I do not think I am unreasonable in asking the Council to adopt this amendment.

The motion was then put and carried on the following division:—

Ayes 7.	*Noes* 4.
The Hon. Dr. Gooroo Dass Banerjee.	The Hon. H. Pratt.
The Hon. Baboo Kali Nath Mitter.	The Hon. Dr. Mahendra Lal Sircar.
The Hon. Sir Alfred Croft.	The Hon. T. T. Allen.
The Hon. Sir Henry Harrison.	The Hon. the Advocate-General.
The Hon. C. P. L. Macaulay.	
The Hon. H. J. Reynolds.	
His Honour the President.	

So the motion was carried.

The Hon. Sir Henry Harrison moved that section 412 (d) be worded as follows:—

"The deposit, whether in the public street or otherwise, of rubbish and offensive matter, the removing and carrying away of the same and charging the person responsible for such deposit with the expenses of removing it."

This, he said, is an amendment regarding the framing of bye-laws. We are entitled to make bye-laws for the removal of refuse, and especially trade refuse; and a bye-law was passed making the deposit of trade refuse on the streets without a license punishable; but it was held that the passing of such a bye-law was *ultra vires* under the present Act, and we are in some cases driven to the necessity of removing such refuse from the houses of traders, or of leaving it there as a nuisance to the neighbours. That especially happened in the case of a certain large cow-house, the owner of which would not pay for the removal of the refuse, and would not throw it out on the streets, because it was pointed out by some that the word "deposit" in the section would be read as depositing it on the streets, and therefore the bye-law would not hold good. It is therefore, I think, desirable to amend this section so that the word "deposit" shall be interpreted to apply to deposit whether on a public street or otherwise. I think this a perfectly reasonable proposal. There is no reason why a tradesman should escape because he keeps the refuse within his house.

The motion was put and agreed to.

The Hon. Sir Henry Harrison moved that the Bill be now passed. He said:—After the discussion we have had to-day, and having regard to this late hour, I daresay the Council will think it unnecessary for me to make any long speech on this occasion; but if it is necessary for me to do so to meet any objections which may be raised, I shall have an opportunity of doing so before the vote is taken. For myself I know that the Bill has caused a great deal of vexation and irritation, but I can only say that I have endeavoured to be studiously fair in the provisions bearing on the questions of taxation or of the public burdens, and I believe also that with regard to the constitutional question we have carefully considered the claims of all sections of the community and have steered a fair middle course, guiding ourselves mainly by the experience gained in the past. I do not think the Bill at all deserves the imputation of a one-sided Bill, and I believe that, as far as possible, it is fair to all parties and interests in the Corporation. I admit that in the sections regarding building regulations and bustees new burdens are placed upon the owners of property, but these I believe to be necessary. It is undoubtedly necessary that the owners of property should discharge their duties in connection with that property. It is well known that the value of land has increased to an enormous extent, partly on account of the trade and commerce of Calcutta, and partly on account of the improvements which the municipality has effected. The fresh burdens imposed on owners by this Bill are a mere drop in the ocean as compared to the additional value which the land has acquired in recent years. Therefore, as far as concerns the operations of the municipality on the value of property, it is clear that we are making a fair and legitimate claim if we ask owners to perform such duties as are performed in all civilised communities by the owners of property for the well-being of the community. The true objection to the sanitary sections of the Bill is that they will be found to be almost inoperative. They should not be so, but the difficulties for some years to come will be very great. I am hopeful that the working of this Act will in a very short time tend to diminish the apprehension with which it is now viewed. Of course in regard to those whose apprehension is that they will have to pay an equal share of taxation it cannot do so, but in all other respects I am sanguine.

The Hon. Baboo Kali Nath Mitter said:—I am constrained to raise my opposition to the Bill being passed in its present form. I am quite aware that my opposition is a feeble one and will be of no avail; still I deem it my duty to place upon record, in the most distinct terms possible, my opposition to the passing of the Bill. Perhaps Your Honour is aware that to some extent, if not to a material extent, I aided in the passing of a resolution in favour of the amalgamation of the Suburbs with the Town. After that resolution was

forwarded to Your Honour's Government, a Committee was appointed to prepare a scheme for the amalgamation, of which I was one of the members, and in that Committee also to some extent I aided the scheme. Again when this question was brought up in Council, I gave my vote in favour of the introduction of the Bill. But at the time I did all this I had not the remotest idea that the series of amendments I subsequently brought forward would meet with the fate they did. I thought some regard would be paid to the opinions expressed by persons capable of forming opinions on matters of this kind. I thought that the opposition raised by communities which are capable of judging in matters of this description, would weigh with the Council. But I find that the clauses of the Bill have been adopted in total disregard of the representations made by the Municipal Commissioners, the members of the British Indian Association, the Indian Association, and the residents of Calcutta who called a public meeting and presented a memorial on the subject. The various amendments which I moved have shown the nature of my opposition to the Bill; but it does not follow that I ever expected that all these amendments would be carried in Council. It may be that I have been very unreasonable: so unreasonable that out of a series of amendments extending over a hundred and fifty, only some minor and unimportant amendments (I think there were three) should be carried. But my experience is that in other places, when I have the privilege of moving amendments, more than seventy per cent. of them have been carried, and therefore it was a perfect surprise to me that this Council should have thought fit to reject amendment after amendment which I had the honour to lay before them. Of course my hon. friend the mover of the Bill is responsible for it, and the responsibility will rest with him so long as this Bill remains law. I have, however, every hope that before many months elapse the Municipal Law will have again to be placed on the anvil of legislation. I have no doubt that, so long as my hon. friend is at the head of the Municipal Corporation, he will, if this Bill is passed, do his utmost to work the law in the best manner possible. But will his successor do the same thing? That is a point on which I have serious doubt. The innovations which have been introduced in the constitution of the Corporation, the various duties which the Commissioners will have to perform, the inadequacy of the funds placed at the disposal of the Commissioners, are all matters on which amendments were proposed by me. It will be useless to take up Your Honour's time and that of my hon. colleagues by referring in detail to the various matters which have been discussed. All I need say is that the Bill in its present form will be unworkable; many of the sections passed will remain dead-letters, but if they are not allowed to remain a dead-letter, the hardship and oppression that will result will be intolerable. The sanitary provisions introduced into this Bill will, if carried out, bring about a change which is to be deplored. It will be possible also to interfere with the religious sentiments of the people under the provisions of this Bill; it will be possible to interfere with private rights beyond all measure; it will be possible to deprive people of their property where even there is no absolute necessity for it; it will be possible to put parties to endless trouble and annoyance when they apply for sanction to build a house in Calcutta; and it will be possible to open a wide door for the levy of blackmail. I will remind Your Honour that, during the administration of one of your predecessors, a Municipal Bill was passed by this Council in total disregard of public opinion and in total disregard of the opposition raised in different quarters; and the fate of that Bill was that it was vetoed by the Viceroy. The noble Statesman who then ruled over the Empire, in vetoing the Bill, said this:—After enumerating his objections to the several new taxes sanctioned by the Bill, His Excellency said:

"Apart from these objections to particular portions of the Bill, His Excellency can only regard the whole measure as calculated to increase municipal taxation in Bengal, and he believes that such an increase is unnecessary and inexpedient at the present time." His Excellency added: "It is true that many of the provisions of the Bill to which His Excellency objects are permissive, and depend for their introduction upon the exercise of the powers committed to the Lieutenant-Governor of Bengal. The present Lieutenant Governor has expressed his intention to use with great caution and reserve the power which would be placed in his hands; and His Excellency cordially agrees with the sentiments expressed by His Honour that it is unwise 'to push far sanitary and other regulations which may affect some future good at the cost of great individual vexation;' and that in introducing such regulations we must recollect 'not only that our knowledge of

these subjects is yet imperfect, but also that much regard must be had to the habits and feelings of the people, which, even in Europe and still more in this country, are opposed to great innovations in matters affecting their daily lives in their homes and neighbourhood;' but, while entirely concurring in these views, His Excellency must, in dealing with the Bill, look rather to the powers which it confers than to the extent to which for the present it is proposed to make use of those powers. If he objects to any material provisions contained in a proposed law for which his assent is required under the Indian Councils Act of 1861, it is not sufficient for His Excellency to be informed that the officer invested with discretion as to their introduction considers that action should be suspended or deferred. No feeling of confidence in the discretion of any one man, in whose power the administration of a law may for the time being be placed, would, in His Excellency's opinion, justify him in assenting to a measure, to any essential provisions of which, if fully brought into operation, he entertains such serious objections as he does to some of those which are contained in the Bengal Municipalities Bill."

I hope and trust that when this Bill is submitted to His Excellency the Viceroy it will meet with the same fate as did the Municipal Bill of 1874. For myself I cannot be a party to an Act which, under the garb of law, sanctions the spoliation of private property. I cannot be a party to an Act which is likely to interfere with the religious feelings of the people, which will materially affect the inherent rights of private property, which authorises legal presumptions being raised contrary to all the principles of the law of evidence, which authorises the forcible detention of private property after it has been improved by municipal agency, and, above all, which authorises a method of assessment which is unknown and which will injuriously affect the owners of property who are also occupiers of them. Under all these circumstances, I cannot refrain from emphatically entering my protest against the Bill being passed in this form.

The HON. DR. GURU DAS BANERJEE said:—I regret that I also am constrained to oppose this motion. I am fully sensible of the fact that the objections I have to urge against several provisions of the Bill have all been considered by the Council, and though I have not been more successful in my amendements than my hon. friend, still I deem it my duty to thank Your Honour and my hon. colleagues for the patience and attention with which my feeble words have been heard. If I have been unsuccessful in my amendments, the only thought which oppresses me is that the objections I have urged had not a better advocate; for so strong is my conviction as to the justice of my objections that I cannot help thinking that they would have prevailed if only my case had been better put. I say this with all respect for my hon. colleagues. I may add that in the compensating economy of nature I have had an advantage which perhaps my hon. colleagues had not, for my respect for their judgment and my diffidence in my own have made me devote the most anxious attention to every point in which I differed. But I should be wanting in sincerity if I were not to say that the result has been to confirm me in my own opinion. And the reason is not far to seek. I and my hon. colleagues have viewed matters from very different points of view. An ideal standard of improvement and progress has been the sole aim of my hon. colleagues, while I, on the other hand, though yielding to none in my earnest desire for sanitary and other improvements, have had much of my eagerness for improvement restrained by the stern realities of our situation, of which, I venture to think, I can form some opinion. I find, for instance, that with our limited funds, with only a doubtful and very remote chance of the duty on petroleum being allowed to be levied, the amalgamation scheme is not likely to prove a success, while it will prove oppressive by raising the taxation on the poor population of the Suburbs without giving them a *quid pro quo* in the shape of municipal improvement. I find, again, that the reduction in the popular element in the constitution of the municipality which will result from the operation of the scheme of plural votes and special constituencies, will not only interfere with the popularity of our municipal administration, but will render the enforcement of the new stringent building and other regulations attended with considerable hardship. I find, again, that some of the provisions of the Bill are characterized by an utter want of regard to private rights. Then, again, I find that there are certain sanitary regulations in the Bill which will interfere so largely and so minutely with the daily life of the rate-payers as to be wholly unsuited to the circumstances of the country, and to be repugnant to the feelings and sentiments—religious, social and domestic—of several large sections of the

heterogeneous population of the metropolis. I find that the Bill has these and many other objectionable features, which are so strong to my humble apprehension that I think I shall not be doing my duty if I were not to record my respectful but emphatic protest against the passing of this Bill into law. My only apprehension was lest by so doing I might stand in the way of improvement and progress; but I am relieved of that apprehension from these considerations. I think the existing law is quite sufficient for the present, and for a quarter of a century to come, for Calcutta; and if something is wanted for the Suburbs, it is not so much a new law as additional funds; and if therefore Your Honour's Government grants to the Suburban Municipality the pecuniary help that is offered to the amalgamated municipality, improvement in the Suburbs would follow as fast and as efficiently as under any scheme of amalgamation.

The Hon. Sir Alfred Croft said:—I think that the significance and importance of the opposition to this Bill which has been expressed by the two hon. members who have just spoken can hardly be overrated; representing, as they claim to do, that community whose interests are chiefly affected by the measure. Still, it seems to me desirable to examine a little closely the objections which they have raised and the charges which they have brought against the Bill. The objections which have been raised are of two kinds, representing two different and even inconsistent sets of ideas. One class of objections condemns the Bill because it allows too much power to the municipality; the other class condemns it because it allows too little power to the municipality and gives the Government too great a power of control. The first class of objections refers to such provisions as the building and bustee regulations, regulations to prevent overcrowding and the spread of infection, the right to acquire land for the public benefit, and matters of that kind. The course of debate on all these questions involving an increase of the powers of the municipality, has been marked by one special character, which is no doubt present to the minds of members of this Council. It is that to which reference was made by the hon. member on my left (Baboo Kali Nath Mitter), when he said that he did not expect his amendments to be carried because of the persistent majority in the Council. I must say that it was not altogether a pleasant thing for the members of that majority to find that on so many occasions when a division on those questions was taken, there were eight European members on one side and four native members on the other. This was by no means uniformly the case, but it occurred often enough to give the fact significance. The fact is a perplexing and painful one when we consider that this Bill affects the interests of natives of this country much more widely than it does those of Europeans. But what is the explanation of that majority? I have read the public papers, and I see that it is sometimes called the official majority. It is only necessary to mention that, in order to discard the idea that there has been anything in the least degree approaching to official coercion or influence exercised. The true reason of that majority I take to be that those who constitute the majority are Europeans who really believe in municipal government, while you who oppose it do not believe in it, or at any rate not to the same extent. Looking at it in that light, I see no difficulty in finding an explanation of the majority. Belief in municipal government is natural to Englishmen from their birth; they have been fighting and struggling for it for five or six centuries. With the people of India, on the contrary, it is an exotic; it has been only recently introduced among them; it has not grown with their growth, nor strengthened with their strength. And if they are reluctant to press it on too quickly, if they are inclined to put off for a quarter of a century what we regard as necessary reforms, it only shows the difference between those who believe in municipal government, and those who are reluctant to believe in it because it is not a part of their birthright. What we understand about municipal government is this, that people who live in a municipality must learn to subordinate their individual interests to the general good, and that this subordination has to be enforced not only in matters of private freedom, but also in respect of private property. That is of course not peculiar to municipalities, but is common to every form of civil government. The practical question is, where will you stop? With regard, for example, to the provision as to overcrowding in private houses, we maintain that we are doing what the Legislature has a right

to do; while hon. members opposed to the Bill deny that. Therefore the question comes back to this: what are the limitations to municipal freedom? The opposing members maintain that a municipality has at any rate no right to interfere in private and personal matters of that kind; and in support of their contention they declare that their opposition is shared by the whole of those who will be affected by the Bill. I very much doubt whether they have any solid ground for making such a claim; and on that point I will read to the Council an extract from a Bengali paper called the *Sanjivani*, which, next to the *Bangabasi*, has perhaps the largest circulation amongst the vernacular papers in Bengal. That paper says :—

"Section 122, which imposes a 5 per cent. rate upon the estimated cost of dwelling-houses, is a very good provision. It will do away with every anomaly now existing in connection with the assessment of rich men's houses; for those houses are now assessed more lightly than the houses of poor and middle class men, and it is very surprising that the poor rate-payers of Calcutta have joined with the rich in protesting against a provision which is so equitable from their own standpoint. Objection has also been taken to this provision by saying that it may serve as a deterrent to those who would otherwise build spacious rooms to live in, and that the cause of sanitation may thus suffer harm. But if the best way of improving the sanitary condition of the town be to clear bustees of all their poor occupiers and to build thereupon palatial residences and let those that build those residences pay only half as much in the shape of taxes as had been paid by the evicted poor, why not abolish the Municipality altogether, and declare the few rich men of the town its absolute proprietors?"

So much for the rights of private property. Then with regard to personal freedom it goes on :—

"The sanitary sections, which will invest the Executive with the power to declare buildings to be overcrowded or unfit for habitation, are also very good and reasonable. If the provision as to overcrowding be condemned on the ground that its working may be attended with hardship to the poor people, the very taxation of poor people must also be condemned; and if it be considered wrong not to allow a man to live in a house which is unfit for habitation, it must also be wrong to prevent the man from committing suicide who is about to do so, or to punish him for attempting to kill himself."

Those are reasonable arguments, put forward by a paper which is the representative of a large and influential class of the population of Bengal; and in face of these objections I do not see how it can be contended that the inhabitants of Calcutta are unanimous in their opposition to the Bill.

Next, there is the other class of objectors—those who base their objections to the Bill on the ground that it confers too great powers of control on the Government, and needlessly limits the powers of the Corporation. The sections now objected to are those which relate to the proportion of nominated Commissioners, to the appointment of the Chairman by the Government, and also more particularly the control sections; and it is claimed that at this stage of its history the Municipality of Calcutta should be left, if not entirely, yet to a great extent free from the control which these clauses impose. The question, therefore, arises, should we be safe in allowing this claim? For my part, I confess that I see no ground for any strong expression of dissatisfaction with the Corporation of Calcutta during the years it has been in existence. Speaking as an occupier, I should say that the Municipality is well governed, it is well watered, well lighted, well drained, well watched; in fact in all those points by which one can judge of the success and value of a Municipality, the Municipality of Calcutta comes out well. But successful as the Corporation has been in the past, the Calcutta Municipality is still a young institution. It has not had an existence of five hundred years as municipalities in England have had. Its life extends only to a period of ten or twelve years as an elective municipality; and however thriving it may be, whatever promise of future strength and stability it may give, it is still in the stage in which it is liable to infantile diseases and infantile caprices, and to that liability it will be subject until it has taken far deeper root in the convictions and the daily life of the people. There is every reason to hope that it will go on improving; but still the Government would be neglecting a clear duty if it abandoned those functions of supervision and control which are necessary to keep the Calcutta Municipality in the straight path in which it is going. The conditions of Calcutta are indeed so exceptional that it is essential for the Government to exercise a watchful control over its sanitary state. To refer to a

recent incident, a few weeks ago Sir Donald Wallace accompanied the Viceroy when His Excellency went to see some of the less wholesome parts of Calcutta. A day or two after, Sir Donald Wallace had symptoms of cholera. Some people because they believed it, others perhaps because they were glad to have a fling at the Municipality, attributed the attack to the fact of his having accompanied the Viceroy to these unsavoury places. But if, instead of His Excellency's Private Secretary, it had been the Viceroy himself who had been attacked, the name and reputation of Calcutta throughout Europe are not so secure but that you would have found every newspaper in Europe ringing with indignant denunciations of the supineness and folly of the Government in allowing a plague-spot like this to remain uncleansed. Therefore I say it is imperative on the Government to retain the powers of control which are given to it in this Bill. I have referred already to those objections which have been raised to the Bill because it gives the Municipality too much power in enforcing sanitary arrangements. That implies a want of faith in municipal government; and the fact that these objections have been raised seems to me to supply another reason for insisting upon those powers of control which the Bill provides. Those who hesitate to give the Municipality large powers in sanitary matters are not the persons who may be trusted to work them as vigorously as the case requires. Municipal institutions are one of those advantages which India owes to the foreign government of England; and no discredit attaches if they have not as yet advanced to that degree of stability that is found in the country of their origin. But the effect of the introduction of municipal government has been that sanitation and everything else has improved, and I hope will go on improving; and as regards the objections to this Municipal Bill I trust they will soon disappear. The most violently abused reforms of yesterday are the accepted principles of to-day. Look at the stormy opposition which was raised to the introduction of the water-supply and the under-ground drainage, and now these are looked upon as the greatest of blessings. And I have good hope that when in the course of years this Bill again comes under revision, the inhabitants of Calcutta will have found that it has worked smoothly and well, and that the objections which are now raised to it will have altogether disappeared.

The Hon. Sir Henry Harrison said :—In closing this debate I only wish to say two things. *First*, I thank Sir Alfred Croft for reminding us that this is not the first occasion on which a very large and influential community in Calcutta has been extremely bitter against a certain proposal. We had in the opposition to the water-supply an exact counterpart to the opposition which is now raised by the identical community who were willing to do everything in their power to prevent it, and now they admit that there has never been any more beneficial work than the water-supply of the town. In the same manner, leaving aside the question of individual interest, I am strongly in the hope that, as years roll by, the other provisions in this Bill which have excited so much opposition will be found to have worked for the well-being of Calcutta. But apart from that I but give expression to my inmost conviction when I say that the impression that I have formed, more than anything else from my seven years' connection with Calcutta, is that the wealth and prosperity of the town are absolutely bound up with its commercial prosperity. It is absolutely by its trade, its commerce, and its industries, that Calcutta is what it is. Throughout these protracted proceedings all the objections which have been taken really turn on this, that the Bill has carefully watched the interests of the industries of Calcutta in their widest sense, and the contention has usually amounted to this, that those interests ought to give way. And, besides that, there is another very large class whose interests deserve to be carefully watched. I mean those thousands of the labouring community who are in a lower degree the life-blood of Calcutta, and who, it is only true to say, have entirely gone to the wall in the municipal arrangements of the town. I believe this is the only town in the world in which we take rates on the almost rack-rents paid for huts and make them the foundation of assessment, and in addition to that we have another system by which we impose a rate on huts for one kind of service which amounts to no less than 10, 15, or 20 per cent. on the rent. I know that these classes have no voice. I shall get no thanks from them, and they will probably follow their natural leaders in the opposition which has been raised to this Bill. But though these classes have no voice, and will probably not be conscious of the benefits done to them, yet I felt bound to think of their

interests. The whole system of the consolidation of the rates has been framed largely with the view of relieving them of the burdens from which they suffer. The Bill itself is no doubt beset with difficulties. The amalgamation is perforce a work which cannot be carried out without great friction and dissatisfaction. To suppose, therefore, that the passing of the Bill will lead to immediate amendment or satisfaction is absurd. A new Bill like this, introducing a variety of new elements and, above all, largely increasing the jurisdiction of the town, must necessarily at the first start lead to embarrassment and friction in many ways; but when those particular difficulties have been overcome and the machinery of the new Act has been brought into fair working order, it will lead to considerable improvement in the municipal administration of the town, and, impressed as I am with that hope, I ask Your Honour to put the motion to the vote that the Bill do now pass.

His Honor the President said:—Before putting the question to the vote, I wish to be allowed to say a few words on the general aspects of this Bill, and on the remarks that have fallen from the Hon. Members opposite. It were idle to deny that the Council is in regard to this Bill by no means in harmony with a large body of native public opinion in Calcutta. There is no doubt that to one very influential element of the community the Bill is distasteful, because it does not go far enough in relaxing the bonds of Government control and interference; it does not reduce the proportion of nominated members; it does not provide for an elected Chairman; it does introduce a power of effective control by the Government. Another large and influential body object even more strongly to those provisions of the Bill, which give the Commissioners power to interfere with private property for the benefit of the community; the power of regulating buildings and enforcing sanitation, and above all, probably, the provision to which exception is most generally taken is that which fixes the annual value of houses, whose letting value cannot be ascertained, at 5 per cent. of the estimated cost of building. To me it is a matter of great regret that a Bill, which was initiated for no other purpose than that of providing the amalgamated municipality with a better system of Government, and which was drawn out under the auspices of such a proved friend of self-government as the distinguished Chairman of the Municipality, should have given rise to so much irritation and dread. I may and do consider much of the apprehension groundless, but I do not deny that it exists. I can even sympathise with the irritation which a large section of the public must feel, at finding that their opinions, which in the Municipality are largely dominant, are here both in Select Committee and in Council resisted by a compact phalanx of opposition consisting not solely of the official element by any means (for the line of cleavage is not between official and non-official), but of one which is, at all events, non-Hindu. Now no one can set more value than I do on legislating in harmony with public opinion, and I should always advocate making concessions where this can be done without sacrificing vital principle, and where it will have the effect of disarming opposition. But I think a little consideration will show that the Council are justified, notwithstanding this feeling of hostility, in maintaining their own views, and in declining to modify the main lines of the Bill in accordance with the wishes of those of whom I speak.

For, as I have already pointed out, this Bill has been threshed out twice in Select Committee—a Committee which latterly consisted of three-fourths of the Council. This Committee had before them not only the various memorials received from public associations and bodies. They had also the views of the opposition most ably enforced by their two principal representatives in this Council. But they had also the views of another and very important section of the community—those who represent the Commerce, the trades, and in a general way the European element of the community. They had also before them the views of the Health Society—a body that can make its voice heard elsewhere than in Calcutta. Now it is well known that if the representatives of the Hindu community thought the powers of control and of interference with individual liberty went too far, it is equally certain that the other section of which I speak thought the Bill does not go nearly far enough in providing for effective sanitation and for the interests of the minority. Both these opposing influences were brought to bear on the Committee. The Committee, as Sir Henry Harrison pointed out at an early stage of the debate, took up a line between the two sections, and though on the whole, no doubt, it leaned to the views of the latter section as more in accordance with the requirements of the times, they rejected what they considered the extreme

demands of both parties, and what they presented to the Council was practically the irreducible minimum beyond which they were not likely to go in rediscussing the matter in Council. I would wish, however, in considering these questions of control and sanitation together, to look at the matter from a somewhat broader point of view. Now it can scarcely be denied—in fact it is one of the main arguments of the opposition—that neither the habits nor the views of the Hindu community on the subject of sanitation are in touch with those accepted at the present day by public opinion in Europe, and it will be said "then why force on the Hindu community your western ideas and practices for which admittedly the former are not prepared?" Well, the reason is that the Government is responsible in this matter to a much wider public opinion than even that of the Hindu community in Calcutta. It must be remembered that Government in its dealings with the local municipality is not negotiating with an independent potentate, whether friendly or hostile. In the long run the Government is itself responsible for the administration of the Calcutta Municipality. It has delegated its powers to a certain extent to the local community on the just and wise principle that a local body can best deal with local affairs, but this principle has its limits. From this point of view the municipality is a part, a department so to speak, of the Government, and the Government as I have said is responsible for the way its affairs are managed, responsible in the first instance to the people themselves, but secondarily responsible to the much larger public in Europe, who may either be, or may fancy themselves to be affected through the commerce of Calcutta, by the sanitary condition of the city; and that public opinion, let me tell you, has in the Suez Canal quarantine regulations a very potent and effective method of making its voice heard. So potent that it may almost be said to hold the existence of your commerce and therefore of the prosperity of this city in its hands. I have put forward this argument first, as it is based on the utilitarian grounds which appeal to everybody. But if some of these reasons did not exist, I should still say that it was the duty of Government, in spite of opposition, to keep in its hands the power of maintaining an effective control over the sanitation of this great city for the health of which it is responsible, and that in this matter it is the duty of Government to lead and not to follow the less instructed public opinion of the time and place. I am not one who would treat with ridicule or with anything but respect sincere prejudices even when in my opinion quite unfounded, but I have great faith in the faculty of adaptation to environment, and as Hindu feeling has successfully adapted itself to much more perilous changes, such as the abolition of suttee, travelling by rail, medical tuition, the Calcutta water-supply, about all of which the prophets of evil had many hard things to say, so I believe will it very readily reconcile itself to the removal to a hospital of a houseless wayfarer when stricken with an infectious disease, and to compelling a landlord to purify an infected chamber before letting it out to a fresh lodger. At the same time I feel sure that the powers with which the municipality is armed in dealing with private property will be exercised with all leniency, and that Government in exercising its powers of control will not lose sight of the prevalent feeling on the subject.

Turning now to the new rating section, I am bound to say that the principle which underlies that section is manifestly so fair and so reasonable that as an abstract principle it cannot be gainsaid. It is manifestly unjust that if A and B live in houses of equal value they should be unequally taxed. A, whose house is a rented one, should not pay double what B does, merely because B's house is his own, or even his ancestral property. So far I suppose we are all agreed, but when we come to apply this principle and try to discover a reasonable method of ascertaining the real value of B's house, then the difficulties begin, and denunciation is apt to take the place of argument. I do not wish to add to the irritation prevalent on the subject, so I shall not notice the hard words and exaggerated language used concerning it. But I would point out that the argument founded on the danger of fraudulent and *benamee* leases being multiplied, comes with bad grace from those who are at the same time urging the more complete emancipation of the Municipality from Government control.

I think, too, there may be in the public mind, not perhaps in the minds of the few who lead, but of the many who are led, some real misapprehension about this matter. I was much astonished to hear the rate denounced by a gentleman for whom I have a sincere respect, as a 5 per cent. *cess* on the capital value of the house, and to learn that it was supposed by many that people living in their own houses would have actually to pay

the sum of 5 per cent., instead of this being merely an assumed value for rating purposes. This very morning one of the Calcutta dailies published a letter in which the tax was denounced because impoverished tenants "would have to pay 5 per cent. on the present cost of the building." No doubt if such a mistake as this is general, it would account for a much more vehement expression of indignation than that which we have already met with. But even where there is no misunderstanding, I fear there is a good deal of vexation. With those who merely want to escape paying their fair share of the rates, I have no sympathy; but with the very numerous cases of impoverished descendants of good families who cling to the ancestral home, as a matter of sentiment almost as deep as religion, I have a very real sympathy. I trust the saving clause which Sir Henry Harrison has introduced will be effective in protecting this class, and even if it should be found in practice to cover more cases than those on whose behalf it was invented, I should look on this as a lesser evil than leaving the latter altogether unprotected. I do not say that even with this safeguard the rating clause as it now stands is a satisfactory solution of the problem, but I do say that of all the methods of solving it laid before the Council, this seems to me the least unsatisfactory.

I will not detain you now by touching on other parts of the Bill. It is a matter of no small grief to me that the attitude which the Council has been bound to maintain should be one which to many of my personal friends and representatives of the Hindu community appears one of unyielding hostility. I am convinced that it is not so, and that we have all of us given the most attentive, and in some cases sympathetic, consideration to the views and arguments of the minority. But constituted as the Council is, and legislating as the Government must do in accordance with the views not of one class, but of the most enlightened general public opinion of the day, the result could not be otherwise. I have carefully considered the question whether by postponing the passing of the Bill I should in any way help to arrive at a better understanding. I have quite satisfied myself that nothing is to be gained by such a course. It is quite certain that the views held by three-fourths of the Council after the full and ample debate which the whole subject has undergone both in Council and Committee will not be changed, and I am equally hopeless of any change being effected in the views of the minority. To postpone the Bill will therefore only be to keep open an irritating sore without any prospect of arriving at a better understanding, and it is better that the arguments and appeals of those whom the minority represent should be at once addressed to higher authority with whom the question ultimately rests. '*Interest reipublicæ ut sit finis litium*'. The controversy is disposed of as far as this Council is concerned, and the sooner it is brought to the consideration of a higher tribunal, the better, and I will gladly facilitate this.

Before I sit down, I trust I may be permitted to bear testimony to the indomitable perseverance and the unfailing courtesy with which the losing side have fought their uphill battle. These qualities are not so invariable in some assemblies of which we read, that they should fail to receive honor where they exist. And now I will only thank the Council collectively for their regular and steady attendance throughout an unusually prolonged session, and trust that the Bill, if passed, may be fruitful of good government, and undarkened by the train of evils which its opponents have prophesied for it.

The motion was then put to the vote and carried on the following division:—

Ayes 8.	*Noes* 3.
The Hon. H. Pratt.	The Hon. Dr. Gooroo Dass Banerjee.
The Hon. Sir Alfred Croft.	The Hon. Dr. Mohendro Lal Sircar.
The Hon. Sir Henry Harrison.	The Hon. Baboo Kali Nath Mitter.
The Hon. T. T. Allen.	
The Hon. C. P. L. Macaulay.	
The Hon. H. J. Reynolds.	
The Hon. the Advocate-General.	
His Honour the President.	

The Bill was then passed.

The Council was adjourned *sine die*.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 26th May 1888.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops
	BENGAL.		
	Western Districts.		
	BURDWAN DIVN.		
1	Burdwan May 26, '88	0·40	Weather—hot with high winds. Prospects good. Ploughing going on. More rain wanted. Common rice 22 seers per rupee.
	Culna ...	0·20	
	Cutwa ...	Nil	
	Raneegunge ...	0 22	
2	Bankoora „ 26, '88	0·27	Weather—hot and cloudy. Indigo, cotton and sugarcane doing well. Fields being ploughed, but more rain wanted. Sowing of *aus dhan* commenced.
3	Beerbhoom „ 26, '88	1·08	Weather—much cooler. Storms passing about. Sugarcane very promising. *Til* benefited by rain. Ploughing going on favourably.
	Rampur Haut ...	1·18	
4	Midnapur „ 26, '86	1·61	Weather—hot. A heavy storm at head-quarters on the 25th. Sowing season has commenced; rain wanted.
5	Hugli „ 26, '88	0 23	Weather—normal. Agricultural operations are in full progress and the season has been so far favourable.
	Jehanabad ...	0·94	
	Howrah „ 26, '88	0·74	Weather—seasonable. More rain wanted for transplanting.
	Ooloobaria ...	0·83	
	Central Districts.		
	PRESIDENCY DIVN.		
6	24-Perghs. May 29, '8	1·01	Weather—hot and cloudy with high winds. Standing crops prosper. Sowing and ploughing going on.
7	Nuddea „ 26, '88	0·60	Weather—very sultry and stormy. *Aus* sowings are complete. Weeding is in progress. More rain required throughout the district. Indigo good.
	Kooshtea ...	1·11	
	Meherpore ...	1 84	
	Chooadanga ...	1·34	
	Ranaghat ...	0·23	
8	Khoolna „ 26, '88	0·85	Weather—cool breeze; warm sun. *Boro* harvest still continues. *Aus* being sown and also *amun* in Bagirhat. Prospects fair, but more rain wanted.
9	Jessore „ 26 '88	0·54	Weather—hot with slight rain. Paddy sowings over. Harvesting of *boro* nearly completed. Prospects good.
	Jhenidah ..	0 98	
	Magurah ...	2·43	
	Narail ...	1·21	
10	Moorshedabad „ 26, '88	1 2	Weather—hot and cloudy at intervals. *Aus* and *amun dhan* doing well. Sowings have not yet been completed.
	Lalbagh ...	0·89	
	Jangipur ...	1·22	
	RAJSHAHYE DIVN.		
11	Dinagepur May 26, '88	4 32	Weather—cool since the rain. Crops progressing favourably.
	Thakurgaon ...	1 95	
12	Rajshahye „ 26, '88	0 05	Weather—cloudy with high winds. Sowing of *aus* and *amun* almost finished. Cutting of *boro* paddy has commenced.
	Nattore ...	2·40	
	Nowgong ...	0·45	
13	Rungpur „ 26, '88	6 54	Weeding retarded by heavy rain. *Amun* being planted out. Prospects generally good.
	Kurigram ...	0·94	
	Nilphamari ...	5·16	
	Gaibandha ..	1·87	
14	Bogra „ 26, '88	4 00	Weather—rather close and warm during the first five days of the week. A severe thunder-storm on the night of 24th with heavy rain. Cultivation of *buna amun*, *aus* and jute going on. Sugarcane and *kheraoh* doing well. *Kaoni* is in ear. *Til* bearing pods.
	Sherpur ...	0·75	
	Nowkhilla ..	3·02	
15	Pubna „ 26, '88	1 59	Weather—stormy and hot. *Boro dhan* is being reaped. *Amun* and jute are coming up well.
	Serajgunge ...	2·08	
16	Darjeeling „ 26, '88	1·16	Weather—sultry with passing showers. Crops progressing favourably.
17	Julpigoree „ 26, '88	1·52	Rain during first five days of week. Clouds hanging about. Prospects of crops continue good
	Eastern Districts.		
	DACCA DIVISION.		
18	Dacca May 26, '88	Rainfall return not received	Weather—very hot. *Til* seeds being cut; outturn good. Jute and paddy plants thriving. Rivers rising.
	Manickgunge ...	2·87	
	Munshigunge ...	1·26	
19	Furreedpur „ 26, '88	1 79	Weather—seasonable; hot and stormy by turns. Prospect and condition of crops continue satisfactory.
	Goalundo .	0 75	
20	Backergunge „ 25, '88	0 18	Weather—hot. Prospects of crops good.
21	Mymensingh „ 25 '88	3·92	Weather—hot; heavy rain last night (24th) at the sudder station. Prospects of crops good. Rivers rising.
	Jamalpur ...	4·15	
	Kishorgunge .	6·46	
	Attia ...	0·34	
	Netrokona ...	2 96	

Division	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*				
		Eastern Districts—concld.		
CHITTAGONG DIVN.	22	Chittagong May 29, '88	1·27	Weather—seasonable. Lands being prepared for *amun* crop. Prospects fair. Prices steady.
	23	Noakholly „ 25, '88	1·19	Weather—seasonable. Sowing of *aus* nearly completed. Seedlings generally doing well. Prospects of betelnuts and cocoanuts good.
		Fenny ...	0·82	
	24	Tipperah „ 24, '88	0·82	Weather—hot; generally sunny. Chillies and *til* somewhat injured by excessive moisture at the beginning of the month. *Boro* rice giving good outturn. Prospects generally good.
		Brahmanbariah .	2·97	
		Chandpur ...	0 26	
	25	Chittagong Hill Tracts. „ 22, '88	2·11	Weather—very hot and unsettled. Sowing in *jums* continues. Sugarcane doing well.
		Hill Tipperah „ 23, '88	2·73	Weather—hot. Early rice not doing well, more rain wanted. Chillies gathered. *Jums* continue to be cultivated.
BEHAR.				
PATNA DIVN.	26	Patna May 26, '88	0·02	Weather—hot; east winds prevailing. *Cheena* and sugarcane doing well. Lands are being prepared for *bhadoi* and *aghani* crops. Prospects of mango continue good.
	27	Gya „ 25, '88	Nil	Weather—cloudy and very hot. Sugarcane being irrigated.
	28	Shahabad „ 25, '88	Nil	Weather—exceedingly hot. East wind prevails. Prospects of sugarcane and *cheena* continue favourable. Mangoes promise well.
		Buxar ...	0·31	
	29	Durbhunga „ 26, '88	Nil	Weather—east wind prevailing. Prospects of early rice, sugarcane and indigo continue favourable. Rain is wanted for *bhadoi* sowings. Common rice selling at an average of 18½ seers per rupee.
	30	Mozufferpur „ 25, '88	0·11	Weather—hot with east wind; occasional storms. Fields being prepared for *bhadoi* and paddy sowings. Prospects of early rice and other crops on the ground excellent.
		Sitamarhi ...	0·05	
	31	Sarun „ 26, '88	Nil	Weather—hot and close. Prospects of crops on the ground favourable. Lands are being prepared for *bhadoi* and *aghani*.
		Gopalgunge ...	0·40	
	32	Chumparun „ 27, '88	1·75	Weather—very hot. Rain has benefited and facilitated sowings of *bhadoi* and *aghani*. Prospects favourable. Indigo doing well.
		Bettia ...	1·55	
BHAGULPORE DIVN.	33	Monghyr „ 26, '88	Nil	Weather—very hot and sultry; east winds prevailing. Lands are being prepared for *bhadoi* crops. *Cheena* is being sown on *deara* lands. Rain very much wanted in Jamui for ploughing of lands for ensuing crops
		Begusarai ...	0·02	
	34	Bhagulpur „ 26, '88	Nil	Weather—cooler with east wind. Sowing of *bhadoi* crops continues and lands are being ploughed. Prospects good.
	3[illegible]	Purneah „ 26, '88	1·23	Weather—bright, with cool easterly breezes and occasional showers. All crops promise well.
		Kishengunge ...	3·46	
	3[illegible]	Maldah „ 26 '88	Nil	Weather—hot and fine. *Boro* harvest in progress; outturn good. Rain still much wanted for *bhadoi* and *haimanti* crops. Average price of common rice 23 seers per rupee.
		Gajole ...	0·66	
	37	Sonthal Perghs. „ 26, '88	0 42	Weather—cloudy with slight showers. Occasional thunder storms. Ploughing and sowing of early rice and *jenera* going on in places, but thrown back for want of rain. Indigo doing well. Rain urgently wanted for mango and sugarcane in Deoghur.
		Deoghur ...	0·15	
		Rajmahal ...	0·04	
		Pakour ...	0 05	
		Godda ...	0·59	
ORISSA.				
ORISSA DIVN.	38	Cuttack May 24, '88	Nil	Weather—very hot and cloudy. Heavy rain in the Kendraparah sub-division last week has facilitated ploughing. Rain wanted elsewhere. Price of rice unchanged.
	39	Pooree „ 24, '88	Nil	Weather—seasonable with occasional clouds. Sowing of *sarad* crops has commenced. *Dalua* crop is being harvested. Common rice 22 seers 2 chittacks per rupee in the sudder sub-division and 21 seers 4 chittacks in the Koordah sub-division.
		Khoorda ...	0·13	
	40	Balasore „ 25, '88	1·74	Weather—hot with local storms. The rainfall has been very beneficial in the north of the district, where rice sowings are in active progress, but rain is urgently wanted in the Bhudruck sub-division, where none has fallen.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
CHOTA NAGPORE DIVN.	41	Hazaribagh May 25, '88	Nil	Weather—very hot and dry. *Goondli* and paddy are being sown in places. Sugarcane doing well. No other crops to report on.
	42	Lohardugga „ 26, '88	Nil	Weather—cloudy and windy; very hot in the first part of the week: now a little cooler with strong westerly but damp wind. Rain urgently wanted.
	43	Singbhoom „ 25, '88	0·1[illegible]	Weather—intensely hot. A little rain in eastern part of district. Sugarcane doing well. *Dhan* being sown.
	44	Manbhoom „ 26, '88	Nil	Weather—clouds hanging about. Sugarcane growing. Lands are being prepared for cultivation.

The average fall of the corresponding period for 24 years, S. G.'s Office ...	1·09
The total fall from 1st January to 26th May 1888	11·59
The average fall of the corresponding period for 24 years, S. G.'s Office ...	8·48

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, p passing temporary showers, t thunder, d drizzling rains, < lightning.

A. Pedler,

For Offg. Meteorological Reporter to the Govt. of India.

Meteorological Office, Govt. of India;

Calcutta, the 2[illegible]th May 1888.

Meteorological Report of the Province of Bengal

STATION OBSERVATIONS.

Explanation. *Summary.*—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten years. The *humidity* of the atmosphere is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number ... the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past 12 ... stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

* Mean for 6 days.

[illegible] the week ending Friday, the 25th of May 1888.

[illegible] 10 A.M.	Average cloud amount at 10 A.M. for week.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Rainfall. Of week. Mean for district.	Normal mean.	Since 1st of month. Explanation.—...... Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 25th May* 1888.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 25TH OF MAY 1888.

THE meteorological conditions of the present week in Bengal resemble very closely those of the previous two weeks. Weather has been generally slightly disturbed, and local storms with rain have been fairly numerous, particularly at the close of the week, when in North and part of East Bengal very heavy rain was received. The meteorological conditions in Bengal and Assam have as usual varied slightly from day to day, but not to such an extent as to materially alter the weather. For the greater part of the week, therefore, a rather strong moist southerly wind current has been blowing at the southern stations, south-easterly and easterly winds have been blowing at the eastern stations, and a steady easterly and north-easterly current at the northern stations, while in the west and south-west of the province winds have been south-westerly and westerly. There has been thus a feeble circulation of winds over the province, which has caused local disturbances and rain as previously stated. At the close of the previous week also a feeble low-pressure area had advanced from the Bay over South Bengal, and on the 19th it had again advanced inland and was situated in Behar. This intensified the low pressure area, which is usual at this season, over parts of Chutia Nagpur and Behar, and this decided low pressure over those districts has remained a distinct feature in the meteorology of the province up to the close of the week.

While, therefore, the conditions in Bengal and Assam during the week have not varied to any large extent, more important changes have been taking place in the south of the Bay. The first advance of the south-west monsoon winds, as described in previous reports, took place in the south of the Bay on about the 9th and 10th of the month, and in front of this advance a feeble cyclonic storm was formed, which crossed the South Madras Coast on the evening of the 11th. During the present week a second advance of monsoon winds has taken place in the south of the Bay, and from the 17th up to the 22nd decidedly strong winds have been reported from the Ceylon stations. After this date wind velocities again rapidly decreased in the south of the Bay. This advance of monsoon winds did not, as in the first case, give rise to any storm in front of it, and it apparently simply advanced up the centre and east of the Bay, and moderate and fairly general rain commenced to fall at the South Burma stations from about the 24th, though it was only on the 26th that very heavy rain (nearly 7 inches) was first reported at Moulmein. It is impossible to say with certainty how far up the centre of the Bay this advance of south-west monsoon winds reached, but it is probable it extended over the whole of the southern half. This advance of monsoon winds has been indeed the principal meteorological feature during the past week.

Pressure—Has been rather low for the greater part of the present week, and taking into consideration only those stations from which observations have been received for a series of years, the mean pressure of the province of Bengal for the week has been 0·048 inch in defect of the normal. Pressure, as previously stated, has been comparatively low in the west of the province, and thus while at Chittagong the defect has been only 0·030 inch, at Dacca only 0·019 inch, and at Purneah 0·022 inch; at Gya the defect has been 0·100 inch, at Patna 0·059 inch, and at Burdwan 0·069 inch For the previous week the general defect was only 0·04 inch, so that this low pressure is increasing rather than decreasing in amount. In Assam pressure has also been in defect during the week, but the defect is very evenly distributed, and it amounts to only 0·038 inch

Temperature—Has been below the normal by rather large amounts in North Bengal and North Behar; it has been almost normal in South-West and East Bengal, and South Behar, while it has been rather largely above it in Orissa and Chutia Nagpur. The largest variations are a defect of 3·3° in North Bengal, and an excess of 3·5° in Chutia Nagpur. For the whole province of Bengal the mean temperature for the week has been almost absolutely normal, because, as before stated, the districts in the north and east of the province have been below it, and those in the south and west have been above it by an almost equal amount. In Assam temperature has been 1·1° below the normal.

Rainfall.—The heaviest rainfall during the week took place on the 24th and 25th in the districts of North Bengal and the neighbouring parts of East Bengal. Up to this time rainfall had been generally light, but on these days falls in excess of two and three inches were numerous. Thus the following stations received falls in excess of four inches on one or other of these days:—Mymensingh, Netrokona, Baloorghât and Bogra, and in excess of two inches—Jamalpore, Subornakhally, Sherpore, Nowkhilla, Durgapore, Panchbibi, Dinagepore, Rungpore, Bagdogra, Ulipore, Dinhatta, Cooch Behar, Mickligunge and Kissengunge. It will thus be seen that rather heavy rain has been received over parts of the province during the week.

The average rainfall at the stations in North Bengal during the week has been 3·15 inches, or about one-half more than the normal. In East Bengal the falls have averaged 1·75 inches, or almost exactly the normal fall. North Behar and South-West Bengal have averaged about seven-tenths of an inch, or about the usual amount; but the falls in Orissa, South Behar and Chutia Nagpur have been very small, and only a mere fraction of the normal falls.

Assam has received good general rain almost throughout the week, and the total amounts reported are—Sibsagar 3·75 inches, Dhubri 2·60 inches, and Silchar 2·08 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the week ending Friday, the 25th of May 1888 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May.

A. Pedler,
For Offg. Meteorological Reporter to the Govt. of India.

MEMORANDUM.

THE returns from the principal Municipalities in Bengal presented, during the week ending 12th May 1888, the following results:—

1. That births and deaths were recorded in these Municipalities at the rates respectively of 17·7 and 21· per 1,000 of population, as opposed to 16·8 and 25·4 per 1,000 in the preceding week ending 5th May, indicating a large reduction in the registration of deaths.

2. That the following Municipalities returned the highest proportions of births and deaths:—

Births.	Ratio per *mille.*	*Deaths.*	Ratio per *mille.*
Bhagulpore	43·4	Comillah	50·0
Narainganj	37·3	Darjiling	45·6
Beauleah	36·8	Chittagong	42·2
Durbhanga	29 9	Suburbs of Calcutta	38·7
		Narainganj	33·1

3. That, in comparison with the results of the preceding week, there was a considerable abatement in the death-rates from cholera and the maladies coming under the head of "Other causes;" and only small differences in the casualty-rates from the rest of the death-causes:—

	Ratio per *mille* during the weeks ending—	
	12th May 1888.	5th May 1888.
Cholera	5 2	7·5
Small-pox	·2	4
Fever	7·6	8·2
Bowel-complaints	2·3	2 1
Injury	·3	·2
Other causes	5·4	6 9

4. That the greatest suffering from cholera and "other causes" occurred in the following Municipalities, the other diseases, indicated above, exhibiting no special local severity:—

Cholera.	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Chittagong	18·8	Narainganj	24·8
Hughli	16·1	Comillah	15·4
Suburbs of Calcutta	13·2	Mozufferpore	10·9
Serampore	9 8	Midnapore	10 8
Howrah	8 6	Puri	10 5
Patna	3·2	Bhagulpore	10 0
Dacca	2 6	Serampore	9·6
		Suburbs of Calcutta...	9 3

5. That the casualties in relation to *Sex, Class* and *Age* were returned at the rates noted below:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	22 4	Christians	4 3	Under 1 year ...	152 6

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "*Age*," the ratios under which have been omitted, inasmuch as the census of the Europeans above alluded to cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorized form of age classification.

INCREASE. Tons.

Grains—
(2) Rice ... 91
(5) Others ... 16

The increase in these staples is due to the steamer service being stopped between Jeaganj and Calcutta for want of sufficient water in the river.

Salt ... 22

This increase is due to river communication being stopped for want of sufficient water.

Oilseeds—
(1) Linseed ... 25
(2) Mustard and rape... 110

The increase in these staples is due to river communication being stopped.

Sugar—
(1) Drained ... 17
(2) Undrained ... 3

The increase in these staples is due to fair demands.

DECREASE.

Coal ... 169

This decrease is due to previous stock not being exhausted.

Cotton, raw ... 12

This decrease is due to dull market rate.

Cotton twist and yarn—
(1) European ... 36

This decrease is due to less demand.

		Brahmanbariah .	5 04	
		Chandpur ...	1 10	
	25	Chittagong Hill Tracts. „ 29, '88	3·11	Weather—hot and steamy throughout the week with heavy thunderstorms chiefly at night. Sowing in *jums* still continues.
		Hill Tipperah „ 31, '88	9·51	Weather—rainy. Early rice has somewhat suffered from excessive rain. *Jum* cultivation continues.
BEHAR.				
PATNA DIVN.	26	Patna June 2, '88	1·04	Weather—sky overcast, and rain with strong wind from north-west. Rain has benefited and facilitated sowing of *bhadoi*. Lands are being ploughed. *Cheena* is now being sown vigorously in the Barh sub-division. Mango crop promises well.
		Barh ...	1·20	
		Behar ...	1·49	
	27	Gya „ 2, '88	0·04	Weather—cloudy. Sugarcane being irrigated. Sowings of paddy begun.
	28	Shahabad „ 2, '88	1·02	Weather—cooler than before on account of rain. East wind prevails. Sugarcane and *cheena* doing well. *Marua* being sown.
		Buxar ...	0·30	
		Sasseram ...	0·23	
		Bhobuah ...	0·50	
	29	Durbhunga „ 2, '88	3·25	Weather—cloudy. Prospects of early rice, indigo and *moong* continue very favourable. Rain has enabled the cultivators to prepare their lands for *bhadoi* sowings. Common rice selling at an average of 18½ seers per rupee.
	30	Mozufferpur „ 2, '88	2·13	Weather—cloudy and cool. Rain has been beneficial throughout the district. Prospects of standing crops excellent. Lands are being prepared for *bhadoi* and *aghani* crops.
		Hajeepur ...	1·20	
		Sitamarhi	1·50	
	31	Sarun „ 2, '88	1·65	Weather—fair occasionally; cloudy with slight showers. *Cheena* is being harvested. Prospects of sugarcane and indigo good. Lands continue to be prepared for *bhadoi* and paddy sowings.
		Sewan ...	0 50	
		Gopalgunge ...	0·81	
	32	Chumparun „ 2, '88	0 83	Weather—cloudy in the beginning of the week, latterly fair and hot. Sowings of *bhadoi* and *aghani* in full progress. Prospects of all crops above ground favourable.
		Bettia .	0·95	
BHAGULPORE DIVN.	33	Monghyr June 2, '88	1·88	Weather—hot and cloudy at intervals with occasional storms. Rain has been beneficial. Ploughing and sowing of ensuing crops going on. Prospects good.
		Begusarai .	1·02	
		Jamui .	0·76	
	34	Bhagulpur „ 2, '88	2·89	Weather—fairly cool. More rain wanted in south. In north rain rather too much for *moong* and low lands. *Bhadoi* sowings continue. Prospects good.
		Banka ...	0 51	
	35	Purneah „ 2, '88	2 85	Weather—cool and bright with occasional heavy showers. So far the rain has been beneficial to standing crops. An interval of fair weather desirable.
		Kishengunge ...	4·55	
		Arrareah ...	1·63	
	36	Maldah „ 2 '88	0·71	Weather—hot and cloudy with occasional heavy rain and high east wind. Harvesting of *boro* paddy still going on. *Haimanti* sowing in progress. Other crops doing well. Common rice selling at an average of 22½ seers per rupee.
		Chanchal ...	2·27	
		Shibgunge ...	0·86	
		Gajole .	1·73	
	37	Sonthal Perghs. „ 2, '88	0·79	Weather—fairly cool; winds easterly with occasional showers and thunder. Rain everywhere; more wanted at Deoghur. Ploughing begun. Sugarcane in Jamtara doing well. *Boro dhan* in Rajmehal being cut; outturn 12 annas. Indigo doing well
		Deoghur ...	1·05	
		Godda ...	1·30	
		Jamtara ...	1·83	
		Pakour ...	1·11	
		Rajmahal ...	1·18	
ORISSA.				
ORISSA DIVN.	38	Cuttack June 1, '88	2 87	Weather—still warm and close. Heavy shower on the 29th ultimo. This has done immense good. Ploughing and sowing commenced. Common rice sells at 18½ seers per rupee in town and 25 seers in the interior.
	39	Pooree ..	.. ..	Report not received.
	40	Balasore „ 1, '88	3·23	Weather—storms almost every night. Rain pretty general all over the district. It has given a great impetus to cultivation of land and rice sowings. Sugarcane doing well.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
CHOTA NAGPORE DIVN.	42	Hazaribagh June 1, '88	0·79	Weather—cooler. Rain has fallen over greater part of district. Lands being ploughed. First sowings of paddy and *goondli* going on. Sugarcane doing well.
	43	Lohardugga „ 2, '88	1·80	Weather—cool. Heavy rain at head-quarters with strong wind and hail. Land is being prepared for early paddy. No change in prices.
		Palamow . .	0·05	
	44	Singbhoom „ 1, '88	1·95	Good rain during the week and storms daily; weather cool and pleasant in consequence. Rice being sown everywhere. Sugarcane doing well.
	45	Manbhoom „ 2, '88	1·24	Weather—warm, with storms nearly every day. Sugarcane growing. Ploughing is going on everywhere, and sowing has begun. Mango crop promises to be 12 annas.

STATISTICAL DEPARTMENT,
The 2nd June 1888.

P. NOLAN,
Secretary to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of May 1888.

	Inches	Date	Hour
The mean pressure of the month	29 659		
The average pressure of May from 24 years' registers .	29 656		
The highest pressure in the month	29 896	11th	10h.
The lowest pressure in the month	29·426	19th	16h.
The range of pressure	0·470		
	Hours		
The total number of hours of bright sunshine during the month	246 0		
The maximum possible number of hours of sunshine ...	408·3		
	⊖		
The mean temperature of the month	86 3		
The average temperature of May from 24 years' registers .	86·1		
The highest temperature in the month	100·4	16th	
The lowest temperature in the month	70·8	29th	
The range of temperature during the month	29 6		
The mean daily range of temperature	16·2		
The greatest range of temperature in one day	20·9	8th	
	Per cent.		
The mean humidity of the month	75		
The average humidity of May from 24 years' registers ...	73		
	Inches.		
The mean vapour tension of the month	0·938		
The average vapour tension of May from 9 years' registers ..	0·933		
The mean cloud proportion of the month	5·20		
The average cloud proportion of May from 11 years' registers	4·66		
	Inches		
The total rainfall of the month	3 77		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	3·82		
The average fall of May from 48 years' registers ...	5·40		
The greatest fall in 24 hours	1·27	16th	
	Days.		
The number of rainy days in the month	10		
The average number of rainy days in May from 24 years' registers	13		
	●		
The mean maximum equilibrium temperature of solar radiation during the month	152 0		
The mean difference of sun and air temperatures	58 1		
The greatest sun temperature ...	159 8	15th	
The greatest excess of sun over air temperature	65·8	27th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	74·3		
The mean depression of the noctural radiation thermometer below the minimum air temperature at 4 feet above the ground	3·4		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	6 9	11th	
	Miles.		
The mean movement of the wind per day	158·0		
The greatest movement of the wind in one day	271·0	25th	
The greatest movement of the wind in one hour	23·0	1st, 1 to 2 P.M., 25th 8 to 9 A.M.	
The number of hours with winds from each of the 8 points—			

N. 7, NE. 8, E. 36, SE. 118, S. 333, SW. 190, W. 11, NW. 10, Calm 31.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park-street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·5° higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

A. PEDLER,
For Offg. Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 4th June 1888.

Statement of Rainfall in Bengal for the week ending Friday (6 p.m.), the 1st of June 1888.

Meteorological division.	District.	Station.	Rainfall. Saturday, 26th May.	Sunday, 27th May.	Monday, 28th May.	Tuesday, 29th May.	Wednesday, 30th May.	Thursday, 31st May.	Friday, 1st June.	Total. Number of rainy days.	Rainfall of week.	Total rainfall since 1st of May.	Average total rainfall from 1st of May.	Total rainfall since 15th May.	Average rainfall from 15th May to date.

Explanation.—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 1st June* 1888.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 1st OF JUNE 1888.

THE meteorological conditions in Bengal and Assam during the past week call for little detailed comment, and throughout this period weather has been decidedly disturbed. For practically the whole week there has been a distinct tendency to a circulation of winds over Bengal. In Orissa winds have been south-westerly, and in South Bengal south-westerly and southerly, and the velocity of the winds blowing at the head of the Bay has been very large, particularly at the commencement of the week. At the eastern stations winds have been south-easterly, and at the northern stations easterly, while in the west of Behar and in Chutia Nagpur winds have in some cases been north-westerly and westerly. The result of this interaction and of the strong moist winds pouring into the province has been the formation of extremely numerous local storms, generally accompanied by rain, in almost all districts of the province, and thus good general rain has been received. This rainfall, however, cannot be said to have been brought up by the true south-west monsoon current, for this current had not made its appearance over Bengal up to the close of the week.

The meteorological changes taking place in the Bay have again been more important than those over the land area. In the report for the previous week, it was noticed that a second advance of monsoon winds had taken place over the south of the Bay, lasting from the 17th up to the 22nd. Winds then fell off in force at the southern stations, and up to the morning of the 27th they remained of about normal force. From this date, however, an extremely rapid increase took place in the strength of the winds at the Ceylon stations, and exceptionally strong winds were reported from the 28th up to the close of the week. During this period weather must have been more or less stormy generally over the whole of the south of the Bay, but up to the 1st there was no evidence of any distinct storm having formed in front of this inrush of monsoon winds, which on this date had reached well into the middle of the Bay, when it almost appeared as if the advance would continue up the Bay, and bring about the commencement of the true rains in Bengal. The further history of this advance, however, belongs to the meteorology of the succeeding week.

Pressure.—The variations of pressure in Bengal and Assam during the week have been of the ordinary oscillatory character, and taking only those stations into consideration from which reports have been received for a series of years, the mean pressure of the province is found to have been about five-thousandths of an inch only in defect of the normal, while in Assam pressure has been almost absolutely normal. In Bengal the western stations generally have been in defect, while the eastern and south-eastern stations have shown slight excess pressures.

Temperature.—Owing to the numerous local storms with rain which have occurred during the week, temperature has been below the normal in all districts except Chutia Nagpur. The defects have been large in North Bengal, North Behar, and Assam, where they average about 5°, while elsewhere they range from about one and-a-half to two and-a-half degrees. In Chutia Nagpur temperature has been slightly above the normal. In Bengal generally the defect has averaged 2·4°.

Rainfall.—All districts have received fairly good general rain. In East and North Bengal the falls have averaged between three and four inches, in Orissa and North Behar they have averaged from two to two and-a-half inches, while in the remaining divisions the falls have ranged from one to one and-a-quarter inches. In all districts except South-West Bengal and Orissa the falls have been in excess of the normal, but in these two districts the falls have been in slight defect.

The following table gives the summary of the temperature and rainfall data of each of he seven meteorological divisions of the Province for the week ending Friday, the 1st of June 1888:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.						RAINFALL.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of May.		Since 15th May.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h. 10h. 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, d drizzling rain, p passing temporary showers, t thunder, < lightning, ⌓ dew, K thunderstorm.

The mean temperature of the seven days	83·1
The extreme variation of temperature	26·5
The maximum temperature	97·5
	%
The mean relative humidity	81
	Inches.
The total fall of rain from 27th May to 2nd June 1888	1·40

The mean temperature and humidity are obtained by applying to the mean of the 10h, 16h, and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

METEOROLOGICAL OFFICE, INDIA;
The 4th June 1888.

A. PEDLER,
For Offg. Meteorological Reporter to the Govt. of India.

MEMORANDUM.

DURING the week ending 19th May 1888, the birth and death-rates of the principal Municipalities in Bengal stood at 20· and 24·2 per 1,000 of population, respectively, as opposed to 17·7 and 21· per 1,000, respectively, in the preceding week ending 12th May, indicating a considerable improvement in the registration of both births and deaths.

2. The highest proportions of births and deaths were returned from the undermentioned Municipalities:—

Births.	Ratio per *mille.*	*Deaths.*	Ratio per *mille.*
Comillah	57·7	Darjiling	58·7
Bhagulpore	43·4	Suburbs of Calcutta	42·2
Gya	38·2	Comillah	34·7
Durbhanga	32·2	Gya	34·2
Burdwan	29·0	Chittagong	32·8
		Serampore	31·4

3. The following table denotes that, as compared with the outcome of the preceding week, there was an enhancement of mortality from fever and the maladies returned under the head of "Other causes," particularly from the former, and that the casualties from the rest of the death-causes exhibit only fractional differences:—

	Ratio per *mille* during the weeks ending—	
	19th May 1888.	12th May 1888.
Cholera	4·5	5·2
Small-pox	·1	·2
Fever	9·9	7·6
Bowel-complaints	2·7	2·3
Injury	·6	·3
Other causes	6·4	5·4

4. Of the above-mentioned diseases, excluding small-pox and injury, the casualties from which were nowhere noticeably large, and bowel-complaints, which proved conspicuously fatal only in the Serampore town, viz., at the rate of 11·8 per 1,000 of population, cholera, fever and "Other causes" proved most fatal to life in the following Municipalities:—

Cholera.	Ratio per *mille.*	*Fever.*	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Suburbs of Calcutta ...	15·5	Darjiling	45·6	Puri	16·8
Howrah	5·2	Kishnaghur	26·5	Serampore... ...	15·6
Patna	4·2			Comillah	15·4
Gya	3·4			Gya	14·3
				Suburbs of Calcutta ...	9·5

5. The death-rates in relation to *Sex*, *Class* and *Age* were returned at the rates indicated below:—

According to Sex.	Ratio per *mille.*	*According to Class.*	Ratio per *mille.*	*According to Age.*	Ratio per *mille.*
Males	27·2	Christians	21·7	Under 1 year ...	200·6
Females	20·8	Hindus	23·6	1 and under 5 years ...	38·4
Ratio of male deaths to every 100 female deaths	147	Mahomedans ...	25·6	5 ,, 10 ,, ...	11·1
		Budhists	24·2	10 ,, 15 ,, ...	9·5
				15 ,, 20 ,, ...	20·9
				20 ,, 30 ,, ...	15·5
				30 ,, 40 ,, ...	15·5
				40 ,, 50 ,, ...	21·4
				50 ,, 60 ,, ...	22·4
				60 years and upwards ...	46·5

R. LIDDERDALE, M.D., *Deputy Surgeon-General,*
Sanitary Commissioner for Bengal.

The 4*th June* 1888.

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "*Age*," the ratios under which have been omitted, inasmuch as the census of the Europeans above alluded to cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorized form of age classification.

RESOLUTION ON THE ADMINISTRATION REPORTS OF THE REFORMATORY SCHOOLS AT ALIPORE AND HAZARIBAGHFOR THE YEAR 1887.

RESOLUTION.

JAILS.

Darjeeling, the 5th June 1888.

READ—

(1) Letter No. 3310, dated 26th April 1888, from the Inspector-General of Jails forwarding the Report of the Administration of the Alipore Reformatory School for the year 1887.

(2) Letter No. 2960, dated 16th April 1888, from the Inspector-General of Jails, forwarding the Report of the Administration of the Hazaribagh Reformatory School.

Read also—

The Reports for the year 1886, and the orders of Government recorded thereon.

The Alipore School opened 1887 with 109 and closed with 108 boys; 23 were admitted during the year, while 22 were released, 1 died and 1 escaped. There were no serious offences, and the proportion of punishments to the number of boys confined shows a very slight increase. No explanation is given of the increase in the punishments of caning and penal diet coincident with a reduction in the number of fines from 95 to 56. The health of

the school was good. Admissions to hospital rose rom 1·96 per cent. daily in 1886 to 2·73 per cent. in 1887, owing to the large number of weak and sickly boys admitted during the last two years, many of whom had to be kept in hospital for some time before being sent to work. One boy died from epileptic fits.

2. No change has been made in the way in which the day is divided between school and work. The boys work for seven hours and have also one hour of compulsory school; they can also attend the night school from 6-30 to 8 P.M. It is very satisfactory that as many as 90 boys on an average attend in the evening. The mark system worked well. The number of boys entitled to marks increased slightly, and the average weekly earnings rose from Re. 1-13-10 in 1886 to Rs. 2-0-4. The total earned during the year was Rs. 322-10-6, including payments for extra work, of which Rs. 177-4 were deposited in the Government Savings Bank.

3. The reports regarding released boys compare favourably with those for last year. Reports were received in the case of 52 boys; 9 only, or 17·3 per cent., of whom 6 were in jail, were said to bear bad characters. 7 only out of the 52 follow the trades they learned at school, out of whom 2 had been only two and three years respectively in the school. The others had been there five years or more.

4. The cost of maintenance fell from Rs. 126-10-9 to Rs. 126-1-10 for each boy. The cost of diet fell from Rs. 3,381-7-9 in 1886 to Rs. 3,156-4-9 in 1887.

5. The manufactory account shows a profit to the school of Rs. 8,521-15-6 against Rs. 9,180-12-11 in 1886. No allowance is made in the account for the value of the labour of the boys employed, or for wear and tear of block; it merely shows the balance of actual receipts over actual expenditure. Book-binding, carpentry, and tinsmith's work showed net profits of Rs. 4,693-13-0½, Rs. 1,470-2-7 and Rs. 1,431-12-8½ respectively. The profits on cane-work decreased from Rs. 501-14-7 in 1886 to Rs. 313-5-10 in 1887, owing to the increased cost of raw cane and its inferior quality. The number of boys engaged was very small, as some of the old boys were released, and it is only boys of certain castes that can be put to this work.

6. The Lieutenant-Governor is glad to see that Mr. Kirschner's management of the school continues to deserve the praise of the Board of Management and of the Inspector-General of Jails. The acknowledgments of Sir Steuart Bayley are also due to the Board of Management.

7. The number of boys confined in the Hazaribagh School has risen from 227 at the close of 1886 to 232 at the close of 1887. The daily average population was 225 against 209·4 in 1886. The health of the school was good; only one boy died; he had been sickly for several years.

8. There was an improvement in discipline during the year. 124 boys were neither punished nor reported. There were only 570 punishments against 717 last year, showing that the severity of the punishments last year had the desired effect. Whipping and hand-caning were resorted to in 135 cases only against 325 in 1886. On the other hand, marks were forfeited in 310 cases against 123 in 1886. Penal diet was not resorted to. There was one serious case of assault, in which four boys and two of the trade instructors attacked the store-keeper. The trade instructors were dismissed but not prosecuted, as the Deputy Commissioner considered that there was not sufficient evidence to secure a conviction.

9. The daily routine is the same as at Alipore, except that the hours of rising differ slightly, and night school at Hazaribagh lasts from 6 to 8 P.M., while at Alipore it begins at 6-30 P.M. The Inspector-General of Jails was requested in paragraph 9 of last year's Resolution and in paragraph 11 of the Resolution for 1885, to notice specially the question of the assimilation of system at the two schools, but he has not done so. He will be again asked to report on this subject. No figures have been given to show the average attendance at the night school, though this was called for in last year's resolution. This omission should be supplied in the next report. The mark system worked well. The average earning per week rose from Rs. 8-2-4 in 1886 to Rs. 9-15-1 in 1887. The total earnings came to Rs. 517-2-9.

10. Reports were received regarding 54 boys; 42 reports were favourable; in 8 cases the whereabouts of the boys were not known; 4 had been reconvicted and sent to jail. One boy was looked upon with suspicion by the police; only 6 boys continued to work at the trade they learnt in school.

11. The expenditure fell from Rs. 108-10-7 per head in 1886 to Rs. 77-9-5 in 1887. This decrease was mainly due to small outlay required for buildings, and to economies effected in dieting the boys by getting *atta* from the jail, purchasing animal food at a lower rate, and using a cheaper kind of rice.

12. The manufacture account shows a profit of Rs. 1,698-12-2 only against Rs. 2,314-4-2 in 1886. There is a very limited local market and the cost of carriage to Calcutta and elsewhere absorbs a great part of the profits. These expenses were so great on the work done for the Postal Department that the contract has been discontinued. The trades taught are carpentry, in which there is a profit of Rs. 1,445, ironwork, shoe-making and tinwork. Twenty-two of the younger boys were employed in the garden. It struck the Lieutenant-Governor when visiting the school last March that it might be possible to introduce the manufacture of objects for which a local demand exists, and so save the cost of carriage to Calcutta. The subject has since been considered by the Inspector-General of Jails and the Superintendent of Jail Manufactures, but without any result as yet. Dr. Lethbridge, however, has promised to look carefully into the matter when he visits the school next August.

13. The Lieutenant-Governor notices with pleasure that the school is regularly inspected by the official visitors, who have again very favourably reported on Mr. Hill, the Deputy Superintendent. Dr. Moorhead deserves credit for its excellent condition.

ORDER.—Ordered that a copy of the Resolution be forwarded to the President of the Board of Management of the Reformatory School at Alipore for information and communication to the Members of the Board.

Ordered also that a copy of the Reports, and a copy of the Resolution, be forwarded to the Inspector-General of Jails for information and communication to the Superintendent of the Hazaribagh Reformatory School.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

J. WARE EDGAR,

Chief Secretary to the Government of Bengal.

REPORT ON THE WORKING OF THE LICENSED WAREHOUSE AND FIRE-BRIGADE ACT IN THE SUBURBS OF CALCUTTA FOR THE YEAR 1887-88.

The 9th June 1888.—The following report is published for general information.

COLMAN MACAULAY,

Secy. to the Govt. of Bengal.

No. 28MM, dated Calcutta, the 30th May 1888.

From—A. SMITH, ESQ., Commissioner of the Presidency Division,

To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit herewith, under the provisions of section 30 of the Licensed Warehouse and Fire-Brigade Act, IV (B.C.) of 1883, the annual report, together with the usual statements, on the working of the Act during the year 1887-88.

2. Statement A shows the names of the different hydraulic presses, jute mills, cotton mills, hand screws and warehouses for storage of jute, licensed in the suburbs; B contains in the prescribed form the receipts and disbursements under the Act; and C the details of fires which occurred during the year.

3. The number of hydraulic presses, jute mills, cotton mills and hand screws remained the same as in the last year. That of warehouses for the storage of jute increased from 103 to 108, five such houses having been newly added to the list. The Asiatic Jute Mill, which was unoccupied during the previous year, was worked during the year of report, and one of the two hand screws remained unoccupied. Of the 108 jute warehouses in the list, 32 remained unoccupied, against 28 in the year preceding. The notes in the column of remarks of statement A will show these facts and other necessary particulars connected with the working of the warehouses.

4. The license-fees realized from all classes of warehouses during the year amounted to Rs. 33,975-12, viz., Rs. 21,624-13 from hydraulic presses, Rs. 1,088 from jute mills, Rs. 240 from cotton mills, Rs. 165 from hand screws, and Rs. 10,857-15 from jute warehouses, against a total sum of Rs. 33,912-13, viz., Rs. 21,624-13 from hydraulic presses, Rs. 968 from jute mills, Rs. 240 from cotton mills, Rs. 480 from hand screws, and Rs. 10,600 from jute warehouses, received during the year 1886-87. Thus there has been a net increase of Rs. 62-15 in the license-fees during the year of report, as compared with the result of the preceding year.

5. There were eleven fires during the year as per details in the statement C supplied by the Police, causing a loss to the extent of Rs. 10,250, against six fires and a loss of Rs 7,440 in the year preceding.

SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, DURING THE MONTH OF MAY 1888.

THE normal meteorological conditions in Bengal during May are to a considerable extent similar to those of April. There is the steady and increasing difference of temperature between the land and the sea area, and in this month this difference attains almost its maximum. The area of maximum temperature during May includes the western districts of South Behar, the North-West Provinces, Rajputana and Central India. With the increasing temperature of the land surface, the southerly winds blowing from the Bay of Bengal strengthen considerably, and owing to the physical obstacles of the hill systems to the east and north of Bengal, they appear as south-easterly winds in East Bengal, and as easterly winds in North Bengal. At the same time, however, the usual hot, dry westerly winds are blowing over considerable portions of Behar and Chutia Nagpur, and thus during May, as explained in previous monthly reports, conditions are favourable to the production of the local storms called nor'-westers. These, it is probable, are produced by the action of the opposing winds in elevating the moist sea breezes, and by this ascensional motion their water vapour is condensed, and sufficient energy is at the same time liberated to produce the well-known effects of these storms.

The southerly breezes which blow during this month at the head of the Bay are of considerable strength, and in fact at Saugor Island and False Point the wind velocities measured in May are generally greater than those during the actual rainy season, but there is reason to believe that during May the current is of comparatively small depth compared to what it is during the actual monsoon period. These winds, however, carry considerable amounts of moisture into East and North Bengal, and in the neighbourhood of the hills ascensional movement takes place, followed frequently by local storms and by heavy rainfall. This action will account for the large rainfall which occurs during this month in the northern and eastern districts of the province.

During May the distribution of the normal rainfall is simple, and the lines of equal rainfall run nearly north and south through the province, or rather almost parallel to a line joining the Chittagong Hill Tracts, the Tipperah Hills, the Garo Hills, and the Darjeeling Hills, the largest amounts being received in the eastern and northern districts, and smallest amounts in the western districts. Thus the average rainfall of the month is less than 2 inches in the southern parts of the Sarun and Mozufforpore districts, the Gya and Shahabad districts, and the western parts of Chutia Nagpur. To the east of these districts, up to a line running nearly north from the mouth of the Hooghly, the rainfall increases from 2 up to 5 inches. To the east of this, up to a line passing through Rungpore, Jamalpore, Mymensing, Brammberiah, Comilla, and Cox's Bazar, the average rainfall increases eastwards from 5 to 10 inches To the east of that line it exceeds 10 inches, and increases rapidly in amount towards the Garo and Khasia Hills and towards the Dooars, and at Buxa in the Western Dooars, the average rainfall in May is no less than 2 ·93 inches

The meteorology of May is generally rather important, for about the second or third week, the south-west monsoon makes its appearance in the south of the Bay, and gives heavy rain and fairly strong winds at the South Ceylon stations. The monsoon current gradually creeps up the east of the Bay, and rain sets in along the Arakan coast towards the close of the month, and it afterwards spreads into East and North Bengal early in June.

In the front of the advancing monsoon current frequently cyclonic storms arise, which are sometimes small and feeble and at other times larger and of considerable intensity. When these cyclonic storms are formed quite in the south of the Bay, they usually advance towards the Madras coast; but when the storms originate rather later, that is, when the monsoon current has advanced well into the centre of the Bay, the storms which then form appear usually to advance either towards the Arakan coast, or towards the South Bengal coast.

Meteorology of the month.—The principal features of interest in the meteorology of the past month have been

1. A mean barometric pressure for the whole province of Bengal which has been almost normal, though at the western and northern stations pressure has been slightly below the normal, and at the south-eastern stations slightly above it. The variation from the normal for the whole province is a defect of only 0·007 inch. In Assam pressure has been below the normal by 0·0 4 inch.

2. A mean temperature for the whole province which has been slightly (0 6°) in excess of the normal. The northern districts of the province have, however, shown mean temperatures distinctly below the normal, while South Behar, Chutia Nagpur, Orissa, South-West and East Bengal have all shown excess temperatures In Assam temperature has been below the normal by 0·9°.

3. Rainfall has been below the normal in all the meteorological divisions of the province of Bengal except in North Behar, where the fall has been normal in amount In Orissa,

East Bengal, and North Bengal the defects are small; in South-West Bengal and South Behar the defects are considerable; while in Chutia Nagpur the defect has been large, and the rainfall has been only 38 per cent. of the usual amount.

4. There were three periods in the month during which weather was disturbed The first period was short, and on the 1st and 2nd local storms with rain were rather numerous in South-West, East and North Bengal Again from the 6th to the 10th weather conditions over the same districts become disturbed, and showers accompanying local storms occurred with moderate frequency. The third period of disturbance lasted from the 16th to the end of the month, and at this time all the divisions of Bengal received showers, and for the last three or four days of the month the local storms were rather numerous, and moderately heavy rainfall was received.

5. The first advance of south-west monsoon winds in the south of the Bay took place about the 8th or 9th of the month, and in front of this advance a small cyclonic storm was formed which crossed the Madras coast. This advance, however, does not appear to have progressed very far up the Bay. The second advance commenced about the 17th, and lasted only for five days, and it would appear that in this advance the monsoon winds reached about the centre of the Bay, when they again died away. The third advance of the monsoon current commenced in the south of the Bay on the 27th, and from this date up till the end of the month very strong winds were reported in the south of the Bay. A small storm was subsequently formed in front of this advance, but as it did not form till early in June, its history will be described in the meteorological summary for that month.

At the end of April a distinct low-pressure area had formed over Chutia Nagpur, which also caused comparatively low pressure over the greater part of Orissa, South and South-East Bengal. The wind systems blowing over the province were also somewhat irregular; south-westerly winds prevailed in Orissa and Chutia Nagpur, southerly winds in South and South-East Bengal, and easterly, north-easterly and northerly winds elsewhere. These winds were also at the majority of stations very moist, and, owing to the rainfall which was occurring, temperature was generally considerably below the normal. Under such conditions weather continued disturbed, and local storms with rain were general in South-West, East and North Bengal, and in the southern parts of Chutia Nagpur up to 1st and in many cases up to the 2nd of May, and even over a large part of Behar, rainfall was general on April 30th; but in the Shahabad, Gya and Patna districts in South Behar and in the Hazaribagh and Lohardugga districts of Chutia Nagpur, rainfall was practically absent throughout this period, A slight change, however, commenced in the meteorological conditions of the province on the 1st, inasmuch as the easterly element in the wind directions became less strongly pronounced. These moist easterly winds again diminished in force on the 2nd, and by the 3rd they had practically retired from Bengal, and westerly and south-westerly winds, accompanied by a decided decrease in the humidity, obtained in their place. In Assam, however, moist easterly winds were still reported, and this district continued to receive rain. From the 2nd fairly settled weather obtained, over the whole of Bengal, and rainfall was practically absent up to the 5th, though there was a slight re-action noticeable in the wind directions, and an easterly wind current commenced to make itself felt at the eastern and northern stations; while in Chutia Nagpur and at some of the central stations in Behar northerly and north-westerly winds were reported. On the following day winds in Chutia Nagpur became north-westerly, though more or less easterly winds were still blowing at the eastern stations On the 7th the easterly winds again extended to Chutia Nagpur and parts of Behar, and for some days similar oscillations took place from day to day. These changes in the wind directions and the slight interaction taking place between the wind systems over the province at once caused weather conditions to become slighly disturbed, and local storms with rain became rather more numerous from the 6th and they continued moderately frequent up to the 10th. The storms only extended over parts of the various districts, and thus the rainfall brought up by them was not general in any part of the province. Rainfall was in fact mainly confined in Orissa to the Balasore district; in South-West Bengal to the Burdwan, Bankoorah, Beerbhoom, Nuddea, Jessore, and Moorshedabad districts; in East Bengal to the Furreedpore, Dacca, Tipperah and Mymensingh districts; in North Bengal to the Rajshahye, Maldah, and Julpigoree districts; in South Behar to the Sonthal Pergunnahs district; and in Chutia Nagpur to the Manbhoom district. Over the whole of North Behar and in the remaining districts of the other meteorological divisions, local storms were very few in number, and rainfall was almost absent.

While, however, the meteorological changes in Bengal at this period were unimportant, in the south of the Bay conditions decidedly altered. From about the 7th or 8th it was clear that the general distribution of pressure over the Bay was favourable for the first advance of south-west monsoon winds in the south of the Bay, and about the 8th or 9th the first feeble advance did take place. The advance was decidedly less powerful than usual, but nevertheless in front of the inrush of moist winds a small cyclonic storm was formed which on the 11th appeared off the South Madras coast, the centre being not far off the land, and apparently to the east-north-east of Negapatam at 8 A.M. of the 11th.

The storm during the night of the 11th advanced across the coast in a westerly or west-north-westerly direction, the centre apparently passing near Cuddalore, and on the morning of the 12th the centre was well inland to the north west of Negapatam. Though the storm was by no means an intense one, yet it gave strong winds, a rough sea, and rather squally weather along the whole of the coast from Madras southwards. On the 13th the small storm had again advanced in a north-westerly direction, but it had rather rapidly filled up, and had practically disappeared. This advance of the monsoon winds was rather a feeble one, and it does not appear to have advanced as a definite moisture bearing current very far up the Bay, but the low pressure, which apparently accompanied its advance in the south of the Bay, afterwards spread in a northerly direction, and a wave, or perhaps two waves of decidedly low pressure, advanced over the Bay into Bengal. The first rapid fall of pressure in the north of the Bay took place on the 13th, and continued on the 14th, when at some stations pressure fell by no less than a fifth of an inch during the two days; on the 15th there was a slight recovery; but on the 16th a further very rapid fall commenced, which was greatest on the Burma coast and in Orissa, and there was again a very large decrease on the 17th off the Arakan and Pegu coasts, the fall in some cases exceeding 0·15 inch. This caused a very distinct low-pressure area to be formed to the south-west of Akyab, and this diffused depression was accompanied by a distinct cyclonic circulation of winds. The depression probably gave somewhat squally weather over the northern half of the Bay on this day; but it did not concentrate or develop into any definite storm, and on the following day the area of low pressure advanced over South Bengal, when the pressure recorded became extremely low, as for instance Balasore registered 29·544 inches a pressure almost as low as is generally recorded at the commencement of the rainy season. Beyond, however, this abnormal pressure and bringing up with it moderately strong, but very moist, winds, and giving rather numerous showers, the depression did not influence the weather in Bengal to any material extent, and it subsequently passed into the interior of the province and afterwards appeared in Behar.

For the period from the 18th to the 25th, weather continued generally slightly disturbed, and local storms with rain were fairly numerous. For the greater part of this period a rather strong moist southerly wind current was blowing at the southern stations, south-easterly and easterly winds were blowing at the eastern stations, and a steady easterly and north-easterly current at the northern stations; while in the west and south-west of the province, winds were south-westerly and westerly. There was thus a feeble circulation of winds over the province, which caused local disturbances and rain.

While, therefore, the conditions in Bengal and Assam at this period had not varied to any large extent, more important changes were occurring in the Bay; and a second advance of monsoon winds took place in the south of the Bay, and from the 17th up to the 22nd, decidedly strong winds were reported from the Ceylon stations. After this date wind velocities, again rapidly decreased. This advance of monsoon winds did not, as in the first case, give rise to any storm in front of it, and it apparently simply advanced up the centre and east of the Bay, and moderate and fairly general rain commenced to fall at the South Burma stations from about the 24th, though it was only on the 26th that very heavy rain (nearly 7 inches) was first reported at Moulmein. It is impossible to say with certainty how far up the centre of the Bay this advance of south-west monsoon winds reached, but it is probable it extended over the whole of the southern half.

For the last week of the month the weather in Bengal remained decidedly disturbed, and there was a distinct tendency to a circulation of winds. In Orissa winds were south-westerly, and in South-Bengal south-westerly and southerly, and the velocity of the winds blowing at the head of the Bay was very large, particularly at the commencement of the week. At the eastern stations winds were south-easterly, and at the northern stations easterly, while in the west of Behar and in Chutia Nagpur winds were in some cases north-westerly and westerly. The result of this interaction and of the strong moist winds pouring into the province was the formation of extremely numerous local storms, generally accompanied by rain, in almost all districts of the province, and thus good general rain was received. This rainfall, however, cannot be said to have been brought up by the true south-west monsoon current, for this had not made its appearance over Bengal up to the close of the month.

The meteorological changes taking place in the Bay were again more important than those over the land area. It has been noticed that the second advance of monsoon winds took place over the south of the Bay, from the 17th up to the 22nd. Winds then fell off in strength at the southern stations, and up to the morning of the 27th they remained of about normal force. From this date, however, an extremely rapid increase took place in the strength of the winds at the Ceylon stations, and exceptionally strong winds were reported from the 28th up to the close of the week. During this period weather must have been more or less stormy generally over the whole of the south of the Bay, but up to June 1st there was no evidence of any distinct storm having formed in front of this inrush of monsoon winds, which on this date had reached well into the middle of the Bay, and when it almost appeared as if the advance would continue up the Bay, and bring about the commencement

of the true rains in Bengal. The further history of this advance, however, belongs to the meteorology of the following month

Pressure.—Was slightly in defect of the normal during the first week of the month; in the second week a slight, but decidedly larger, general excess was recorded; in the third week pressure was again in defect; and it remained slightly in defect till the close of the month. Taking into consideration only those stations from which records have been received for a series of years, it is found that the mean pressure for the whole of Bengal for May has been only 0·007 inch in defect of the normal. In South-East Bengal a slight excess pressure, such as 0·013 inch at Chittagong, has been recorded, while larger defects have been registered at the western and northern stations; thus Calcutta has been in defect of the normal by 0·021 inch, and Gya by 0·026 inch. In Assam pressure has been in defect by 0·014 inch.

Temperature.—The temperature variations during the month have to a great extent depended on the distribution of the rainfall, but the general mean temperature of the province has been in excess by 0·6°. North Bengal and North Behar show defects of from one to one and a half degrees; South-West and East Bengal show excess temperatures less than one degree; Orissa and South Behar temperatures from one to one and a half degrees above the normal; while in Chutia Nagpur the excess is three degrees. In Assam a defect of 0·9° has been registered.

Some fairly high maximum temperatures have been recorded during the month. Thus—

At Cuttack	on the 21st	maximum temperature was	114·4°
„ Dehree	„ 23rd	„	113·5°
„ Chyebassa	„ 25th	„	112·3°
„ Gya.	„ 22nd	„	112·1°
„ Raneegunge	„ 21st	„	111·0°
„ Midnapore	„ 21st	„	110·4°
„ Arrah	„ 22nd	„	109·4°
„ Bankipore	„ 22nd	„	109·1°

Rainfall.—The periods of rainfall and its general distribution have been already referred to, and it therefore only remains to state the amounts which have been received. The only district which has received a fall in excess of the normal is North Behar, which has received an average fall of 3·29 inches, the normal fall being 3·21 inches. All other districts have received falls in defect, though except in the case of Chutia Nagpur, and to a smaller extent in South-West Bengal and South Behar, the defects have not been very large. East and North Bengal have received a general rainfall of between eight and eight and a half inches, and Orissa has received a fall of three and a half inches, and in all three cases the defects are less than 10 per cent. of the normal fall In South-West Bengal there has been an average fall of 3·33 inches, which is equal to about 60 per cent. of the normal fall; while in South Behar the fall has averaged 1·42 inches, which is also nearly 60 per cent. of the usual fall. In Chutia Nagpur, however, the fall has only averaged a little more than an inch, and this is only 35 per cent of the normal fall in May.

When the rainfall variations are charted, it is seen that there are three small districts where the falls have been in excess of the normal. First an area running in a north-easterly direction from East Bengal through North Bengal into North Behar, and comprising parts of the following districts Tipperah, Mymensingh, Bogra, Dinagepore, Purneah, Bhagulpore, and Durbhunga; a second area comprising part of the Burdwan and Beerbhoom districts; and a third area comprising the Balasore and part of the Midnapore district. All the remainder of the province shows a defective rainfall, but it is only in parts of South and South-East Bengal, and in the districts close to the hills of North Bengal, that the defects exceed three inches.

The following table gives full data for the comparison of the actual and the normal rainfall of the month of May in all districts of the province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance or weight being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the weekly and monthly meteorological tables. The first column gives the normal or average district rainfall as determined from the rainfall observations of the past 15 years. The second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district. The third column expresses the ratio of the actual district rainfall of the past month to the normal rainfall as a percentage. The fourth column gives the same information as the third column in a slightly different form. It states as a percentage how much the district rainfall of the month varied in excess or defect from the normal rainfall, and is hence the difference between the numbers in the third column and 100:—

Division.	District.	Normal district rainfall, May.	Actual district rainfall, May.	Percentage of actual to normal rainfall.	Percentage excess (+) deficit (−).
Orissa	Pooree	2·77	2·99	108	+8
	Cuttack	3·77	2·92	78	−22

The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater. Under the head District observations of rainfall the normal mean [illegible] denoting cloud amount represents the part of the sky covered, the whole sky being denoted by 10 [illegible] from total rainfall at the sub-divisio[illegible] years. The means of the district are the numerical average of the rainfall return received in the district, *i.e.*,

Statement of Rainfall in Bengal for the week ending Friday (6 p.m.), the 8th of June 1888.

Meteorological division.	District.	Station.	Rainfall. Saturday, 2nd June.	Sunday, 3rd June.	Monday, 4th June.	Tuesday, 5th June.	Wednesday, 6th June.	Thursday, 7th June.	Friday, 8th June.	Total. Number of rainy days.	Rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 15th May.	Average rainfall from 15th May to date.

The total fall from 1st January to 9th June 1888	14·73
The average fall of the corresponding period for 24 years, S. G.'s Office ...	12·34

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, p passing temporary showers, t thunder, d drizzling rain, < lightning.

A. Pedler,
For Offg. Meteorological Reporter to the Govt. of India.

Explanation. Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten years.
The *humidity* of the atmosphere is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The number are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past 12 stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

* Mean of 4 days.
† Mean of 6 days.

Statement of Rainfall in Bengal for the week ending Friday (6 p.m.), the 8th of June 1888—*contd.*

Meteorological Division.	District.	Station.	RAINFALL. Saturday, 2nd June.	Sunday, 3rd June.	Monday, 4th June.	Tuesday, 5th June.	Wednesday, 6th June.	Thursday, 7th June.	Friday, 8th June.	TOTAL. Number of rainy days.	Rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 15th May.	Average rainfall from 15th May to date.

Explanation.—...... Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 8th June* 1888.

SUMMARY OF METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 8TH OF JUNE 1888.

AT the close of the previous week the meteorological conditions generally were normal for the period just previous to the commencement of the monsoon rains in Bengal. Hot weather conditions but with rather moist winds, and frequent local storms with rain, obtained in Bengal, and over the south and centre of the Bay the monsoon winds had made good progress. The monsoon current then blowing over this area represented the third strong advance of these winds which had taken place this year from the south of the Bay, and this advance was decidedly the most powerful and pronounced of the three. This advance had been shown from the 27th of May by the very strong winds which had been blowing at the Ceylon stations, and on June 1st, or the last day of the previous week, the advance had reached well into the centre of the Bay, and there were no indications of any definite storm having formed in front of the advance. On the 2nd of June, however, there was a decided fall of pressure at the central stations on the east coast of the Bay, while wind directions showed rather strong indraught towards the sea area. It was clear on this day that a small cyclonic storm was forming to the north-west of the Andaman Islands. On the morning of the 3rd the small storm had developed somewhat rapidly, and it existed as a well-defined, though rather small, storm off the Pegu Coast. On this day weather was probably rather stormy to the east of the centre of the Bay, and strong winds were reported in Burma at the neighbouring stations of Diamond Island and Bassein. The small storm then commenced to move in a north-westerly direction, and on the 4th of June it was in the centre of the Bay, and apparently advancing towards the Orissa coast. On this day also it is probable that the storm was of moderate intensity, though there were indications that it was even then of less intensity than it had been on the previous day. The special four-hourly observations made at some of the principal stations at the head of the Bay, which had been called for, showed that from 8 A.M. of the 4th, and particularly during the night of this day, the storm gradually became more and more feeble till, on approaching the coast on the morning of the 5th, it had ceased to exist as a definite storm, and its place was taken by a diffused disturbance of little importance, which gradually drifted over Orissa and the head of the Bay, giving moderate rain only. On the 6th, pressure continued to fall over South-West Bengal and Orissa, owing probably to the continued feeble existence of the depression, but after this date it disappeared, and ceased to affect the weather of the province. With its disappearance a moderately strong south-easterly current set in over the greater part of the province, and moderate rain fell in all districts except South Behar and Chutia Nagpur. Even up to the close of the week, however, the true rains cannot be said to have broken in Bengal, for the rainfall brought up by the moist wind current blowing has generally accompanied local storms; and though south-easterly and easterly winds have been reported over a large part of the province, still north-westerly and westerly winds have been blowing at the western stations in Behar and Chutia Nagpur. By the actions above described, however, fairly frequent rain showers have been received in all districts of the province except parts of Chutia Nagpur and South Behar. In the Bay during the week weather has probably been squally, and for one or two days perhaps stormy in the central and eastern parts.

Pressure.—From the preceding description of the meteorology of the week, it will be seen that pressure has been necessarily low in the districts of Orissa and South-West Bengal. At False Point indeed the mean pressure for the week has been below the normal by 0·043 inch, and at Saugor Island by 0·040 inch, but the general defect of pressure over the whole province has been 0·019 inch, and at such stations as Durbhanga the mean presure for the week has been actually above the normal. In Assam, pressure has been below the normal by 0·023 inch.

Temperature—Has been above the normal in East Bengal, and elsewhere it has been below it; the defect equalling 2° in South Behar and nearly 4° in North Behar. For the whole province temperature has been below the normal by 1·2°. In Assam the defect has only been 0·7°.

Rainfall—Has been slightly above the usual fall for the period in South-West Bengal and in Behar; it has been below it by moderate amounts in Orissa, North Bengal and Chutia Nagpur; while in East Bengal the defect has been rather large. The general rainfall in South-West and North Bengal has averaged between two and three inches; in East Bengal and North Behar it has averaged from one to two inches; while in Orissa, South Behar and Chutia Nagpur it has varied from about half an inch to an inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the week ending Friday, the 8th of June 1888 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May.

The mean temperature and humidity are obtained by applying to the mean of the 10h, 16h, and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

METEOROLOGICAL OFFICE, INDIA ;
The 11th June 1888.

A. PEDLER,
For Offg. Meteorological Reporter to the Govt. of India.

MEMORANDUM.

THE subjoined table presents the vital statistics of the principal Municipalities in Bengal for the week ending 26th May 1888. The results to be gathered from it, contrasted with those of the preceding week ending 19th May, are the following :—

1. Births and deaths were registered at the following rates :—

	Ratio per *mille* for weeks ending— 26th May 1888.	19th May 1888.
Births	18·4	20 0
Deaths	22·6	24·2

indicating a retrogression in the registration of both the casualties.

2. In the following Municipalities births and deaths occurred at the highest rates :—

Births.	Ratio per *mille.*	*Deaths.*	Ratio per *mille.*
Narainganj	45·6	Utterpara	37·7
Monghyr	36·2	Suburbs of Calcutta	34·8
Bhagulpore	33·5	Gya	34·8
Mozufferpore	32·8	Kishnaghur	34·1
Comillah	30·8	Bhagulpore	32·6
		Durbhanga	32·3
		Chittagong	30·5

3. From the figures in the following table it appears that during the week under notice, the mortality from cholera and fever had declined sensibly, and that there were no marked differences in fatal results from the rest of the death-causes :—

	Ratio per *mille* during the weeks ending— 26th May 1888.	19th May 1888.
Cholera	3 6	4·5
Small-pox	·03	1
Fever	8·7	9·9
Bowel-complaints	3 0	2·7
Injury	·7	·6
Other causes	6·5	6·4

4. Of the diseases mentioned above, while fever proved noticeably fatal in the Kishnaghur Municipality, viz., at the rate of 24·6 per 1,000 of population, and small-pox, bowel-complaints and injury exhibited only normal fatality, cholera and the maladies recorded under the head of "Other causes" caused the highest mortality in the following Municipalities :—

Cholera.	Ratio per *mille.*	*Other causes.*	Ratio per *mille.*
Suburbs of Calcutta	9·5	Utterpara	28·3
Chittagong	7·0	Mozufferpore	14·6
Hughli	5·4	Bhagulpore	12·7
Durbhanga	4·7	Gya	12·3
Patna	4·2		
Gya	2·7		
Dacca	2·6		
Howrah	2·3		

5. In relation to *Sex*, *Class* and *Age*, the mortality of the week was distributed as follows :—

According to Sex.

	Ratio per *mille.*
Males	23·4
Females	21·8
Ratio of male deaths to every 100 female deaths	121

According to Class.

	Ratio per *mille.*
Christians	30·4
Hindus	21·8
Mahomedans ...	24·7

According to Age.

	Ratio per *mille.*
Under 1 year ...	171·5
1 and under 5 years ...	59·8
5 " 10 " ...	15·5
10 " 15 " ...	6 8
15 " 20 " ...	16·2
20 " 30 " ...	12·7
30 " 40 " ...	17·8
40 " 50 " ...	19·5
50 " 60 " ...	20·8
60 years and upwards ...	42·0

General remarks on the fluctuation of principal staples carried over the East Indian Railway during five weeks ended 28th April 1888.

INCREASES.

Coal and coke.—There was an increase in both the upward and downward traffic; the former was inconsiderable, and the latter was due to facilities afforded by the opening of the Jubilee Bridge.

Piece-goods.—The increase under this head was due to the large number of Hindu marriage ceremonies taking place during the period.

Gunny bags.—Due to larger despatches to the North-Western Provinces and Punjab in the knowledge that crops in those provinces were fuller than in 1887.

Other fibres, raw.—Due chiefly to despatches from Allahabad.

Minerals.—This large increase was principally due to heavy despatches of lime from Raneegunge and Ondal for the Kidderpore Dock-works.

Iron.—Due principally to large consignments of pig iron from Howrah to Peshawar and of machinery for cotton mills to Cawnpore.

Seeds.—The increase was principally in linseed and mustard and rape seed; the former for export, and the latter for both export and local consumption.

Spices.—This was chiefly in chillies from Mokameh, Mokameh Ghât and *viâ* Mokameh Ghât.

Tobacco.—This was in despatches from the Tirhoot State and the Bengal and North-Western Railways, and also from Barh and Patna, owing to the crops this season having been abundant.

DECREASES.

Cotton.—Due to bad crops last season.

Wheat.—No demand for export owing to home market being dull.

Gram and pulses.—Due to absence of demand in Calcutta for shipment to Madras and Burmah.

Rice (husked and unhusked).—There was an increase in the upward traffic, but a greater decrease in the downward despatches, resulting in a considerable falling off in the weight carried attended with a smaller decrease in earnings; and this was due to the Calcutta market not being able to compete on equal terms with up-country purchasers.

Other grains.—The small decrease under this head appears to be due to there having been fair crops at all stations.

Brass and copper.—Due to despatches being still restricted by high prices.

Opium.—Increase in weight carried, but a decrease in earnings. The despatches in crude opium increased; but there were smaller despatches of the manufactured article to Calcutta than in the corresponding period of 1887.

Railway material, Foreign.—The decrease was in consequence of heavy despatches last year from Howrah and *viâ* Jubbulpore for the Indian Midland Railway.

Salt.—Due to high prices still ruling in the Calcutta market.

Stone.—Due to absence of demand for Mirzapore stone.

Sugar and jaggree.—Increase in weight attended with decrease in earnings, and the fluctuations are due to the same causes as reported for March 1888.

N. St. L. CARTER, *Traffic Manager.*

TRAFFIC MANAGER'S OFFICE, JAMALPUR, *the 9th June* 1888.

GOVERNMENT OF BENGAL--PUBLIC WORKS DEPARTMENT.

RAILWAY.

Dated Calcutta, the 9th June 1888.

READ—

Government of India, Financial Department, Resolution No. 427, dated 28th June 1880.

Letter No. 375, dated 7th May 1888, from the Manager, Eastern Bengal State Railway.

Letter No. 1775, dated 9th May 1888, from the Manager, Nalhati State Railway.

Letter No. 3471, dated 10th May 1888, from the Manager, Tirhoot State Railway.

Read also—

Resolution No. 1459R.A., dated 29th June 1887.

Observations.—On the 1st April 1887, the Eastern Bengal State Railway came under the control of this Government, and for special and economical reasons the Northern Bengal, Kaunia and Dharlla and Dacca State Railways were placed under the management of the Eastern Bengal State Railway. Later on the portion of the Assam-Behar Section of the Assam-Behar State Railway was also placed under the same management, the whole being considered as one Railway system, and the review of the Fine Fund of the Eastern Bengal State Railway System comprises therefore the transactions on all the Railways mentioned above.

2. The review for all lines for the year 1887-88 have been received, and are summarized in the following table :—

RAILWAYS.	RECEIPTS.				EXPENDITURE.			Balance at end of 1887-88.
	Balance on 1st April 1887.	Fines.	Interest.	Total.	Disbursements.	Refunds.	Total.	
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Eastern Bengal State Railway	8,525 10 0	7,291 5 5	313 1 8	16,130 1 1	7,685 1 3	182 14 0	7,867 15 3	8,262 1 10
Tirhoot State Railway	790 14 2	1,129 1 0	26 10 6	1,946 9 8	1,291 12 0	17 2 9	1,308 14 9	637 10 11
Nalhati State Railway	178 6 2	50 3 6	4 15 1	233 8 9	129 9 3	......	129 9 3	103 15 6

3. Under the head of Expenditure the principal disbursements were as follows :—

Eastern Bengal State Railway.—Institute Rs. 1,580 ; Schools Rs. 2,050 ; Volunteering Rs. 1,270-11-3 ; Amusements Rs. 450 ; Assistance to employés Rs. 2,334-6.

Tirhoot State Railway.—Institute Rs. 610 ; Compensation Rs. 252 ; Amusements Rs. 150 ; Schools Rs. 25 ; Medicines Rs. 48-6 ; Volunteering Rs. 200.

Nalhati State Railway.—Schools Rs. 77 ; Institute Rs. 52 ; Dispensary Re. 0-9-3.

RESOLUTION.—The reduction of the balances of the funds still continues, it being borne in mind that the present employés should benefit, as far as possible, from the receipts that have accrued during their term of service. The balance of the fund on the Eastern Bengal State Railway System still seems, however, unnecessarily high. Rupees 1,078-3-6 was expended on the Eastern Bengal State Railway in supplying menial and line staff employed on out-door work, and who have consequently to undergo exposure, with blankets ; Rs. 356-4 have been advanced on loan to employés to assist them in sending their children to school ; and Rs. 142 have been advanced to the Volunteer Prize Fund : the two latter amounts are recoverable.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Government of India, in the Public Works Department, and to the Managers of the Bengal Provincial Railways for information, and that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

E. J. MARTIN,

Offg. Secy. to the Govt. of Bengal,
P. W. Dept.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the crops in the different districts of Bengal, as reported to Government during the week ending the 16th June 1888.

Division	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.		***Western Districts.***		
Burdwan Divn.	1	Burdwan June 16, '88	0·69	Weather—extremely hot with light breeze from the west. Prospects good. Sowings of the season nearly complete. Anxiety is felt at the absence of general rain. Common rice still 22 seers per rupee.
		Culna ...	0·79	
		Cutwa ...	0·11	
		Raneegunge ...	2·43	
	2	Bankoora „ 16, '88	0·10	Weather—sultry. Rain wanted for sowing of paddy throughout the district. If it does not rain soon, the seed plants that are above the ground will die. No appreciable change in the rice market.
	3	Birbhum „ 16, '88	0·77	Weather—very sultry. Rain urgently needed for ploughing. Sugarcane thriving.
		Rampur Haut ...	0·68	
	4	Midnapur „ 16, '88	0·04	Weather—extraordinarily hot, with high west wind. Rain wanted, as seedlings have commenced to dry up in some places. Indigo plants had made good progress, but the excessive heat has been unfavourable. Manufacture commences shortly.
	5	Hugli „ 16, '88	Nil	Weather—abnormally hot. State and prospects of crops good.
		Serampur .	0·35	
		Jehanabad ...	2·35	
		Howrah „ 16, '88	Nil	Excessive heat. Rain greatly wanted. Paddy seedlings and jute suffering.
		Central Districts.		
Presidency Divn.	6	24-Perghs. June 19, '88	Nil	Weather—abnormally hot and close. *Aus* rice, jute, and sugarcane doing well. Ploughing and sowing continue.
	7	Nuddea „ 16, '88	0·42	Temperature extremely high and hardly tolirable. In the north *boro* rice harvest still in progress. *Aus* rice wants rain badly, but reports are favourable. Indigo manufacture going on well. Rain urgently wanted everywhere.
		Kooshtea ...	Nil	
		Meherpur ...	0·24	
		Chooadanga ...	0·10	
		Ranaghat ...	0·28	
	8	Khoolna „ 16, '88	0·03	Weather—oppressively hot. North-wester on afternoon of 15th. More rain wanted for young *aus* in Bagirhat; elsewhere it looks well. Cultivation in progress.
	9	Jessore „ 16, '88	0·83	The week was very hot until yesterday (15th), when a good shower fell. Rain badly wanted. Harvesting of *til* going on. Sowing of *amun dhan* progressing. Young *aus* plants are thriving.
		Jhenidah ...	0·12	
		Magoora ...	4·22	
		Narail ...	0·04	
		Bongong ...	1·21	
	10	Moorshedabad „ 16, '88	Nil	Weather—exceedingly hot. No rain during during the week, except a few drops on the 15th afternoon. Sowing of *amun* progressing. Young *aus* doing well.
		Lalbagh ...	0·05	
		Kandi ...	Nil	
Rajshahye Divn.	11	Dinagepur June 16, '88	0·34	Weather—very hot. Sowings of *haimanti dhan* continue. Prospects good.
		Thakurgaon ...	0·95	
	12	Rajshahye „ 16, '88	0·32	Weather—close and sultry; occasionally cloudy. *Aus* and *amun* thriving well. Harvesting of *boro* nearly completed; that of *til* commenced. Prospects of jute very good.
		Nattore ...	1·45	
		Nowgong ...	0·86	
	13	Rungpur „ 16, '88	0·57	Weather—hot. Prospects of crops good. *Aus* is being reaped and *amun* sown.
		Kurigram ...	4·69	
		Nilphamari ...	1·37	
	14	Bogra „ 16, '88	1·83	Weather—muggy. State and prospects of crops good.
		Sherpur ...	1·31	
		Nowkhilla ...	3·95	
	15	Pubna „ 16, '88	0·37	Weather—cloudy, and latterly excessively hot. Prospects of crops promising.
		Serajgunge ...	1·73	
	16	Darjeeling „ 16, '88	1·43	Weather—unusually hot and muggy. Transplanting of winter rice going on in Terai. Hill crops doing well. Prospects generally good.
	17	Julpigoree „ 9, '88	8·26	
		Eastern Districts.		
Dacca Division.	18	Dacca ...	Return not received.	Weather—hot. Jute and *amun* paddy thriving. *Aus* paddy in low lands and *til* are being harvested. Prospects of crops good.
		Manickgunge ...	2·18	
		Naraingunge ...	3·92	
	19	Furreedpur „ 16, '88	0·73	Weather—very hot. Crops fair, but want of rain is beginning to tell on them a little.
		Goalundo ...	0·25	
		Madaripur ...	0·17	
	20	Backergunge „ 15, '88	2·21	Weather—very hot. Prospects of crops good.
	21	Mymensingh „ 15, '88	2·79	Weather—hot. Prospects of crops good, though somewhat damaged by unusually heavy rain.
		Jamalpur ...	1·50	
		Kishorgunge ...	2·52	
		Attia ...	1·48	
		Netrokona ...	1·92	

Division	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*				
		Eastern Districts—concld.		
Chittagong Divn.	22	Chittagong June 19, '88	1·13	Weather—hot. Cultivation progressing. Prospects fair. Prices steady.
	23	Noakholly „ 15, '88	1·27	Weather—seasonable. State and prospects of crops generally good.
		Fenny ...	2·02	
	24	Tipperah „ 14, '88	0·90	Weather—hot and showery. Crops are coming on well.
		Brahmanbariah .	1·58	
		Chandpur ...	2·10	
	25	Chittagong Hill Tracts. „ 12, '88	2·47	Weather—cloudy and rainy during the latter part of the week. Sowing in *jums* over. Plants thriving well Sugarcane doing well.
		Hill Tipperah „ 13, '88	1·91	Weather—hot. Lands are being prepared for late rice. Chillies gathere Sugarcane doing well.
BEHAR.				
Patna Divn.	26	Patna June 16, '88	0·60	Weather—very hot. Rain very much wanted. Lands kept prepared for *bhadoi* sowings.
	27	Gya „ 16, '88	Nil	Weather—very hot. *Bhadoi* and paddy being sown. Sugarcane being irrigated.
	28	Shahabad „ 16, '88	Nil	Weather—exceedingly hot and sultry. Standing crops—*cheena* and sugarcane—in good condition. Land being prepared for *bhadoi* sowings.
		Sasseram ...	0·40	
	29	Durbhunga „ 16, '88	3·20	Weather—sultry. Prospects of early rice and indigo still continue favourable. *Bhadoi* sowings in progress. Rain much needed. Prices remain stationary.
	30	Mozufferpur „ 16, '88	1·12	Weather—very hot and sultry. Cloudy to-day (16th). Sowing of *bhadoi* crops progressing rapidly. Rain urgently wanted.
		Hajeepur ...	1·13	
		Sitamarhi ...	0·40	
	31	Sarun „ 16, '88	0·19	Weather—hot and close; occasionally cloudy. *Makai* sowings and *marua* transplantation in progress. Prospects of sugarcane and indigo continue favourable. *Cheena* being harvested; outturn good.
		Sewan ...	Nil	
		Gopalgunge ...	0·05	
	32	Champarun „ 16, '88	1·16	Weather—excessively hot. Paddy sowings have come up well. Cutting of indigo plants has been commenced. Prospects good.
		Bettiah ...	0·76	
Bhagulpore Divn.	33	Monghyr „ 16, '88	0·45	Weather—excessively hot and steamy throughout the week. *Bhadoi* sowings in progress. More rain urgently wanted, specially in south, for paddy sowings.
		Beguserai ...	0·03	
		Jamui ...	1·24	
	34	Bhagulpur „ 16, '88	Nil	Weather—very hot and oppressive. Ploughing going on. Rain wanted.
	35	Purneah „ 16, '88	Nil	Weather—hot; occasionally overcast. All crops doing well.
		Kishengunge ...	Nil	
		Ararenh ...	0·13	
	36	Maldah „ 16, '88	0·04	Weather—sultry with occasional clouds. *Boro* harvest now over; outturn good. *Bhadoi* crops doing well. *Amun* sowing going on. More rain now wanted in thannas English Bazar, Maldah, Ratua and Nawabgunge. Common rice selling at an average of 23¼ seers per rupee.
		Chauchal ...	0·04	
		Shibgunge ...	0·86	
		Gajole ...	Nil	
	37	Sonthal Perghs. „ 16, '88	Nil	Weather—excessively hot and sultry. Rain wanted everywhere, especially in Deoghur. *Dhan* seedlings are drying. *Boro dhan* 12 annas.
		Deoghur ..	0·47	
		Rajmahal ...	0·60	
		Pakour ...	1·09	
		Godda ...	1·00	
ORISSA.				
Orissa Divn.	38	Cuttack June 15, '88	0·30	Weather—very hot; occasionally cloudy without much rain. Sowing of rice in progress in places. More rain urgently required. Price of rice rising.
	39	Pooree „ 14, '88	0·33	Weather—seasonable. Winter rice (*sarad*) sowing going on. *Dalua* crop is being harvested. Common rice 21 seers 13 chittacks per rupee in the Sudder Sub-division, and 20 seers 7 chittacks in Khoorda Sub-division.
		Khoorda .	1·80	
	40	Balasore „ 15, '88	0·39	Weather—oppressively hot. Rain urgently wanted. If it does not rain within a few days, much of the young rice will perish.
CHOTA NAGPORE.				
		South-West Frontier Agency.		
Chota Nagpore Divn.	41	Hazaribagh June 15, '88	0·27	Weather—bright and clear; very hot and dry. Rain wanted everywhere for early sowings of paddy. Sugarcane doing well.
	42	Lohardugga „ 16, '88	0·5	Weather—hot. Slight rain during the week. More rain urgently wanted. Rice and Indian corn being sown. Prices steady.
	43	Singbhoom „ 15, '88	1·23	Rain in the early part of the week. Sky clear. Weather intensely hot again. Rice being sown. Sugarcane doing well. Cotton being gathered.
	44	Manbhoom „ 16, '8	0·05	Weather intensely hot. Rain badly wanted. Everywhere paddy seedlings are withering, and will suffer much unless the rains break soon. Sugarcane is growing. Rice sells at from 16 to 22 seers per rupee.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h. 10h. 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 56, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, g gloomy, t thunder.

Explanation.—[illegible] normal means of air pressure and temperature are the arithmetical average or means of the readings during the [illegible] period for the last [illegible] years. The humidity [illegible] is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the numerical [illegible] of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past [illegible] stations in the district [illegible] returns divided by the number of stations. A rainy day is one on which at least a hundredth of an inch fell.

* Mean of 6 days.

for the week ending Friday the 15th of June 1888

Average Humidity at 10 A.M.	Average cloud amount at 10 A.M. for week.	Rainfall of week at observing station	Of week. Mean for district	Of week. Normal mean.	Rainfall. Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since May 15th. Mean for district.	Since May 15th. Normal mean.	Since May 15th. Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	District.	Meteorological Division

Explanation.—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the return are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 19th June* 1888.

SUMMARY OF THE RAINFALL AND METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING FRIDAY, THE 15TH OF JUNE 1888.

THE meteorological conditions obtaining over the province at the close of the previous week were those which characterise the hot weather in Bengal, though the winds blowing were decidedly more moist than usual. Moderate and fairly general rain had been received in the week ending the 8th instant, but the rainfall can scarcely be said to have been brought up by the true south-west monsoon current; for the wind systems had been more like the hot weather distribution, than that characteristic of the true rainy season. On the first day of the present week pressure fell rapidly in South-East Bengal, and there was a distinct tendency to cyclonic circulation of winds. A moist south-easterly wind current however prevailed over a large part of the province, though northerly winds were reported at some of the stations in Behar, Chutia Nagpur and West Bengal. Showers on this day were received generally over the whole of Bengal and Assam. On the following day conditions had not changed very largely, but the low pressure of the previous day in South-East Bengal had developed into a distinct barometric depression, the centre of which was probably over the Sunderbans, and which was accompanied by a distinct cyclonic circulation of winds, though their velocities were small. On this day also showers were reported, but they were far less numerous than on the preceding day, and they were to a considerable extent confined to South East Bengal and Orissa. On Monday, the 11th, the very feeble depression had advanced inland and was near Jessore; on this day rainfall was to a great extent absent over the province, and temperature commenced to rise rapidly. On the 13th pressure continued low over the central parts of the province, and there was a fairly distinct circulation of winds round it. Dry westerly winds set in at the western stations, though they were north-westerly at the northern stations and south-westerly at the southern stations; while elsewhere winds were south-easterly and easterly. With the setting in of these westerly winds, temperature again rose rapidly at the western stations, and the mean temperature varied from 5° to 10° above the normal at many of the western stations. On the 14th a very distinct area of low pressure existed in Central Bengal, and the lowest pressure in the whole province was reported from Krishnaghur, while winds showed a distinct cyclonic circulation round it. Again, the western and south-western stations were affected by the hot dry winds blowing in a westerly and north-westerly direction, and on this day most excessive temperatures were recorded, the mean temperatures at the western stations being about 8° to 10° above the normal for the day. On the 15th the area of low pressure had moved a little in a westerly direction, and it was near Burdwan, and with the similar wind distribution which obtained again, most excessive temperatures were reported. With the formation of the feeble depression over the centre of the province, moist southerly winds continued to flow in over the east of the province, and fairly general rain set in on the 13th and 14th in East and North Bengal, though the remainder of the province was practically rainless from about the 10th.

The principal facts of the meteorology of the past week have therefore been a most excessive temperature over the greater part of the province, particularly in the western and south-western districts, unusually low pressure, and absence of rain from most districts. The weather has been in fact of a most unusual character, and instead of the south-west monsoon current flowing over Bengal at this time and giving abundant rain as it normally should do, the greater part of the strength of the monsoon seems to have been deflected in an easterly direction, and it has thus given exceptionally heavy rain at many of the stations in Burma.

Pressure—Has been generally below the normal and, as stated above, a low-pressure area has existed over the south of the province for some days. In fact the mean pressure for the week at many of the southern stations has been nearly a tenth of an inch below the normal, and thus at Saugor Island the defect has been 0·099 inch, at Chittagong 0·095 inch, and at Dacca 0·096 inch. At the inland stations the defects have generally been considerably smaller than this, and for the whole province the mean pressure has been in defect of the normal by only 0·064 inch. In Assam, pressure has been below the normal by 0·089 inch.

Temperature.—As stated before, the past week has been noticeable on account of the high temperature registered on some days The temperature generally was highest on Thursday, the 14th, and the mean temperature of the 24 hours from 10 A.M. of the 14th to 10 A.M. of the 15th was above the normal of the day by the following amounts: at Balasore 16·1°, at Midnapore 13·9°, at Calcutta 10·5°, and at Burdwan 10·1°. The maximum temperature recorded at the Alipore Observatory (Calcutta) on the 14th was 106·8°. The highest previously recorded temperature since the establishment of the observatory in 1874 has been 105·6° on April 14th, 1884, the next highest was 105·5° on April 15th, 1885, so that the temperature on this day was certainly 1·2° higher than any in Calcutta of which there are thoroughly reliable records, or rather records comparable with those made at the present time. A higher temperature than this even was recorded on this day, the 14th of June 1888, at the Chowringhee Observatory, and the maximum thermometer indicated no less than 107·2°. Very high maximum temperatures were also recorded at other stations:—thus Dehree registered 114·5° on the 14th, Gya 113·6° on the 14th, Balasore 113° on the 15th, Midnapore 112·4° on the 14th, and several other stations temperatures above 110°. The mean temperature for the whole week has been nearly 4° in excess of the normal in Chutia Nagpur, Orissa, and South-West Bengal, about 2° above it in East Bengal and South Behar, while temperature has been nearly normal in North Bengal and North Behar. For the whole province of Bengal temperature has been more than 2° above the normal. In Assam temperature has been 0·4° in excess of the normal.

Rainfall.—The only rainfall of importance has been in East and North Bengal, which have received an average of about one and-a-half inches; North Behar and Orissa have received an average fall of half an inch; and South-West Bengal about a third of an inch. South Behar and Chutia Nagpur have received average falls of less than two-tenths of an inch. In all cases, therefore, rainfall has been very largely below the normal.

In Assam the following rainfalls have been recorded during the week:—Silchar 4·79 inches, Sibsagar 1·08 inches, and Dhubri 0 05 inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the week ending Friday, the 15th of June 1888:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below norm al mean of week.	Of week.			Rainy days.			Since 1st of month		Since 15th May.

The mean temperature and humidity are obtained by applying to the mean of the 10h, 16h, and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

Meteorological Office, India;
The 18th June 1888.

A. Pedler,
For Offg. Meteorological Reporter to the Govt. of India.

MEMORANDUM.

THE birth and death returns of the principal Municipalities in Bengal yield the following results for the week ending 2nd June 1888 :—

1. The ratios per mille of births and deaths for the period above referred to stand at—births 15·8 and deaths 19·6; the corresponding figures of the preceding week ending 26th May, being 18·4 and 22·6 respectively, indicating a falling off in the registration of both the events.

2. In the following Municipalities births and deaths are reported to have been recorded at the highest rates :—

Births.	Ratio per *mille.*	*Deaths.*	Ratio per *mille.*
Bhagulpore	37·	Darjiling	32 6
Monghyr	32·5	Gya	32 2
Gya	30 8	Chittagong	30 5
		Suburbs of Calcutta	29·6

3. In comparison with the results of the preceding week, there was a diminution of mortality, to a more or less extent, from all the diseases, excepting small-pox, *vide* figures given below :—

	Ratio per *mille* during the weeks ending— 2nd June 1888.	26th May 1888.
Cholera	3·0	3·6
Small-pox	·1	·03
Fever	7 9	8·7
Bowel-complaints	2·9	3 0
Injury	·4	·7
Other causes	5·3	6·5

4. Of the above-named diseases, cholera and the maladies classed under the head of "Other causes" were more fatal to life in the following Municipalities :—

Cholera.	Ratio per *mille.*	*Other causes.*	Ratio per *mille*
Chittagong	14 1	Puri	12·7

* A special census of the Europeans in the Darjiling Municipality was recently taken, as the census of this section of the community, taken in February 1881, was not reliable owing to the Europeans being at a minimum in that month. The number of the natives remains as before, as it was not necessary to re-census them. The ratios have consequently been calculated on the revised population under all heads in the above table, except "*Age*," the ratios under which have been omitted, inasmuch as the census of the Europeans above alluded to cannot be employed as a basis of calculation owing to the results of the census under this head not having been recorded under the authorized form of age classification.

Excludes local traffic of the Dacca, Northern Bengal, and Kaunia and Dharla Railways during 1887.

Comparative statement of the principal commodities carried over the Eastern Bengal State Railway during the month of February 1888.

INCREASES.

	Tons.
Coal ...	14,618
Increased importations from the East Indian Railway on account of increased demand for Railway and Flotilla purposes and for the public.	
Cotton, raw ...	364
New crop and a good market	
Cotton piece-goods ...	731
Increased demand.	
Grains ...	16,149
New crop and a favorable market The bulk of the traffic in this commodity is from the Northern Section.	
Seeds ...	693
New crop and a slightly increased demand.	
Salt ...	3,030
Increased demand at stations on the Northern Section.	
Sugar ...	1,971
From Goalundo, Poradaha, Chooadanga and other stations.	

DECREASES.

Jute ...	12,865
Fall in the market	

CALCUTTA, *the 9th June* 1888.

Comparative Statement of the principal commodities carried over the Bengal Central Railway during the month of February 1888.

INCREASES.

	Tons.
Coal	2,218
Due to increased requirement for Railway and Flotilla purposes.	
Grains	1,306
A good rubbee crop and a favorable market. The exportations are principally from Bongong, Binapole, Jhikurgacha and Singbia.	
Betel-nuts	344
From Bengal Central Flotilla stations for export to Burmah.	
Sugar	1,343
Principally from Jhikergacha and Goberdanga.	

DECREASES.

Jute	251
Due to a fall in prices in the Calcutta market.	

CALCUTTA, *the 9th June* 1888.

F. P. QUINLAN, *Examiner of Accounts.*

Nalhati State Railway.

Statement showing Increases and Decreases in tonnage of Staples carried over the Nalhati State Railway during the month of May 1888, as compared with the same month of the previous year.

INCREASE. Tons.

Cotton piece-goods—

(1) European 37

This increase is due to steamer service between Jeaganj and Calcutta being stopped for want of sufficient water in the river.

Grains—

(2) Rice 105

This increase is due partly to the steamer service being closed, and partly to greater despatches from the intermediate stations owing to good crops and favourable demands.

Oils—

(3) Others 23

This increase is due to steamer service being closed for want of sufficient water in the river.

Railway plant and rolling stock 323

This increase is due to greater materials being carried during this year.

Salt 108

This increase is due to steamer service being closed for want of sufficient water in the river.

Oilseeds—

(1) Linseed 31

(2) Mustard and rape... 77

The increase under these heads is due to favourable demand.

Stone and lime 13

This increase is due to greater demands for building purposes.

Sugar—

(2) Undrained 32

This increase is due to favourable market rate.

Tobacco 17

This increase is due to fair market rate.

DECREASE.

Coal 301

This decrease is due to previous stock not being exhausted.

Jute—

(2) Gunny bags and cloths 14

This decrease is due to less demand.

Grains—

(1) Wheat 23

This decrease is due to dull market.

CONTENTS.

RESOLUTION ON THE ADMINISTRATION OF THE JAIL DEPARTMENT FOR THE YEAR 1887.

RESOLUTION.

JAILS.

Dated Darjeeling, the 16*th June* 1888.

READ—

The Report on the Administration of the Jail Department for the year 1887.

Read also—

The Reports for the years 1885 and 1886, and the orders of Government recorded thereon.

Dr. Lethbridge was in charge of the Department throughout the year. The annual report has again been submitted with commendable promptitude. Dr. Lethbridge has also considerably cut down the dimensions of the report by careful attention to the orders of Government. The report for 1887 only fills 35 pages, while that for 1884 required 81 pages. The report for 1886 filled 44 pages.

The general results are very satisfactory. It must, however, be borne in mind that all the statistics are affected by the releases and remissions

granted on the celebration of the Jubilee, and to a certain extent this fact affects all comparisons with the figures of previous years. The death-rate fell to 33·1 per mille, the lowest on record, against 37·2 in 1886, and an average of 59·2 since 1863. The number of whippings was only 266 against 396 in 1886 and a yearly average of 364·25 from 1882 to 1885. The number of escapes fell to 13 against 17 in 1886, and a yearly average of 25·4 from 1881 to 1885. The number of whippings and escapes are the lowest on record. Making every allowance for the effect on these figures of the Jubilee releases, they testify to the excellent administration of the Department.

2. *Judicial Statistics.*—The total jail population at the beginning of the year (14,629) was reduced by the 31st December to 13,210, the lowest figure on record, and in great measure the result of remissions granted on the Jubilee day. The daily average population of all classes of prisoners decreased from 14,805·90 in 1886 to 12,250·36 in 1887. This decrease is confined to convicts and civil prisoners, there being an increase of 63·83 in the daily average of under-trial prisoners, due to the unsatisfactory fact of their longer detention under trial. The number admitted was actually less than in 1886. The following table shows the figures for convicts only for the last ten years:—

	1878.	1879.	1880.	1881.	1882.	1883.	1884.	1885.	1886.	1887.
Number of prisoners in jails and subsidiary jails on the last day of previous year.	17,039	17,936	17,200	16,284	15,231	14,377	13,417	14,051	13,821	13,465
Admitted direct during the year ...	38,929	35,726	33,335	31,465	31,710	29,763	32,034	31,530	30,675	29,942
Total ...	55,968	53,662	50,535	47,749	46,941	44,140	45,451	45,581	44,496	43,407
Admitted by transfer	20,132	20,500	18,811	17,094	15,760	15,499	16,660	17,265	17,372	16,427
Total ...	76,100	74,162	69,346	64,843	62,701	59,639	62,111	62,846	61,868	59,834
Total discharged including transfers ...	58,164	56,962	53,062	49,612	48,324	46,222	48,060	49,025	48,403	47,884
Balance at the end of the year ...	17,936	17,200	16,284	15,231	14,377	13,417	14,051	13,821	13,465	11,950
Daily average number of prisoners ...	17,274	17,258	16,673	15,506	14,801	13,711	13,697	13,757	13,504	10,908

The number of direct admissions (29,942) is lower than in any year except 1883 (29,763), and is a satisfactory proof that there was no appreciable increase of crime in consequence of the Jubilee releases. The balance at the end of the year (11,950) and the daily average number (10,908) are the lowest on record, owing to the releases and the small number of admissions. The proportion of the population confined in central jails rose from 53·38 to 59·55 per cent., a very satisfactory increase, as the conditions of jail life are more penal and the prisoner's labour is more valuable from an industrial point of view in central than in district jails. District jails held 37·61 per cent. of the population, and subsidiary jails 2·84 per cent. The corresponding figures for 1886 are 53·38, 44·60 and 2·00.

3. 30,760 prisoners were released against 30,696 in 1886. While in 1886, 27,125 persons were released on expiry of sentence, the figures for 1887 are 21,328. On the other hand the number released on other grounds rose from 27 to 6,484. These figures are accounted for by the releases at the time of the Jubilee. The number released on appeal has steadily increased from 1,384 in 1882 to 1,903 in 1887. This point will be dealt with in considering the crime report. The decrease in the number of releases under the head "remission rules," 1,017 against 1,674 in 1886, is due to the fact that a large number of prisoners who would otherwise have been released under the mark system, some time in 1887, were set free on the Jubilee day.

4. The number of convicts transported beyond seas rose from 468 in 1885 and 668 in 1886 to 797 in 1887. The attention of the Government of India has been drawn to the fact that some of the Local Governments have relaxed too far the new rules of selection. In one case from another province the prisoner was almost blind of both eyes. The number of Bengal prisoners transported was 168. The corresponding figures for 1885 and 1886 were 78 and 137 respectively. Executions rose from 17 in 1886 to 30 in 1887.

5. The number of Burmese prisoners confined in Bengal Jails was increased by 20 during 1887, bringing the total to 284. The Government of India

has now under consideration a scheme for granting tickets-of-leave to this class of prisoners. Some such scheme is required, as they will otherwise become a source of danger from their increasing numbers in the less secure district jails. They mostly enjoy excellent health in Bengal. Their conduct was generally good, but the number of offences increased from 174 to 450, of which 178 related to work. This is still far below the average reported in the case of other prisoners. One of them committed a very serious assault on a convict officer. Two Burmese prisoners escaped through the carelessness of the Pubna Jail officials. Of the three men who escaped in 1886, one was recaptured. He states that his companions both died on the way back to Burma, one was drowned, and the other killed in the Chittagong Hill Tracts.

6. The figures given by the Inspector-General show that 57·34 per cent. of the persons admitted in 1887 were Hindoos, 38·61 per cent. Mahomedans, and 1·27 per cent. Christians. There were also 168 Buddhists and 665 of other religions. The figures differ very little from those for last year. The percentage of Christians fell from 1·89 in 1886 to 1·27 per cent. in 1887. The number of juveniles admitted rose to 296 from 273 in 1886. The Reformatory Schools at Hazaribagh and Alipore continue to do excellent work.

7. Of the prisoners admitted 18,686, or 62·40 per cent., were sentenced to imprisonment for three months and less. The corresponding figures for 1886 were 19,729, or 64·3 per cent. The number sentenced to simple imprisonment fell from 2,340 to 2,216. The number of juvenile offenders sentenced to whipping fell to 377 from 448 in 1886. The number of other judicial whippings has fallen continuously from 1,965 in 1885 to 1,373 in 1887.

8. The number of female prisoners admitted into jail fell from 1,573 in 1885 to 1,391 in 1886 and 1,280 in 1887. The rules to prevent solitary confinement where there happens to be only one female in jail proved successful. 351 women were released on the Jubilee day, leaving only 78 women in the Bengal Jails. A female ward has been opened in the Presidency Jail to obviate legal difficulties connected with the jurisdiction of the High Court.

9. The number of reconvicted prisoners admitted into jail decreased from 3,589, or 11·70 per cent. of admission, in 1886, to 3,472, or 11·60 per cent., in 1887. New rules were introduced in February 1887 regarding the identification and classification of habitual offenders, and until they have been working some time it will be impossible to draw comparisons of any value with the figures of previous years. The jails showing the largest number of reconvictions were Calcutta 402 or 22·56, Monghyr 149 or 22·10 and Alipore 139 or 12·16 per cent. In Monghyr the percentage rose from 19·39 in 1886 to 22·10 in 1887. The District Magistrate attributes the increase in Monghyr to the exertions made in tracing the previous history of convicts by the District Superintendent of Police, Colonel Ramsay, to whom these results are very creditable. It is probable that similar exertions in other districts would lead to more accurate results than are now obtained. The number of persons imprisoned for failing to give security for good behaviour rose to 838. Of the prisoners admitted, 86·92 were unable to read and write; 9·66 per cent. were able to read and write a little, and the remainder could read and write well. The figures differ little from those for 1886.

10. The number of under-trial prisoners admitted during the year was 26,240, the lowest number admitted since 1883. The average period of detention was 17·75 days, a longer time than in any other year of this decade. It is impossible to compare the figures for different subsidiary jails, as at present the figures do not distinguish between prisoners in Sessions cases, where the delay is more or less unavoidable, and in Magistrate's cases. Sir Steuart Bayley approves of the proposal of the Inspector-General of Jails to show such cases separately in future. The Lieutenant-Governor has recently given orders that under-trial prisoners in central, district and intermediate jails shall be placed on full diet from the date of their admission, and it is hoped this will have some effect on the health of convicts during the first few months of their confinement. That the health of under-trial prisoners at the time of admission is very bad appears to be proved by the fact that out of 27,120 individuals who spent on an average 17·75 days in jail, 36 should have died. It is scarcely possible to suppose that the

death-rate in these cases should have been affected by the treatment the prisoners received in the subsidiary jails. The accommodation for under-trial prisoners is good and sufficient, except in the Presidency and Gya Jails, where, owing to want of funds, it has hitherto been impossible to deal with this question. The Lieutenant-Governor hopes it may be taken up during the current year. 6 under-trial prisoners escaped during the year (excluding 5 prisoners who escaped and were recaptured during the year), the same number as in 1885 and 1886. 3,054 civil prisoners were admitted during the year against 3,410 in 1886. Out of this number 62 were released on the Jubilee day, the Imperial Government paying their debts to the amount of Rs. 3,632.

11. *Jail buildings.*—Six new subsidiary jails were built at a cost of Rs. 28,953. A female ward, new guard-house and new workshop was provided in the Alipore Jail at a cost of Rs. 33,691. In the Presidency Jail solitary cells and an inner wall were built, costing Rs. 7,383. In Dacca Rs. 18,691 were expended on the new Central Jail. In Buxar Central Jail an upper story to the factory cost Rs. 9,349. The daily average number of prisoners employed on jail buildings was 1,124. The estimated earnings of the prisoners so employed is not shown in any of the financial statistics of this report.

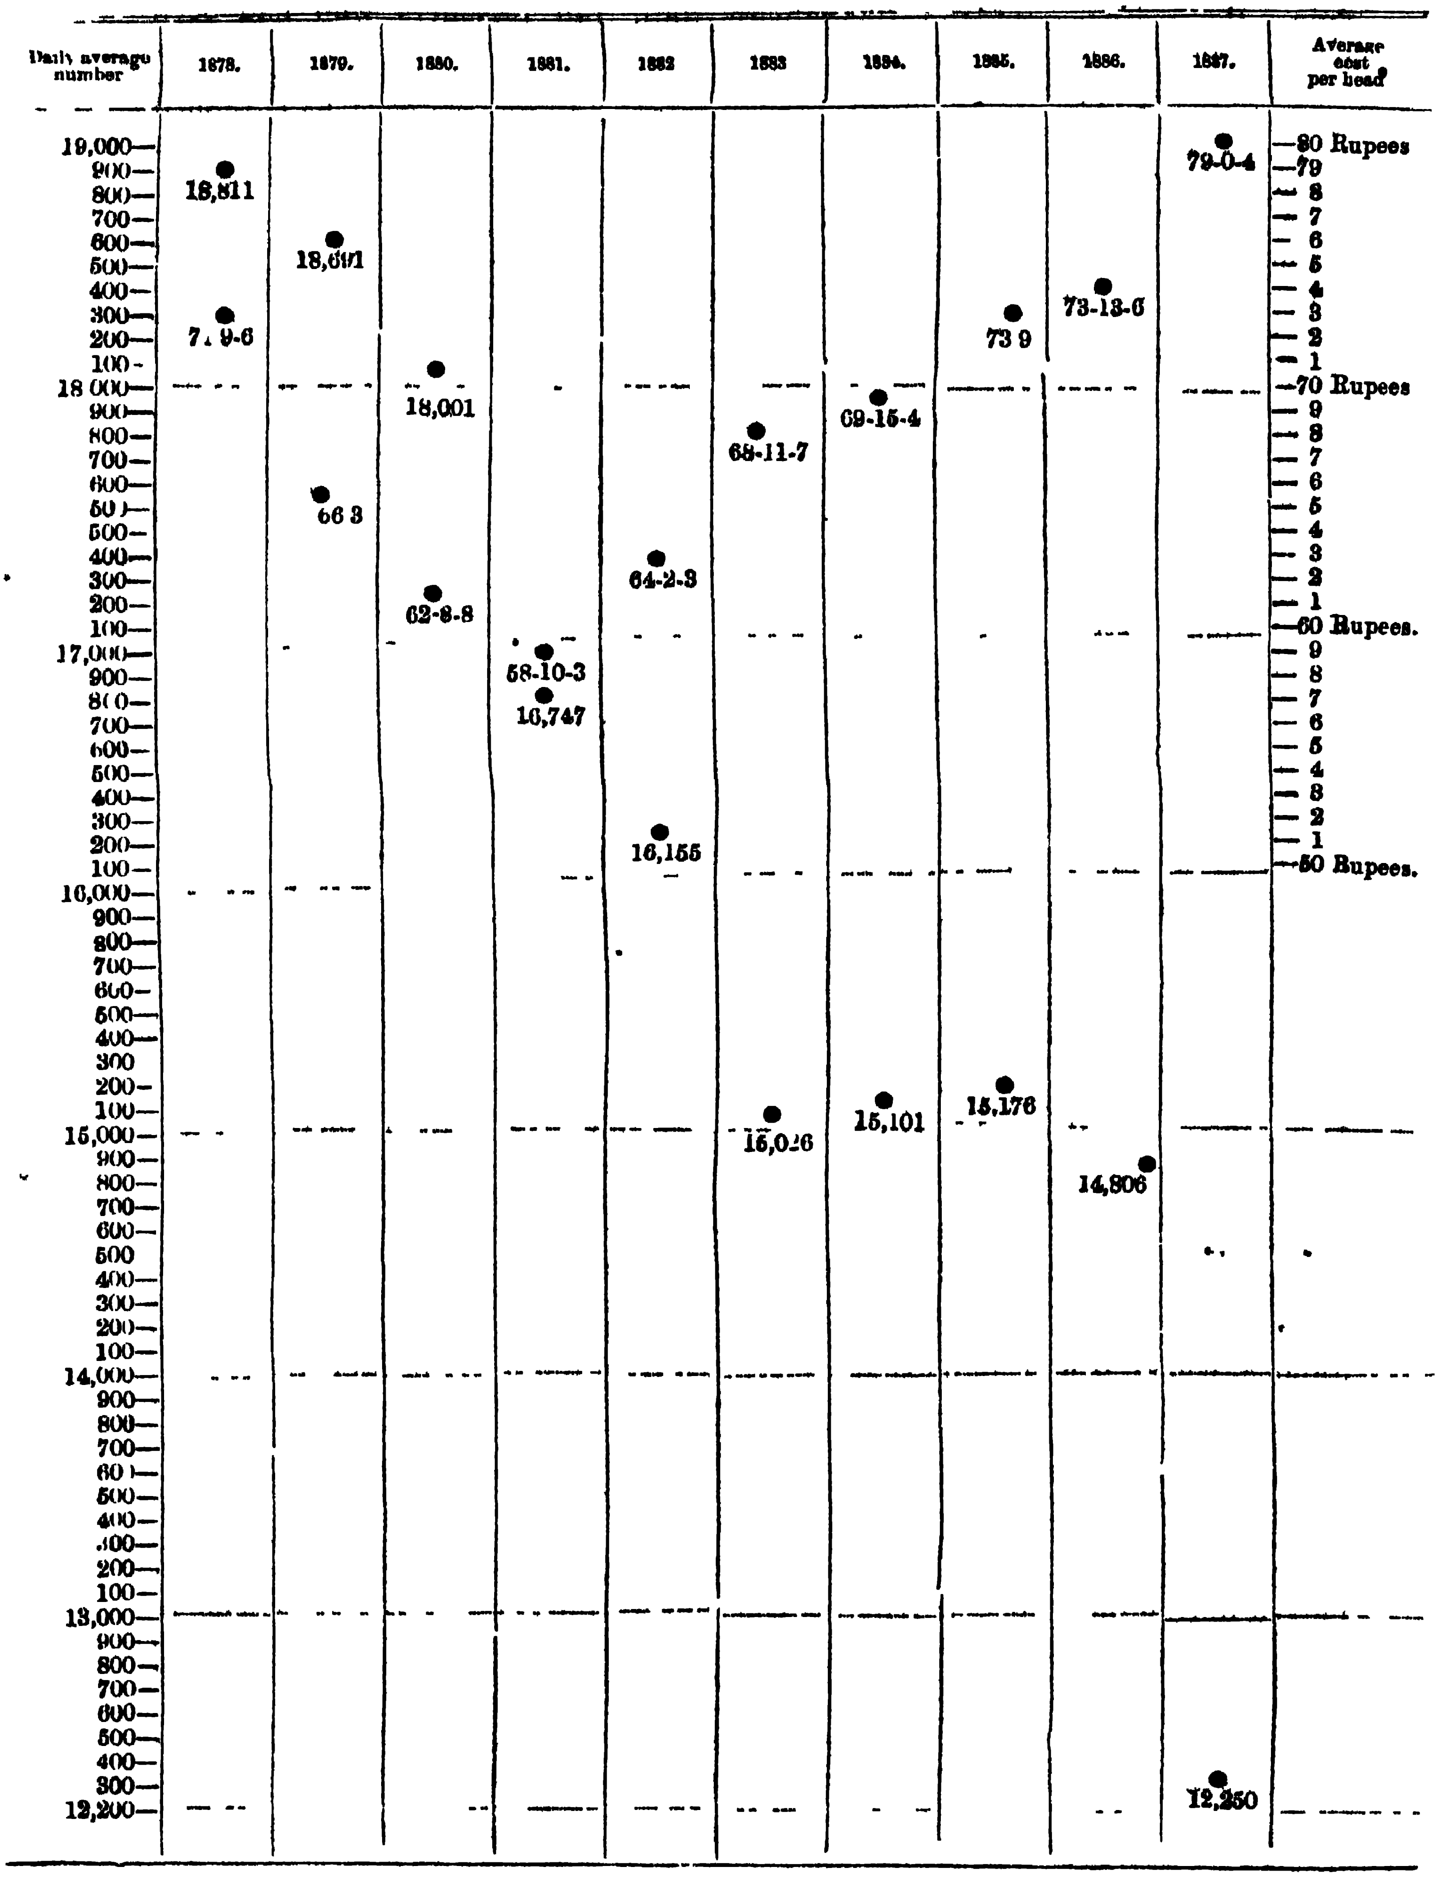
12. *Guards and Escapes.*—The Jail establishment of Bengal was organised in 1878 for a jail population which averaged for 1874, 1875 and 1876 over 21,500 prisoners of all classes, the jail population having steadily since then decreased to its daily average of 12,250 in 1887. On the proposal of the Inspector-General of Jails, the Bhagulpore District Jail was abolished last year, and the reserve guards of 14 district jails, containing less than 100 prisoners, were dispensed with. Towards the close of the year Government sanctioned the reduction of 14 district jails to the new grade of intermediate jails. The result is a net saving of Rs. 44,958 per annum. The Inspector-General of Jails states that, should the jail population not increase, he will recommend a reduction of three more district jails to the intermediate grade.

13. The Lieutenant-Governor is glad to observe that Dr. Lethbridge is able to report a further improvement in the paid warder establishment, especially marked by the improvement in their military training and manner of carrying out their routine duties. Formerly many men resigned on the slightest occasion; now, if a warder is dismissed, he does not hesitate to come all the way to Calcutta to lay his case before the Inspector-General if he sees the least chance of being reinstated. The total number of warders employed in jails and subsidiary jails during the year was 1,707. The number of offences decreased from 3,133 in 1885 and 2,715 in 1886 to 2,359 in 1887. Petty offences were met in 878 cases by warning and extra drill. 405 offences were connected with drill. The number dismissed fell from 216 in 1885 and 128 in 1886 to 103 in 1887. The imposition of small fines is the most common form of punishment, and was adopted in 1,276 cases. Excluding warnings and extra drill, there was barely one punishment per head. It is only by noticing every petty offence that the discipline of men of the class enlisted in the warder establishment can be improved. Where jails are guarded by police whose punishments are not shown in the jail returns, the number of punishments recorded should of course be much smaller. The number of escapes fell to 13, the lowest figure on record. The proportion of escapes to admissions was in 1886 lower in Bengal than in any other province excepting the North-Western Provinces, and it must be borne in mind that the very large number of minor jails greatly increases the difficulty of preventing escapes as compared with other provinces where there are no subsidiary jails. In 1870, 1871 and 1872, when guarding was done by police constables, there were 477 escapes.

Two Burmese prisoners escaped from the Pubna Jail through the discreditable laxity of the Jailor and his subordinates as regards the night-guarding arrangements and the over-confidence reposed in well-behaved, useful prisoners, which enabled one of the Burmese unobserved to file the bar of one of the gratings of a door in his ward and in the ward in which the other Burman slept. The escape from the Dacca Jail was not due to any defect in the system of

guarding, as the prisoner passed out with the men released on the Jubilee day in the place of a man bearing the same name as himself. The small number of escapes testifies to the improvement in discipline of the warder establishment, and is highly creditable to Dr. Lethbridge and his subordinates.

14. *Prison discipline.*—The new rules requiring that the classification of habitual prisoners shall be made by the Court or District Magistrate were in force for some months last year. In some cases the orders were not understood by the Magistrates. In Dinagepore, for instance, 80 persons convicted for the first time were classed as habituals. Again in Bhagulpore, on reclassifying the prisoners of the Bhagulpore Jail, 140 prisoners who had been once convicted were transferred by the Magistrate from the A to the B class, under the idea apparently that all prisoners sentenced for dacoity, robbery, or house-breaking to three years' imprisonment and upwards must be hardened and dangerous criminals, even though never convicted before. In another place, 3 prisoners, sentenced to 20 days for hurt and not convicted before, were classed B. On the other hand, in Monghyr, 8 prisoners, sentenced to six months' imprisonment in default of security to be of good behaviour, were classed as A. Except in these and a few minor cases the rules worked well. The Inspector-General proposes to call shortly for a further report on this subject from Superintendents of Jails. He is requested to bring to the notice of Government any case in which the rules appear to have been flagrantly misapplied. A decrease in the number of habituals was foretold by the Inspector-General in his Administration Report in 1885 as a result of the new rules It is difficult, however, at present to say whether the slight decrease in their number, noticed in paragraph 9, is due to this cause.



15. The number of offences by convicts fell to 35,824 from 40,512 in 1886. The percentage of offences to the daily average population rose to 328·4 from 299·9 in 1886. On the other hand, only 59·8 of the whole number of individual prisoners committed offences as against 65·5 the year before. As the Lieutenant-Governor lately addressed the Government of India on this subject, it is unnecessary here to deal at length with the subject of the recording of jail offences. The number of serious offences keeps extremely low. There were only 44 punishments by Criminal Courts against 85 in 1884, 71 in 1885, and 44 in 1886. The number of corporal punishments is a third less than in 1886, namely, 266 against 390, another indication of the small number of serious offences. In 21 cases only were less than 10 stripes given and in 42 cases between 10 and 15. During the last two quarters of the year there was no case in which less than 10 stripes were given. The six cases in which illness is reported to have followed after corporal punishment were all cases of ulcers caused by whipping. Reduced diet was only given in 820 cases against 4,495 in 1884, 2,958 in 1885, and 1,514 in 1886. Fetters were imposed in 11,640 cases as a punishment. In 10,232 cases the prisoners had them on for less than a month. Only 119 men were kept in fetters for safe custody—a very small number, considering that there were 284 Burmese prisoners in the Bengal jails.

16. Of the whole male jail population, only 4·34 per cent. were employed as convict officers, against 6·89 in 1886. This large reduction is due to the fact that convict warders, who take the place of paid warders, are not shown this year in Statement VIII, and to the large number released on account of the Jubilee, whom it was impossible to replace from those left in jail. As convict officers are not to be appointed in intermediate jails, the number for future years will be low though, as the Government of India pointed out in its review of the Administration Reports of the Jails of the several provinces of British India for 1886, they cannot be dispensed with altogether. The number of convict officers punished was 1,368 as against 1,868 in 1886. This shows that they worked well on the whole, as 1,543 convict officers were employed during the year. It requires constant warnings and corrections to make them efficient disciplinarians, and it is not found in practice in Bengal that minor corrections, if awarded at the special parades of convict officers, lower their position in the eyes of the prisoners.

17. The new mark rules were in force throughout the year, but the statistics are vitiated by the large number of convicts on the mark system

released at the Jubilee. The Inspector-General's opinion is that the new system as now worked is a complete success.

18. *Expenditure.*—The gross expenditure for all classes of jails fell from Rs. 10,93,361 to Rs. 9,68,033, the lowest figure ever reached. The decrease is spread over all items, excepting Medical Stores, which shows an increase of Rs. 607. Owing to the fall in daily population from 14,806 to 12,250, the cost per prisoner has risen from Rs. 73-13-6 to Rs. 79-0-4. The following diagram shows the fluctuation in the daily average number of prisoners and the average cost of each prisoner during the last 10 years:—

The cost per head fell in 1881, owing to a marked decrease in the price of rice, but since 1882 it has continuously risen, while the average number confined has simultaneously greatly diminished. This is a necessary result of the fact that the scales of establishments were adapted to a jail population of 20,000. The Inspector-General's scheme, by which 14 district jails were reduced to the intermediate grade, will result in a large saving this year, and if the jail population does not increase, further reductions will be possible.

19. The expenditure in Central and District Jails shows a decrease under every head, and a total of Rs. 8,12,576 against Rs. 9,39,472 last year. The reduction in the daily average population, however, has raised the cost per prisoner from Rs. 66-9-11 to Rs. 70-12-3. There is a decided saving in all items of expenditure which are in the power of Superintendents to control. Thus, allowing for the smaller daily average number of prisoners, there has been a saving of Rs. 38,219 under the head of diet, or, in other words, the average annual expenditure for diet per prisoner has fallen from Rs. 22-15-4 to Rs. 20-4; while the annual cost of clothing a prisoner has fallen to Rs. 3-14-6 from Rs. 4-14-3 in 1885 and Rs. 4-4-10 in 1886. Taking together the heads diet, hospital charges, and clothing, the average annual expenditure per prisoner has fallen from Rs. 30-4-6 in 1886 to Rs. 27-4-3 in 1887.

20. These economies have been effected by the lower prices paid for articles of food, especially rice and wheat, and economy in management. The average price of rice per maund was Rs. 1-12-8 against Rs. 2-1-8 in 1886 Wheat in like manner fell from Rs. 3-15-8 per maund to Rs. 3-5-4. These are below the market rates, and have been got by such economical measures as storing grain at the cheapest season, husking rice and dall, buying cattle and goats and having the meat prepared on the jail premises. The following jails showed the most remarkable reductions in average diet expenditure:—

	1887.			1886.		
	Rs.	A.	P.	Rs.	A.	P.
Bogra	13	15	9	18	9	1
Burdwan	18	14	8	23	11	8
Mozufferpore	18	4	9	23	1	9
Furreedpore	17	6	4	23	2	2
Dacca	22	11	6	29	7	0
Monghyr	13	10	6	20	1	4
Hazaribagh	17	2	7	24	10	9

The extraordinary reduction in Monghyr is due to "(1) an improvement in the method of cooking of Indian-corn, which made it possible to give this cheap grain all the year round; (2) by the growing of 47 maunds of Indian-corn on jail land; (3) purchase of paddy at the cheap season and husking it in the jail, which resulted in a saving of 9 annas a maund, as compared with bazar rates for rice; and (4) purchase of cereals in the interior of the district." These results are highly creditable to the jailor, who is reported to be most careful as regards the health of the prisoners. The least satisfactory results are given by Nuddea, Gya, and Shahabad. In the first named jail, the average expenditure on diet rose from Rs. 28-3-9 in 1886 to Rs. 23-4-8. In Gya the increase was from Rs. 23-9 to Rs. 23-10-7. In Shahabad the increase was from Rs. 18-8-8 to Rs. 19-2-2. The Inspector-General is unable to supply figures showing the amount of cereals produced from jail gardens and used for rations, as required in the Government of India's Resolution on the Jail Report for 1886. Superintendents have been directed to keep careful accounts for the current year. All the vegetables required for jail use were grown in the jails, except in the Khoolna Jail, where the garden was taken up for building purposes. The expenditure on bazar vegetables was only Rs 17 against Rs. 173 in 1886 and Rs. 643 in 1885.

The following table gives very interesting results:—

	Number of deaths per mille in 1887.	Number of deaths per mille in 1886.
Jails where the cost of dieting decreased by Rs. 2 or more a head in 1887 as compared with 1886 ..	31·27	37 16
Jails where the cost of dieting decreased by less than Rs. 2 a head in 1887 as compared with 1886 ...	37·90	39 78
Jails where the cost of dieting increased in 1887 as compared with 1886	36·30	39 75

These figures show that economy in dieting is not necessarily accompanied by any increase in sickness and mortality.

21. The total expenditure on establishment fell from Rs. 4,07,898 in 1886 to Rs. 4,00,611 in 1887, owing to the abolition of the warder reserve guard of the jails which have since been reduced to the status of intermediate jails. Hospital charges fell to Rs. 35,750 from Rs. 42,704 in 1886, while at the same time the average cost per head of sick shows a rise from Rs. 67-5-1 to Rs. 68-3-11. The average expenditure on clothing fell to Rs. 3-14-6 from Rs. 4-4-10. Dinagepore, Nuddea, Burdwan, Furreedpore, Mymensingh, Lohardugga and Singbhoom were the most expensive, the average expenditure varying from Rs. 8-4-8 at Dinagepore to Rs. 5-7-8 at Singbhoom. The Superintendents of these jails will be asked to exercise more control over this item of expenditure. Under contingencies there was a saving of Rs. 5,820 as compared with last year. The charges under the head of diet of defendants (which includes railway fare and subsistence allowance given to released prisoners) and transfer charges show an increase in consequence of the large number of prisoners released on the Jubilee day, and frequent transfer from district to central jails owing to the demand in central jails for prisoners. On petty constructions and repairs the expenditure fell from Rs 22,831 to Rs. 22,543.

22. *Employment of prisoners and manufactures.*—The total average number of prisoners sentenced to labour fell from 13,339·53 in 1886 to 10,698·30 in 1887. The ratio per cent. of the daily average sick, 4·9, was lower than in any year since 1880, excepting 1886, when it was 4·8. The average number employed under all heads of prison service fell from 4,078·01 to 2,993·93. The number employed on manufactures was 4,925·29 against 5,971·72 in 1886. The proportion per cent. of convicts employed on manufactures to total number sentenced to labour was 46·03. The total profits on the year's workings came to Rs. 2,42,741, or an average profit of Rs. 22-11 per head sentenced to labour. The corresponding figures for 1886 were Rs. 3,10,099 and Rs. 23-4. The falling off is fully accounted for by the Jubilee remissions. In the Presidency Central Jail alone the profits fell from Rs 91,557 in 1886 to Rs. 69.591-12, or an average of Rs. 61-6 per prisoner sentenced to labour against the previous year's average of Rs. 75-13. The lower earnings in this case were entirely due to the loss of skilled labour by the Jubilee remissions; this cause affected more or less the working throughout the Department.

The average earnings of each prisoner in central jails are shown in the following table:—

		Average earning per prisoner, 1887.	Average earning per prisoner, 1886.
		Rs.	Rs.
Presidency Central Jail	...	58·3	72·0
Alipore "	...	42·7	35·4
Buxar "	...	40·2	47·6
Midnapore "	...	30·8	18·4
Rajshahye "	...	21·2	24·6
Dacca "	...	3·0	2·4

The Marine, Telegraph, and Army Clothing Departments continued to indent on the Alipore Central Jail, and it supplied opium chest-covers to the value of Rs. 74,134 to the agencies of Benares and Behar. In Buxar the tent industry is rapidly extending. In Rajshahye the earnings were reduced by Rs. 4,377-9 owing to the settlement of a claim against the jail in respect of the refraction of the seed supplied in 1886-87. In Dacca Central Jail only 27·22 per cent. of the prisoners sentenced to labour were employed on manufactures—a lower figure than in any other Central Jail. The average profits, Rs 3-3 per head, though very low, are higher than in any previous year since 1881, excepting 1884 and 1885. Till towards the end of 1884 most of the labourers were employed by the Public Works Department, and the efforts to develop a staple industry have not hitherto been very successful. A Commissariat order for *durrees* has been obtained by the Jail. Special attention will doubtless be given by Dr. Lethbridge to this matter. The Bhagulpore Central Jail made a loss of Rs. 15,055 on its manufacturing operations. It lost in 1885 the Army contracts for woollen goods. The Inspector-General of Jails made an enquiry on the spot, and he is satisfied that all that is possible is being done to work the mill profitably. It is hoped that the Ordnance Department will be able to help with small orders, which will give a small profit until it again receives a portion of the Army contracts. Darjeeling again heads the list of district jails with an average earning of Rs. 87-8 as compared with Rs. 79-15, the figure for last year The stock of manufactured articles is still somewhat large, but it is satisfactory to note that it has steadily diminished from Rs. 3,41,100 at

the close of 1884 to Rs. 2,76,416 at the close of 1887. The outstandings at the end of the year were very large, and it is unsatisfactory that they are showing a tendency to increase.

23. *Subsidiary Jails.*—A subsidiary jail was opened during the year at Thakurgaon in the Dinagepore district, bringing the total number up to 85. The average number of inspections by Superintendents was 70 and in 8 cases only were fewer inspections made. Atia, Kishoregunge, Kissengunge, Serajgunge, Arrareah and Brahmanbariah were overcrowded. The special report promised by the Inspector-General, after having the capacity of the wards and enclosures re-measured, is awaited. The condition of warder guards attached to subsidiary jails continues to improve There were only 17 escapes from subsidiary jails, the lowest number on record during the last 10 years. Of those who escaped, 7 were convicts and 10 under-trial prisoners. At Moonshigunge a convict escaped who had, by the order of the Deputy Superintendent, been taken out of the subsidiary jail, contrary to rules, to work in his dwelling-house. The Deputy Superintendent (a Civil Hospital Assistant) has been fined one month's pay, removed from the Jail Department, and transferred. The average detention of convicts rose to 8·05 days, the highest figure since 1880. At Palamow convicts sentenced to three months and under are detained in the subsidiary jail. The Inspector-General's proposal to establish an intermediate jail there is under the consideration of Government. Convicts were detained in the Bhola, Arrareah, Atia and Kishoregunge subsidiary jails owing to their being employed in building the enclosure walls under the Public Works Department. The average cost of each prisoner fell from Rs. 189-10-2 to Rs. 178-1-8. The average number of prisoners, however, rose from 271·41 in 1886 to 310·04 in 1887; so that the total expenditure increased from Rs. 1,33,648 to Rs. 1,36,854. This includes an increase of Rs. 1,805 in the amount spent by the Public Works Department. The average detention of under-trial prisoners was 18·48 days. In Jamui, Fenny, Nowgong, Satkhira and Oolooberiah the detention of under-trial prisoners exceeded 20·50 days. This matter will be dealt with in the Judicial Department

24 *Vital Statistics.*—There was ample room during the past year in the Bengal jails for the convict population. In a few jails the number of under-trial prisoners exceeded the capacity of the under-trial wards, but in those cases the excess number was invariably removed to empty convict wards. The filtered water of the Bhagulpore water-works was introduced into the Bhagulpore Central Jail in August 1887 The health of the prisoners in the Midnapore Central Jail has much improved since river water has been used all the year round for drinking purposes. Filtered water from the Calcutta supply will shortly be introduced into the Presidency Jail The rules regulating labour and the weight test have been strictly carried out. The dry-earth system is in force in every jail, and Dr. Warden, by an examination of the soils from different parts of the Presidency Jail garden, has shown that the growing of a rapid succession of crops completely removes all trace of chemical products likely to prove dangerous to health.

25. The sickness and mortality of convicts and under-trial prisoners in all classes of jails for the last ten years is compared in the following statement:—

Years	Daily average number of prisoners.	Daily average sick	Ratio per mille of daily average sick.	Number of Deaths. From cholera.	Number of Deaths. From all other causes.	Number of Deaths. Total number of deaths.	Death-rates per mille of average strength. From cholera.	Death-rates per mille of average strength. From all other causes.	Death-rates per mille of average strength. From all causes.
1878	15,611	808	48·1	215	1,072	1,287	11·5	57·6	69·1
1879	18,483	947	51·2	341	1,411	1,752	18·4	76·4	94·8
1880	17,802	941	52·8	31	1,100	1,131	1·7	61·8	63·5
1881	16,520	878	52·6	85	1,014	1,099	5·1	61·4	66·5
1882	15,902	849	53·3	151	933	1,084	9·5	58·6	68·1
1883	14,776	720	49·3	61	701	762	4·1	47·4	51·5
1884	14,868	724	48·6	62	678	740	4·1	45·6	49·7
1885	14,926	773	51·7	157	728	885	10·5	48·7	59·2
1886	14,579	648	44·4	40	503	543	2·7	34·5	37·2
1887	12,947	539	44·7	20	579	599	1·7	31·4	33·1
Total	1,58,514	7,886	49·3	1,163	8,519	9,682	7·3	53·7	61·0
Average	15,851	788	49·3	116	851	968	7·3	53·7	61·0

The death-rate from all causes is the smallest on record, while the death-rate from cholera is lower than in any year since 1880. Khoolna,

Chumparun and Maldah show the largest proportion of admissions into hospital per mille of average strength. Khoolna is practically a hospital, only the sick and feeble being retained there, while healthy prisoners are passed on to Jessore. The Chumparun Jail is said to be on an unhealthy site; the warders and jail subordinates suffered severely. That the mortality did not exceed 33·5 per mille is to Dr. Bovill's credit. All the drinking and cooking water is carted from the river, six and a half miles away. In Maldah, also, there was much malarious fever, and the warder guard suffered as well as the prisoners, two of them dying. In Lohardugga there were 11 deaths among convicts, giving an annual death-rate of 98·8 per mille. It is reported by the Medical Officer that fully 45 per cent. of those admitted during 1887 were in bad health, and all more or less showed signs of scurvy. None of the prisoners who had passed any length of time in jail were attacked with it.

The following table gives the rates of admissions to hospital and deaths per mille from dysentery and diarrhœa for the years 1883 to 1887:—

	Rate of admission per mille	Rate of death per mille.
1883	499·5	21·8
1884	515·5	19·7
1885	564·3	23·1
1886	444·4	14 1
1887	429·3	12 6

These are diseases considered to be preventible, and the table shows that they were combated with increased success in 1887. The number of deaths from anæmia and general debility show a remarkable falling off; and as the number of admissions into hospital under this head has not diminished proportionately, there appears to be no doubt that this is due, as suggested by the Inspector-General, to the working of the weight test and the stringent rules for the segregation and treatment of all these cases in their earliest stages. The following table gives figures from 1883:—

	Admissions into hospital.	Deaths.
1883	798	62
1884	693	70
1885	694	74
1886	565	47
1887	559	24

The number of admissions and deaths from respiratory diseases diminished. Cerebro-spinal fever continued in the Alipore Jail, notwithstanding that all the recommendations of the Medical Committee on the subject were carried out. There was no overcrowding last year, and arrangements were made by which better ventilation was provided in the wards and worksheds. The disease appears to be hardly amenable to treatment. There were 13 cases and 8 deaths in 1887 against 18 cases and 10 deaths in 1886. There were only 18 deaths from cholera, the largest number occurring at Rungpore Jail, at a time when it was very prevalent in the district.

26. The total number of deaths among convicts was 363, or 33·2 per mille, against 38·2 per mille in 1886. Of this number, 354 died in jails, of whom only 95, or 26·83 per cent., were received in good health, 148, or 41·81, in indifferent health, and 111, or 31 36, in bad health. 179 men died within six months of their admission to jail. The following are some of the precautions taken in regard to prisoners admitted into jail in indifferent health. Special gangs are formed, watched by all the jail authorities; tonics are administered; very light work, if any, is given; there is a special diet and mid-day rest of two hours; oil is also allowed to anoint their bodies The following statement shows the extent to which prisoners discharged from jails in 1887 improved in health during their residence in jail:—

	1				2			
	State of health on admission of those who were discharged from jail, as per column 2.				State of health on discharge of those who were discharged from jail, as per column 1.			
	Good.	Indifferent.	Bad.	Total.	Good.	Indifferent.	Bad.	Total.
In 1887	23,053	7,976	2,396	33,425	25,478	6,411	1,536	33,425
Ratio per cent. to total number discharged from the jail	68·97	23·86	7·17	100·00	76·23	19·18	4·59	100·00

27. The death-rate for 1887 shown in the report has to some extent been affected by the Jubilee remissions. During January, September, October, November and December 1887, the average convict jail population was 11,711, and there were 209 deaths, giving an annual death-rate per mille of 42·8. The average convict jail population during the other seven months of the year came to 9,843, and there were 145 deaths, giving an annual death-rate per mille of 25·2. The death-rate, however, is very satisfactory compared with previous years. This is in some measure attributable to the fact that fever has not of late been so prevalent in a very fatal form as was the case some years ago, and that the general health of the population has appreciably improved. It is still, however, considerably higher than in some other provinces. The report shows clearly the strenuous efforts made to improve the health of the prisoners confined in Bengal Jails, and the marked success which has crowned these measures. Where deaths were due to diseases in any measure preventible and amenable to treatment, either the number of cases diminished, or the virulence of the disease was checked. Thus, though cases of intermittent fever increased, the rate of deaths to admissions into hospital fell from 6·7 in 1886 to 4·7 per cent. Another test of the efforts made and their success is given by the weighment results. In 1886 (the figures for 1887 are not available), of the prisoners discharged from the North-West Provinces Jails, 6,792 neither gained nor lost weight; 21,558 gained and 13,275 lost weight. In 1887 in Bengal 10,120 of those discharged had neither gained nor lost weight; 16,844 had gained and 6,461 had lost weight. In other words, in Bengal, 19·3 per cent. only lost weight against 31·8 per cent. in the North-West. Again, in Bengal, only 2·86 per cent. lost over five pounds, while the percentage in the North-West was 7·21. No measures, however, whatever room there may still be for improvement, appear to be capable of bringing the mortality of the Bengal Jails down to the standard of the North-West. While in Bengal Jails in 1887 no less than 54 deaths out of 399 were due to fever, and in 1886, 92 deaths out of 543; in the North-West Jails in 1886, only 32 deaths out of 463 were due to that cause, one proof among others that, unhealthy as parts of the North-West Provinces may be, the proportion of the population with constitutions broken down by repeated attacks of malarious fever is much smaller than in Bengal Great credit is due to Dr. Lethbridge for what he has already done, and no doubt even better results will be obtained in the future, as the Superintendents of Jails learn thoroughly to make use of all the precautions prescribed by him in order that illness may be discovered and combated on its first showing itself.

28. *Inspection.*—Dr. Lethbridge visited 36 central and district jails; also 8 subsidiary jails. The official visitors continued to visit the jails regularly. A number of non-officials have lately been added to the list of visitors.

29. The Lieutenant-Governor is glad to observe that the Inspector-General is able to report favourably on the work of almost all his officers. His special commendation of certain officers will be noted in the Appointment Department Dr. Lethbridge has again earned the thanks of Government for the ability and good judgment he has shown in the administration of a difficult and important department.

By order of the Lieutenant-Governor of Bengal,

J. WARE EDGAR,

Chief Secretary to the Govt. of Bengal.
